## **Foreword**

The current issue of “New Arrivals: List of New Additions with Summaries” contains a list of New Books that were processed in the month of August-September, 2022 and are available for use in the National Social Science Documentation Centre of ICSSR. In the main text, entries are arranged by the title, followed by bibliographical details and a summary of the document. For easy retrieval Author and Keyword Index are also given at the end where the number in front of the Author or Keyword denotes the serial number of the entry in the main list of New Additions. Interested readers can consult the listed titles by visiting the library.

Suggestions are always welcome.

Ramesh Yernagula

S.No	Titles and Other Details	Acc. No.
1	Academic Dependency in the Social Sciences: Structural Reality and Intellectual Challenges/ Kathinka, Sinha-Kerkhoff (ed.) and Syed Farid Alatas,(ed.)-- Manohar: New Delhi, 2010; 333p.	52056
	<p>The above book examines the academic dependence of diversely situated Southern scholars. Even though geography may play a different function in today's globalised society, the contributors to this volume all agree that the location of individuals has not become meaningless. However, there is limited knowledge about the impact of place among academicians differently located in the South and of the costs and benefits of academic globalization. The main purpose of this book, therefore, is to increase knowledge about the net result of such a calculus today for various regions in the South. Though all scholars in this book look upon academic dependency as a problem, there are differences of opinion as to what constitutes academic dependency, what its manifestations are, and how to cope with academic dependency. The papers in this volume deal with two major differences or levels of the problem of academic dependency, that is, theoretical and practical. The editors think it is essential that academic dependency be understood and dealt with along these two levels as this will enable an appreciation of the magnitude of the problem and serious consideration of the options available as measures to overcome academic dependency are considered.</p>	
2	Access to Medicines in India/ Sakthivel Selvaraj (ed.), Dinesh Abrol (ed.) and K.M. Gopakumar (ed.)-- Academic Foundation: New Delhi, 2014; 259p.	52055
	<p>This book examines in depth the major obstacles to access to medications in the country. It highlights several themes, considered impediments to access to medicines while at the same time proposing viable policy options. Some of these themes include inadequate investment in public health care, inefficient and unreliable procurement and distribution of drugs, unaffordable drug prices, and pharmaceutical patents. The book calls for scaling up investment and replicating the success of centralized procurement and decentralized distribution model of drugs, as in the state of Tamil Nadu, which will pave the way for universal access to essential medicines in India.</p>	
3	Advance Introduction to Governance/ Pierre, Jon-- Edward Elgar Publishing Limited: United Kingdom, 2021; viii,157p.	52097
	<p>The above title provides a comprehensive examination of what defines effective governance, whether delivered by a government or through more informal ways. Elgar Advanced Introductions are stimulating and thoughtful introductions to major fields in the social sciences, business, and law, expertly written by the world's leading scholars. Designed to be accessible yet rigorous, they offer concise and lucid surveys of the substantive and policy issues associated with discrete subject areas. Jon Pierre and Guy Peters expertly guide the reader through governance - one of the most widely used terms in political science - and its differing interpretations, with a comprehensive discussion of the key issues covering global as well as local level governance.</p>	

- 4 Advance Introduction to National Innovation Systems/ Chaminade, Cristina-- Edward Elgar Publishing: United Kingdom, 2018; xvi,175p. 52072

This book uses language appropriate for both social science and engineering scholars to offer an accurate synopsis of the emergence of the concept, its theoretical core, and its evolution. It analyses both developed and developing countries in terms of their NIS and its application to current societal challenges, such as economic growth, inclusive development, and environmental sustainability, in an increasingly globalized and interconnected world. Innovation studies is an evolving interdisciplinary field that has moved away from the weaknesses of neoclassical thinking and embraced the evolutionary theory. In this timely book, the authors offer a precise introduction to the nature of national innovation systems (NIS), examining the history of the concept and its use in today's world.

- 5 Advanced Introduction to Business Ethics / Hooker, John.-- Edward Elgar Publishing Limited: United Kingdom, 2021; vi,149p. 52085

The book presents comprehensive introductions to significant topics in the social sciences, business, and law that are skilfully written by the world's leading researchers. Designed to be accessible yet rigorous, they offer concise and lucid surveys of the substantive and policy issues associated with discrete subject areas. This concise and engaging Advanced Introduction provides the conceptual tools necessary to make ethical decisions in today's business world. John Hooker provides an objective and closely-reasoned analysis of ethical issues based on a unified conceptual framework that distils the best of ethical thought into three clearly articulated principles: the generalization, utilitarian, and autonomy principles. Key features include examples and case studies that illustrate ethical reasoning in complex business dilemmas and exploration of business ethics concerning environmental, social, and financial sustainability factors coverage of cross-cultural business ethics, technological unemployment, and the ethics of artificial intelligence and machine learning. This Advanced Introduction will be a valuable resource for academics and advanced students of business ethics and trust, business leadership, and corporate social responsibility. It will also be beneficial for business managers who wish to build an ethical organization, as well as technical personnel who incorporate ethics into automated systems.

- 6 Advanced Introduction to Water Politics/ Bhargava, Mahesh, and Pandey, Ranjana.-- Rakhi Prakashan Pvt. Ltd.: Uttar Pradesh, 2017; xvi, 270p. 52069

The work provides a wide and in-depth introduction to gender issues in India. It is intended primarily as a basic text for use in courses at universities, colleges, and tertiary educational institutes. It presents a systematic description of the gender issues and other aspects, which will serve as a foundation for students or anyone setting out on a career as a teacher or educator. For this book, gender discrimination encompasses all aspects of gender issues, from gender inequality to violence.

- 7 Advanced Introduction to Water Politics/ Conca, Ken.-- Edward Elgar: United Kingdom, 2021; vii,137p. 52099

This book provides essential reading for scholars and students of political science, public policy, environmental studies, human geography, and related social sciences, in addition to decision-makers and policymakers in the water and environmental policy fields.

- 8 After Digital: Computation as Done by Brains and Machines/ Anderson, James A.-- Oxford University Press: New York, 2017; x, 383p. 52100

According to this book, current computer technology doubles in power roughly every two years, a phenomenon known as Moore's Law. This steady rise is expected to come to a stop soon. Digital technology will change. Although digital computers dominate today's world, there are alternative ways to compute which might be better and more efficient than digital computation. After Digital looks at where the field of computation began and where it might be headed and offers predictions about a collaborative future relationship between human cognition and mechanical computation.

- 9 Banking and Financial Markets: How Banks and Financial Technology are Reshaping Financial Markets/ Bilan, Andrada-- Palgrave Macmillan: Switzerland, 2019; ix, 221p. 52073

The above book investigates the interaction of traditional and modern banking, as well as the economic benefits and costs of this new financial ecosystem, using recent empirical research in banking and finance and examining the effects of increased financial sophistication on a specific dimension of the loan contract. The traditional role of a bank was to transfer funds from savers to investors, engage in maturity transformation, screen for borrower risk, and monitor borrower effort in doing so. A typical loan contract was set up along six simple dimensions: the amount, the interest rate, the expected credit risk (determining both the probability of default for the loan and the expected loss given default), the required collateral, the currency, and the lending technology. However, the modern banking industry today has a broad scope, offering a range of sophisticated financial products, a wider geography -- including exposure to countries with various currencies, regulations, and monetary policy regimes -- and an increased reliance on financial innovation and technology. These new bank business models have had repercussions on the loan contract. In particular, the main components and risks of a loan contract can now be hedged on the market, utilizing interest rate swaps, foreign exchange transactions, credit default swaps, and securitization. Securitized loans can often be pledged as collateral, thus facilitating new lending. And lending technology is evolving from one-to-one meetings between a loan officer and a borrower, at a bank branch, towards potentially disruptive technologies such as peer-to-peer lending, crowdfunding or digital wallet services.

- 10 Between Survival and Status: The Counter-Hegemonic Geopolitics of Iran/ Saraswat, Deepika-- Macmillan Publishers Indian Private Ltd: Chennai, 2022; vi,212p. 52060

This book explores how the Islamic and revolutionary identity of Iran has been (re)produced in the geopolitical discourse of Iranian state elites over forty years from the Islamic Revolution in 1979 to 2019. The point of departure for this book is that forty years since its foundation, the Islamic Republic of Iran has pursued a counter-hegemonic geopolitics steeped in the Islamic ideology articulated by its founder Ayatollah Khomeini.

- 11 Beyond Public Policy: A Public Action Languages Approach/ Kevin, Spink Peter-- Edward Elgar: United Kingdom, 2019; viii; 238p. 52090

The book offers practical advice and real-life case studies on public policy. Public policy is an expression that has come to dominate the way people talk about government and public administration and is seen as a central component of the modern democratic order. Adopting an innovative public action languages approach, Beyond Public Policy shows how policy is only one of many powerful social languages (budgeting, planning, rights, directives, and protests, amongst others) used to make things happen in the ever-changing arena of public affairs; where they may cooperate, compete, or just go their own way. Opening up discussions on the varied ways that people talk about and act about the public good, is a fascinating insight into the multiplicity of social languages used to negotiate possibilities in public affairs. Social languages are examined as performative parts of everyday life, and examples from different places and times are used to illustrate the importance of these language forms. Political science, public administration, social psychology, and sociology scholars will find this book a vital reference with its advanced approach to public affairs. Professionals in NGOs, public service, and government, as well as activists, will also greatly benefit from the practical advice and real-life case studies.

- 12 Deglobalization 2.0: Trade and Openness during The Great Depression and The Great Recession/ Bergeijk, Peter A. G. van-- Edward Elgar: Cheltenham, 2019; ix, 204p. 52074

The book addresses the subject of deglobalization as an urgent matter, making it essential reading for policymakers and managers involved in international politics and economic interactions. It also offers guidance for academics in international economics and relations moving into the uncharted territory of deglobalization processes. The rapid integration of global governments, businesses, and capital has faced a dramatic and often hostile backlash in recent years. As populist agendas worldwide gain momentum, Deglobalization 2.0 explores the key drivers of reactionary movements. From the Make America Great Again movement in the US to Continental European populism, Peter van Bergeijk explains the critical catalysts of anti-globalization sentiment. Through a historical lens, this book draws out similarities and differences between contemporary developments and the economic crises of the 1930s, offering a unique understanding of the political and economic drivers of deglobalization. Focusing on wealth inequality, social uncertainty, and international competition

for economic supremacy, van Bergeijk examines and offers answers for the lacunae in the globalization debate. Provocative, insightful, and accessible.

- 13 Developing Creative Thinking Skills: An Introduction for Learners/ Hokanson, Brad-- Routledge: New York, 2018; vi,138p. 52081

The book helps learners demonstrably increase their creative thinking skills. Focusing on divergent thinking, twelve inventive chapters build one's capacity to generate a wide range of ideas, both as an individual and as a collaborator. This innovative textbook outlines a semester-long structure for the development of creative thinking skills and can easily be utilized as a self-directed format for those learning outside of the classroom. Readers are stimulated to maximize their creativity through active exercises, challenges to personal limits and assumptions, and ideas that can help create powerful habits of variance.

- 14 Developing The Circular Water Economy/ Brears, Robert C-- Palgrave Macmillan: New Zealand, 2020; x,221p. 52075

This book presents new research on policy innovations that promote the development of the circular water economy. In contrast to the linear economy, the circular water economy promotes the reduction of water consumption, reuse of water, and recovery of resources from wastewater to not only increase resilience to climate change but also reduce greenhouse gas emissions resulting from the provision of water and wastewater-related services. Providing a series of in-depth case studies of important locations in differing climates around the globe that have implemented a variety of policy innovations to develop the circular water economy, this book is a valuable resource for water and resource conservation managers, policymakers, international companies and organizations interested in the circular economy, environmental NGOs, researchers, as well as graduate and undergraduate students.

- 15 Economic and Financial Integration in South Asia: A Contemporary Perspective / Sehgal, Sanjay,-- Routledge: New York, 2021; xvi, 197 p. 52071

This book examines the current condition and prospects for economic and financial integration in South Asia, which has emerged as one of the world's most active areas. It looks at how regional convergences and cooperation would reinforce ties amongst the diverse economies of South Asia in the changing global economic landscape. Drawing on empirical research, the book looks at the degree of economic and financial integration in South Asia, which according to the World Bank includes the least integrated regions in the world, and explores the fundamental factors that drive integration amongst these countries. It offers important insights into the financial landscape of the region, as well as the dynamics of the interlinkages in the banking system, the stock markets, and the debt markets. The book examines the role of bilateral trade in augmenting regional economic ties, the growth opportunities these will foster, and the major challenges and roadblocks for the leaders of the region. It also provides an overview of China's role in South Asia's financial integration and the interdependence of these economies for economic opportunities, macroeconomic and financial stability, jobs, sustainable growth, and inclusive development. Detailed and insightful, this book will be of great interest to investors and regional policymakers. It will also be of interest to researchers and

students of economics, public and foreign policy, finance, international relations, and South Asia studies.

- 16 Energy Economics: Concepts, Issues, Markets, and Governance/ Bhattacharyya, Subhes C-- Springer: United Kingdom, 2019; xxi, 849p. 52076

This book provides an updated and expanded overview of basic concepts of energy economics and explains how simple economic tools can be used to analyze contemporary energy issues in the light of recent developments, such as the Paris Agreement, the UN Sustainable Development Goals, and new technological developments in the production and use of energy.

- 17 Environmental Policy, Sustainability, and Welfare: An Economic Analysis/ Aronsson, Thomas-- Edward Elgar Publishing Limited: United Kingdom, 2018; vii,189p. 52086

This comprehensive and accessible textbook addresses important relationships between economics and environmental policy, highlighting in particular the role of taxation. It also connects environmental policy to social accounting by describing how measures of welfare and sustainable development depend on whether policies successfully internalize market failures

- 18 From Ownership to Access: Leveraging the Digital Paradigm/ Debal, C.Kar (ed.), P.K.Jain,(ed.) and Parveen Babba,(ed.)-- Synergy Books Of India: New Delhi, 2016; 251p. 52070

The book emphasised the importance of digital technology adoption and how it continues to influence how libraries approach innovation. libraries around the world are adapting and rethinking their strategies and best practices for the front end of innovation in presence of these transformational technologies. With the changing times, social interaction is becoming a powerful primal force behind the shifting preferences driving a preference for experiencing access over owning.

- 19 Gandhi and The World/ Nutan Kapoor Mahawar (ed.) and Dhruvajyoti Bhattacharjee (ed.)-- Macmillan Publishers Indian Private Ltd: Chennai, 2022; ix, 342p. 52059

The work underlined Gandhian ideals and philosophy's undeniable towering impact and embodiment in modern history, both in India and beyond the world. Gandhi has continued to inspire generations of social activists, political leaders, and thinkers across the social, political, economic, and environmental spectrum in different geographies. Gandhi's relevance has stood the test of time in India through generations and has also traversed the length and breadth of the world.

- 20 Gendering Legislative Behaviour: Institutional Constraints and Collaboration/ Barnes, Tiffany D-- Cambridge University Press: United State Of America, 2016; xiii, 274p. 52091

The book describes democracies, power is obtained via competition. Yet, as women gain access to parliaments in record numbers, worldwide collaboration appears to be on the rise. This is puzzling: why, if politicians can secure power through competition, would we observe collaboration in Congress? Using evidence from 200 interviews with politicians from Argentina and a novel dataset

from 23 Argentine legislative chambers over 18 years, *Gendering Legislative Behavior* reexamines traditional notions of competitive democracy by evaluating patterns of collaboration among legislators.

- 21 *In Flight From Conflict and Violence: UNHCRs Consultation on Refugee Status and Other Forms of International Protection/ Volker Turk (ed.), Alice Edwards (ed.) and Cornelis Wouters (ed.)-- Cambridge University Press: United State of America, 2017; xvii, 306p.* 52092

The title will provide a comprehensive analysis of the global and regional refugee instruments as they apply to claimants in flight from situations of armed violence and conflict, exploring their interrelationship and how they are interpreted and applied (or should be applied). The impact of violence and conflict on refugee status determination and international protection is a key developing field. Given the contemporary dynamics of armed conflict, how to interpret and apply the refugee definitions at global and regional levels is increasingly relevant to governmental policy-makers, decision-makers, legal practitioners, academics, and students.

- 22 *Integrating Higher Education and Employability: Issues, Challenges & Opportunities/ R.K Mittal (ed.) and Monika Kulshreshtha (ed.)-- Kunal books: New Delhi, 2017; xv, 208p.* 52068

According to this book, the Indian education system is the largest in the world in terms of some colleges and institutions, and students. It is ironic fact that Indian higher education is running through a turbulent phase. Our current educational system is so complex that it is burdening the students with the subject and theories that are not applicable in the present arena and are not even able to inculcate in them the required skills that our economy needs for the future. The system today is not able to provide any opportunity to the students. The Industry today needs an exact fit for them with the right blend of knowledge, skills, and abilities. They expect that students coming out of college should be industry ready. Companies today are not interested in spending either money or time on developing the basic skills required for the jobs. Most recruiters expect that along with the core competence, the candidates should have a good command of communication skills as they have to deal with a wide variety of clients every day.

- 23 *International Trade Finance/ Bhogal, Tarsem-- Palgrave Macmillan: United Kingdom, 2019; xxx, 354p.* 52077

The above book on international trade finance is an indispensable resource for bankers, exporters/importers, shippers, consultants, teachers, and students navigating international trade finance procedures. The book addresses basic topics relating to international trade including letters of credit mechanism, collections of bills, trade customs, and practice. New to this revised edition, covers SWIFT updates, supply chain system, UKEF, Blockchain technologies, the implications of BREXIT, NAFTA, Mexico, Canada, and other bilateral agreements and their implications, the US sanctions, terrorist financing, and anti-money laundering provisions, and a checklist to control financial crime risks in trade finance.

- 24 Interpreting Globalisation: Perspectives in International Relations/ Rajen Harshé (ed.)-- Rawat Publications in association with Indian Council of Social Science Research New Delhi: Jaipur, 2004; 276p. 52052

The work brings together fresh perspectives from Indian and Russian scholars as they interpret the relationship between globalization and international relations. By anchoring their analyses around the changing status of the nation-state, the contributors unravel a mélange of complex, mutually contradictory, and multiple social processes that operate, simultaneously, at the national, regional, and transnational levels in a globalizing world. In the process, they unveil and reflect on the uneasy co-existence of the movements towards global integration through communication networks, finance, technologies, and trade with the contrary trends towards disintegration built around the resurgence of local issues and regional identities that undermine the very existence of the nation-state. On a broad canvas of inquiry, the contributors handle significant themes concerning security, civil society, international trade, regional cooperation, regional identities, and capitalism to untangle the relationship between globalization and international relations

- 25 Introduction to Econometrics/ Stock, James H.-- Pearson Education: Delhi, 2018; 836p. 52078

This publication focuses on empirical analysis, integrating data sets and real-world questions into the theoretical development of the text. It includes an introduction to program evaluation, panel data methods, instrumental variables regression, and regression with time series data.

- 26 Managing The Risks of Extreme Events and Disasters to Advance Climate Change Adaption: Special Report of The Intergovernmental Panel on Climate Change/ Christopher, B. Field (ed.)-- Cambridge University Press: New York, 2012; x, 582p. 52067

The work emphasized extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, which can lead to disasters. This Special Report explores the social as well as physical dimensions of weather- and climate-related disasters, considering opportunities for managing risks at local to international scales. SREX was approved and accepted by the Intergovernmental Panel on Climate Change (IPCC) on 18 November 2011 in Kampala, Uganda.

- 27 Misreading Law Misreading Democracy/ Nourse, Victoria-- Harvard University Press: United Kingdom, 2016; 259p. 52093

This book argues about American law schools extol democracy but teaches little about its most basic institution, the Congress. Interpreting statutes is lawyers' most basic task, but law professors rarely focus on how statutes are made. This misguided pedagogy, says Victoria Nourse, undercuts the core of legal practice. It may even threaten the continued functioning of American democracy, as contempt for the legislature becomes entrenched in legal education and judicial opinions. Misreading Law, Misreading Democracy turns a spotlight on lawyers' and judges' pervasive ignorance about how Congress makes law.

- 28 Negotiating Climate Change: A Forensic Analysis/ Kellow, Aynsley J.-- Edward Elgar Publishing Ltd.: United Kingdom, 2018; vii,173p. 52087

The work examines how an error in global meta-policy set climate change negotiations on an unproductive course. The decision to base negotiations on the Montreal Protocol and overlook the importance of interests, it argues, institutionalized an approach doomed to fail. By analyzing interests, science, and norms in the process, and the neglect of 'interactive unilateralism, learning was delayed until the more promising Paris Agreement was finally concluded, only to encounter a Trump Presidency, which (ironically) might offer further learning opportunities.

- 29 Productivity and The Pandemic: Challenges and Insights from Covid-19/ Philip McCann (ed.) and Tim Vorley (ed.)-- Edward Elgar Publishing Limited: United Kingdom, 2021; xxi, 305p. 52089

The forward-thinking book examines the potential impacts of the Covid-19 pandemic on productivity. Productivity and the Pandemic feature 21 chapters authored by 46 experts, examining different aspects of how the pandemic is likely to impact the economy, society, and governance in the medium- and long term. Drawing on a range of empirical evidence, analytical arguments, and new conceptual insights, the book challenges our thinking on many dimensions. With a keen focus on place, firms, production factors, and institutions, the chapters highlight how the pre-existing challenges to productivity.

- 30 Reorienting Educational Efforts for Sustainable Development: Experiences from South Asia/ Rajeswari Namagiri Gorana (ed.) and Preeti Rawat Kanaujia (ed.)-- Springer: Netherlands, 2016; xxxii, 205p. 52082

The initiatives under the Education for Sustainable Development (ESD) banner will be the main focus of this book on South Asia, which will also explore the difficulties, chances, problems, and tactics faced by the nations in the region. At various levels of policy, planning, implementation, and assessment, it shows these environmental education/ESD activities in relation to the administrative, economic, social, cultural, and ecological realities of each nation. The discussions in this book extend beyond formal education systems like schools, higher education, and pre-service and in-service teacher preparation to community education and education initiatives conceptualized with the goal of sustainability. All initiatives will demonstrate how each country at its own pace contributes to moving ESD from the periphery to the core of education initiatives.

- 31 Roads, Winds, Spices in The Western Indian Ocean: The Memory And Geopolitics of Maritime Heritage/ Nutan Kapoor Mahawar (ed.) and Pragya Pandey (ed.)-- Macmillan Publishers Indian Private Ltd: Chennai, 2022; x, 262p. 52057

The book attempts to reorient the dominant narratives with an interdisciplinary approach to explore and understand various identities, routes, and sites with a focus on the Western Indian Ocean region, by offering perspectives of a multidisciplinary group of academics, policymakers, diplomats, archaeologists, and museum and heritage experts.

- 32 Rural Credit and Financial Penetration in Himachal Pradesh/ Verma, Satish-- Centre for Research in Rural and Industrial Development: Chandigarh, 2019; xxi, 215p. 52065
- The book fills the void in the scant literature on banking in Himachal Pradesh. Banking in Himachal Pradesh though remains mostly rudimentary yet it has expanded immensely particularly in the rural areas reducing the rural-urban disparities. But, they have exhibited a high order of credit discipline. These and several other issues, using the field survey data, have been comprehensively analyzed in this book.
- 33 Teaching Design and Technology Creatively/ Clare, Benson (ed.) and Suzanne Lawson (ed.)-- Routledge: New York, 2017; xv, 184p. 52083
- This book is packed full of practical ideas, Teaching Design and Technology Creatively is a stimulating source of guidance for busy trainees and practising teachers. Grounded in the latest research, it offers a wealth of suggestions to foster creative development in D&T and supports teachers in providing their students with more authentic, enjoyable experiences.
- 34 The Challenge of Development: Displacement in Nagaland 1947-2010/ Fernandes, Walter-- North-Eastern Social Research Centre: Assam, 2017; xiii, 288p. 52062
- The work studies the extent of land acquisition and displacement from 1947-2010 in Nagaland, and its impact on the people affected and proposes a development paradigm that can combine economic growth and infrastructure building with people's development.
- 35 The Cultural Revolution on Trial: Mao and the Gang of Four/ Cook, Alexander C.-- Cambridge University Press: United Kingdom, 2016; xv, 277p. 52094
- This title shows "The trial of Cultural Revolution leaders", including Mao's widow and her Gang of Four, was the signal event in China's post-Mao transition. In its wake, Chinese socialism emerged from the rubble of the Cultural Revolution to create the China that we know today. This spectacular show trial was a curious example of transitional justice, marking a break from the trauma of the past, a shift to the present era of reform, and a blueprint for building a better future. In this groundbreaking reconstruction of the most famous trial in Chinese history, Alex Cook shows how the event laid the cornerstone for a new model of socialist justice; at the same time, a comparison of official political and legal sources with works of popular literature reveals the conflicted cultural dimensions of this justice. The result, Cook argues, saved Chinese socialism as the ruling ideology, but at the cost of its revolutionary soul"-
- 36 The Harambee Factor: India-Africa Economic and Development Partnership/ Singh, Gurjit-- Macmillan Publishers Indian Private Ltd: Chennai, 2022; xvi, 433p. 52061
- The book represents a collection of his own experience, interviews with participating entities, and his engagement with African and Indian businessmen, and academics. institutional leaders and the like. This book is intended to serve

as a major source of information and perspective on India's African engagement in the 21st century.

- 37 The Heart of The Constitution: How the Bill of Rights became the Bill of Rights/ Magliocca, Gerard N.,-- Illustrated edition; United States of America, 2018; xii, 235p. 52095

The work states the untold story of the most celebrated part of the Constitution. Until the twentieth century, few Americans called the first ten constitutional amendments drafted by James Madison in 1789 and ratified by the states in 1791 the Bill of Rights. Even more surprising, when people finally started doing so between the Spanish-American War and World War II, the Bill of Rights was usually invoked to justify increasing rather than restricting the authority of the federal government. President Franklin D. Roosevelt played a key role in that development, first by using the Bill of Rights to justify the expansion of national regulation under the New Deal, and then by transforming the Bill of Rights into a patriotic rallying cry against Nazi Germany. It was only after the Cold War began that the Bill of Rights took on its modern form as the most powerful symbol of the limits on government power. These are just some of the revelations about the Bill of Rights in Gerard Magliocca's *The Heart of the Constitution*. For example, we are accustomed to seeing the Bill of Rights at the end of the Constitution, but Madison wanted to put them in the middle of the document. Why was his plan rejected and what impact did that have on constitutional law? Today we also venerate the first ten amendments as the Bill of Rights, but many Supreme Court opinions say that only the first eight or first nine amendments. Why was that and why did that change? The Bill of Rights that emerges from Magliocca's fresh historical examination is a living text that means something different for each generation and reflects the great ideas of the Constitution--individual freedom, democracy, states' rights, judicial review, and national power in times of crisis.

- 38 The Impact of Climate Policy on Environmental and Economic Performance: Evidence from Sweden/ Färe, Rolf-- Routledge: New York, 2017; xii,145 p. 52088

This publication shed light on pertinent policy issues on the environment. Sweden has a long history of ambitious environmental, energy, and climate policy. Due to the large amount of data available, it is possible to perform a statistically sound analysis and assess long-term changes in productivity, efficiency, and technological development. The data at hand together with Sweden's ambitious energy and climate policy provides a unique opportunity to shed light on pertinent policy issues.

- 39 The Mobilities Paradox: A Critical Analysis/ Korstanje, Maximiliano E.-- Cheltenham: Edward Elgar Publishing Limited, 2018; v, 174p. 52079

The book reviews the strengths and weaknesses of the mobilities paradigm and in doing so constructs a bridge between Marxism and Cultural theory. The theory of mobilities has gained great recognition and traction over recent decades, illustrating not only the influence of mobilities in daily life but also the rise and expansion of globalization worldwide. But what if this sense of mobility is an ideological bubble that provides the illusion of freedom whilst limiting our mobility or even keeping us immobile?

- 40 The Muslim Brotherhood and The West: A History of Enmity and Engagement/ Frampton, Martyn-- The Belknap press of Harvard university press: Cambridge, Massachusetts, 2018; ix, 661p. 52098

This book examines the history of the relationship between the world's largest and most influential Islamist organization, the Muslim Brotherhood, and the western powers that have dominated the Middle East, the United Kingdom and the United States. It examines the relationship that has existed in the shadows of public attention and scholarly interest; where it has been considered, this subject has been dominated by conspiracy theory and hyperbole. By contrast, this book draws on the memoirs and publications of the Brotherhood (in both Arabic and English), as well as extensive archival research in both London and Washington to offer an in-depth understanding of how relations between this movement and the West have oscillated between a posture of enmity (on both sides), to moments when engagement has been contemplated and occasionally attempted. In the process, the book offers an important new perspective on the history of the Brotherhood, in particular highlighting the centrality of ideas about 'the West' to the group's worldview. At the same time, the book offers fresh insight into the nature of Anglo-American foreign policy-making in the Middle East over the twentieth century.

- 41 The Politics of Ethnicity in India, Nepal and China/ Marine Carrin (ed.), Pralay Kanungo (ed.) and Gérard Toffin (ed.) -- Primus Books: New Delhi, 2014; vi, 343p. 52066

This work contains contributed articles presented at an international conference, organized by the Indian Council of Social Science Research, National Center for Scientific Research, France, and the French Foundation Maison des Sciences de l'Homme, Paris, held in New Delhi.

- 42 The Teesta on the Run: Development-Induced Displacement in Sikkim, 1975-2010 / Fernandes, Walter-- North-Eastern Social Research Centre | Salesian College: Guwahati, 2016; 352p. 52064

This study has examined the extent of land used for projects from 1975-2010 and the number of displaced persons. The Teesta on The Run is a contribution to the debate on the development and displacement that is linked to it. Most decision-makers view development only as economic or GDP growth and building infrastructure and consider displacement linked to it sad but inevitable. On the other side, those who want inclusive development hold that economic and social growth should go hand in hand and that one cannot be sacrificed for the other. The study on which this publication is based has examined the extent of land used for projects from 1975-2010 and the number of displaced persons. It has also evaluated the impact on those who pay the price of development planning in India. One is left with the impression that the GDP growth-based view prevails in development planning in India.

- 43 The Welfare State Revisited/ Jose, Antonio Ocampo (ed.) and Joseph, E. Stiglitzb (ed.)-- Columbia University Press: New York, 2010; xxiii, 384 p. 52080

The title 'The Welfare State Revisited', argues that, more than ever, there is a need for a strong welfare state. In particular, it is essential to face the strong

inequality trends that have been in place in large parts of the world since the last decades of the twentieth century. The book also argues that a twenty-first-century welfare state will have to be different from those of the nineteenth and twentieth centuries. It must be redesigned in a way that is consistent with a coherent vision of its role in the economic and social system today. And it must respond to the demands generated in many parts of the world by demographic changes, the changing role of the family, new features of labour markets, technological change, and the fiscal constraints created by tax competition in the globalized world. To do this, it must borrow from research in recent decades that has provided new insights into the roles that the welfare state has to perform and how to design a better, more efficient, and equitable system, research that is summarized by the authors in this volume. The volume is organized into two parts. The first analyzes the conceptual issues associated with the challenges outlined above. The second focuses on the experience of specific regions or countries. These experiences are those of the European Union, Scandinavia, the United States (also analyzed in several chapters in the first part), Latin America (the region of the developing world that has had the most significant advances in social protection in the early twenty-first century), and one of the most interesting initiatives put in place in the developing world in recent times, India's National Rural Employment Guarantee Act.

- 44 Transmitting Rights: International Organizations and The Diffusion of Human Rights Practices/ Greenhill, Brian-- Oxford University Press: New York, 2015; x,194p. 52096

The work constructed the structures that drive the global diffusion of human rights norms, Brian Greenhill argues that we need to look beyond institutions that are explicitly committed to human rights and instead focus on the dense web of international government organizations (IGOs)-some big, some small; some focused on human rights; some not-that has arisen in the last two generations. While most of these organizations have no direct connection to human rights issues, their participation in broader IGO networks has important implications for the human rights practices of their member states. Featuring a rigorous empirical analysis, Transmitting Rights shows that countries tend to adopt similar human rights practices to those of their IGO partners, whether for better or worse. Greenhill argues that IGOs constitute a tightly-woven fabric of ties between states and that this network provides an important channel through which states can influence the behaviour of others. Indeed, his analysis suggests that a policy of isolating "rogue" states is probably self-defeating given that this will reduce their exposure to some of the more positive IGO-based influences on their human rights. Greenhill's analysis of the role of IGOs in rights diffusion will not only increase our understanding of the international politics of human rights but will also reshape how we think about the role of international institutions in world politics.

- 45 Tribal Heritage: An Overlooked Chapter of Indian History/ Misra, Promode Kumar-- Aayu publications: New Delhi, 2018; xxvii, 333p. 52054

This book is a product of lifelong research in Anthropology by its author. It provides a critique of the concept of tribe and shows that there was never a distinct category of the tribe in India. The people now known as a tribe have always been, like others, part of the regional setup, of which forests have been

an integral part. In India, forests were not simply vast stretches of wilderness but also places for retreat, introspection, learning, and a storehouse of resources. People who lived close to nature supplied goods and services and were building blocks of the great cultural community of India. Tribes have values that are not only profound but also ultimate in sustainable development. They maintained their identity and thus contributed to the diversity of India, a key feature of its sustainability.

- 46 Video-Based Research in Education: Cross-Disciplinary Perspectives/ Lihua Xu (ed.), George Aranda (ed.), Wanty Widjaja (ed.) and David Clarke (ed.)-- Routledge: New York, 2019; xvii, 284p. 52084

This title addresses a range of philosophical and theoretical standpoints concerning video-based research and emphasizes the values and assumptions that researchers bring to their research. From an internationally renowned group of contributors, this text will significantly inform educational researchers interested in using video in research"--"Video-based Research in Education is a timely and significant collection exploring different uses of video in educational research, ranging from the use of video in investigating social interactions and stimulating participants' reflection, to engaging different social groups in the process of teaching, learning and research.

- 47 Water, Ecosystems, and Society: A Confluence of Disciplines/ Bandyopadhyay, Jayanta-- SAGE: New Delhi, 2009; xiv,191p. 52053

The much-needed paradigm change in the body of knowledge for managing water systems is articulated in this book. It talks about the ecological and socioeconomic aspects of water, whose incorporation in the management of sustainable and integrated water systems has become crucial all over the world. It is path-breaking in terms of its conceptualization since water management in India has traditionally been associated with the domain of engineering which tries to increase the quantity of water, to cater to the increasing needs of human settlements and demands from irrigation and industry. This work, however, conceives water management as an interdisciplinary subject that needs to be understood not in terms of engineering alone, but in terms of its economic, sociological, and, of course, ecological dimensions. Water, Ecosystems, and Society: A Confluence of Disciplines is an excellent guide to interdisciplinary knowledge on water. It draws attention to the ecological benefits of floods, the economic productivity of water systems, and the feasibility of the proposed river-link project in India. It focuses on the need to recognize ecosystem services provided by rivers as well as the necessity of environmental flows in such a system. The book deals with emerging areas of research, by connecting ecology, economics, and water management. It will be a compelling read for academicians and students working in the fields of geography and environment science, development economics, environmental sociology, ecology, integrated water management, and so on.

- 48 When India Votes: The Dynamics of Successful Election Campaigning/ Jethwaney, Jaishri, and Kapur, Samir-- Rupa Publication India Pvt Ltd: New Delhi, 2019; 208p. 52063

This book is a study on elections it shows how Elections have always been festive occasions in liberal democracies, and India is no exception. Media becomes one of the most important players in elections because of its power of reach and agenda-setting. From one government-controlled television in India in 1984, to hundreds of news channels owned by various interest groups, a burgeoning print media, the coming of social media and the tiniest and most 'lethal' of mass-reach weapons, the mobile phone—all these have changed the way elections are now contested! The power of mass contact through rallies and public gatherings, reinforced by event-driven media channels and the power of digital media to reach out to the young audience, has redefined electioneering in India. When India Votes looks at the theoretical underpinnings of the relationship between democracy, mass media, and election campaigning, as well as representative campaigns of the last three decades of the two major players, viz. the Congress and BJP.

- 49 Women Heroes and Dalit Assertion in North India: Culture, Identity, and Politics/ Narayan, Badri -- SAGE Publications: New Delhi, 2006; 186p. 52058

The title explores cultural repression in India and how it is overcome. It studies the burgeoning Dalit politics in North India and shows how Dalit women heroes (viranganas) of the 1857 Rebellion have emerged as symbols of Dalit assertion in Uttar Pradesh and are being used by the Bahujan Samaj Party (BSP) to build the image of its leader, Mayawati. It demonstrates how myths and memories of the role of Dalits in India's freedom struggle are employed for constructing identity and reconstructed for political mobilization.
