New Arrivals: List of New Additions with Summaries
Compiled & edited by NASSDOC Team,
National Social Science Documentation Centre, 36p.
(NASSDOC Research Information Series: 1)
October, 2024

Foreword

The current issue of “New Arrivals: List of New Additions with Summaries” contains a list of New Books that were processed in the month of October, 2024 and are available for use in the National Social Science Documentation Centre of ICSSR. In the main text, entries are arranged by the title in alphabetical order, followed by bibliographical details and a summary of the document. For easy retrieval, the Author and Keyword Index are also given at the end where the number in front of the Author or Keyword denotes the serial number of the entry in the main list of New Arrivals. Interested readers can consult the listed titles by visiting the library.

Suggestions are always welcome.

Dr. S.N.Chari
Deputy Director

S.No.	Title and Other Details	Acc. No/Cover Pic.
1.	A Burning/ Majumdar, Megha- Penguin Hamish Hamilton, New York, 2020; 293p.	53902
	<p>A girl walks through the slums of Kolkata holding an armful of books. She returns home smelling of smoke, and checks her most prized possession: a brand-new smartphone, purchased in instalments. On Facebook, there is only one conversation. #KolabaganTrainAttack On the small, glowing screen, she types a dangerous thing... 'If the police didn't help ordinary people like you and me, if the police watched them die, doesn't that mean that the government is also a terrorist?' Set in contemporary India, A Burning is the story of three unforgettable characters, all dreaming of a better future, whose lives are changed for ever when they become caught up in the devastating aftermath of a terrorist attack. Jivan - a poor, young, Muslim girl, who dreams of going to college - faces a possible death sentence after being accused of collaborating with the terrorists. Lovely - an exuberant hijra who longs to be a Bollywood star - holds the alibi that can set Jivan free, but telling the truth will cost her everything she holds dear. PT Sir - an opportunistic gym teacher who once taught Jivan - becomes involved with Hindu nationalist politics and his own ascent is soon inextricably linked to Jivan's fall.</p>	
2.	Aatma Nirbhar Bharat (Self-reliant India): Challenges and Opportunities/ Bhutani, Rajeev- Pentagon Press LLP, New Delhi, 2020; xvi, 198p.	53908
	<p>Emerging from Wuhan, China in December 2019, the Novel Coronavirus spread like wildfire and engulfed the whole world within three months resulting into the COVID-19 pandemic. While the world leaders are still struggling to control the pandemic as also to rejuvenate their drowning economies, China made aggressive moves in the Indo-Pacific both in sea and on land. With coronavirus positive cases having crossed 4.5 million and its economy likely to contract by 5 percent in the current year, India is facing a belligerent China that has shattered the 45-year long peace in Galwan Valley, Eastern Ladakh, on June 15, 2020. In this time of geopolitical uncertainty, India is facing complex challenges as never before: internally, to control the spread of pandemic as also revive the economy; and externally to defend her territorial integrity on land and sea both. India would like China to restore status quo ante on the Line of Actual Control at the earliest. At the same time, India must defeat coronavirus and establish herself as a key figure in the global supply chain.</p>	
3.	Artificial Intelligence and National Security/ Khare, Vijay S.- Pentagon Press LLP, New Delhi, 2024; xxiii, 141p.	53909
	<p>The book is a collaborative endeavour of an esteemed academician and a dedicated uniformed soldier, shedding light on India's current position in the dynamic landscape of artificial intelligence (AI). It delves into the heart of the global 'AI Summer,' a transformative phenomenon reshaping industries across the globe. It meticulously chronicles the progress made in AI in India over the past five years, emphasizing the pivotal role played by the Government think-tank, the NITI Aayog, in setting the tone for AI initiatives within the country. Furthermore, it examines the collective efforts of government bodies, industry players, academic institutions, and defence organizations in harnessing AI's potential to fortify national security. One of the book's distinctive features is its</p>	

comparative analysis of India's AI progress with that of the P-5 nations, including the USA and China, who are currently engaged in fierce competition for AI dominance. In just half a decade since its initial steps into the AI arena, India has managed to ascend to the ranks of the top 50 nations, a remarkable achievement that underscores its growing prominence in the AI landscape. Backed by a wealth of meticulously researched facts and figures, this book provides readers with invaluable insights into how India is leveraging this disruptive technology to significantly impact military operations and bolster national security. In an era marked by the emergence of the Fifth Generation of Warfare (5GW), and another change in the character of conflict, this book explores AI's role as a game-changer in safeguarding the nation. "Artificial Intelligence and National Security" is an indispensable read for think tanks, strategists, and policymakers. It not only addresses the potential benefits of AI for national security but also confronts the ethical concerns surrounding its use.

4. Changing Character of Hybrid War: The Threat to India/ Basu, Shubhankar- Pentagon Press LLP, New Delhi, 2020; xx, 183p.

53910

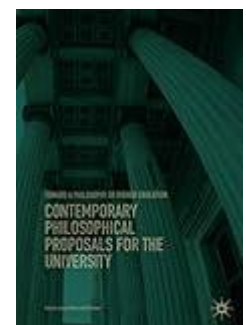

India's security dilemmas are complex, with two hostile powers on its frontiers and a large number of internal fault lines which are vulnerable and have been exploited by the adversaries in the past. The Indian Army Doctrine of 2018 defines 'the collusive external threat from adversaries as well as the internal instability due to state/non-state sponsored proxy war' as the primary security challenge to India. It further amplifies the changing character of war as 'wars will be hybrid in nature, a blend of conventional and unconventional, with focus increasingly shifting to multi domain warfare varying from non-contact to contact warfare'. In a nutshell therefore hybrid war is among the primary areas of focus for the Indian military today. 'Changing Character of Hybrid War: The Threat to India' examines the transformation in hybrid warfare and analyses its threat to India. It begins with an analysis of the doctrine adopted by the US, Russia, China, UK & NATO in dealing with this threat. Thereafter it illuminates the emerging characteristics of hybrid war by exploring certain case studies from major contemporary conflicts. India's primary challenge in this area is of a collusive hybrid war from Pakistan and China. Accordingly, the book analyses the strategic culture of Pakistan Army and transformation of the People's Liberation Army (PLA) to ascertain their views on hybrid warfare.

5. Contemporary Philosophical Proposals for the University: Toward a Philosophy of Higher Education/ Kramer, Eli (ed.) ; Stoller, Aaron (ed.)- Palgrave Macmillan, Switzerland, 2019; xxi, 268p.

53636

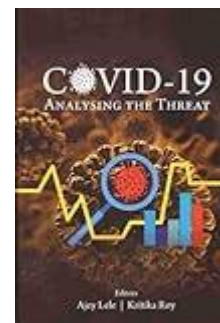

This edited collection brings together a robust range of philosophers who offer theoretically and critically informed proposals regarding the aims, policies, and structures of the university. The collection fills a major gap in the landscape of higher education theory and practice while concurrently reviving a long and often forgotten discourse within the discipline of philosophy. It includes philosophers from across the globe representing disparate philosophical schools, as well as various career stages, statuses, and standpoints within the university. There is also a diversity in method, approach and style, which varies from personal narratives and case studies, to philosophical genealogies, to traditional philosophical essays, and to systematic theories. The collection can serve as a theoretical resource for critically minded administrators and faculty who wish to analyze and change policies and structures at their home institutions. It will

introduce them to a wide range of possible educational imaginaries, as well as provide them with productive suggestions for pragmatic change on campuses

6. Covid-19: Analysing the Threat/ Lele, Ajey (ed.) ; Roy, Kritika (ed.)- Pentagon Press, New Delhi, 2021; xxvii, 426p. 53912

The current pandemic has caused a cataclysmic disruption in the 'daily routine' across the nations and sectors. The damage this crisis has brought to lives and economies is unimaginable. This pandemic is a wake-up call to bring about systematic and structural changes to deal with such unanticipated menaces that can bring the world to a sudden halt. This book attempts to contextualize and examine the nature of the ongoing pandemic. The experts who have contributed to the book analyze key geopolitical and technological aspects of the COVID-19 crisis. Besides, the book presents views from a few important States concerning their role in combating the ongoing crisis. The book also explores the issues of biosecurity and bioethics.

7. CSR Corporate Governance and Workplace Practices: A New Perspective/ Hazarika, Anjana- Pentagon Press, New Delhi, 2020; x, 227p. 53911

Corporate Social Responsibility (CSR), corporate governance and workplace practices are intimately connected. They are indeed three distinct pillars of any successful business venture. This work strongly argues that without fulfilling the social responsibilities, economic and legal obligations of a business organization simply becomes infructuous. The best course of action for business is to first serve its stakeholders, mainly its employees. Hence, the overarching theme that revolves round the book is that employee engagement and their welfare are the keys to ascertain democratic practices at workplace. And once it is ensured, this would help an enterprise to fulfilling and encompassing four aspects of CSR i.e. economic, legal, ethical and discretionary or philanthropic.

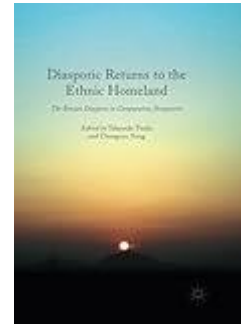

8. Dalits in the New Millennium/ Pai, Sudha (ed.) ; Babu, D. Shyam (ed.)- Cambridge University Press, London, 2023; xv, 483p. 53933

Dalits in the New Millennium interrogates the major aspects of Dalit experience in multiple spheres and traces how Dalit politics is no longer merely content with desire for social justice but has become more assertive and aspirational in its demands. The volume represents the individual voices of the editors and contributors, who are eminent academics and activists, and situates Dalit life amidst all the major changes that have occurred over the last three decades. It aims to provide a more holistic approach to studying the community's socio-economic and political life in the new millennium and adds to the existing literature on Dalit politics, focusing especially on the changes that are taking place in the realm of electoral politics, popular culture, political economy, ideological worldview, and representation, among others.

9. Diasporic Returns to the Ethnic Homeland: The Korean Diaspora in Comparative Perspective/ Tsuda, Takeyuki (ed.) ; Song, Changzoo (ed.)- Palgrave Macmillan, Switzerland, 2018; xiii, 258p. 53632

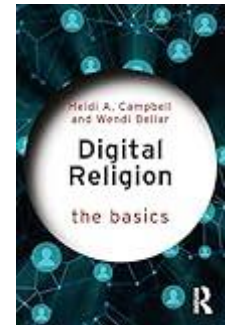

This book examines Korean cases of return migrations and diasporic engagement policy. The study concentrates on the effects of this migration on citizens who have returned to their ancestral homeland for the first time and examines how these experiences vary based on nationality, social class, and generational status. The project's primary audience includes academics and policy makers with an interest in regional politics, migration, diaspora, citizenship, and Korean studies.

53942

10. Digital Religion: The Basics/ Campbell, Heidi A.- Routledge, London, 2022; 172p.

Digital Religion: The Basics explores how digital media and internet platforms are transforming religious practice in a digital age and the impact this has had on religious culture in contemporary society. Through exploring six defining characteristics of how religion is acted out online, including-multisite reality, convergence practice, networked community, storied identity, shifting authority and experiential authenticity, the book considers how digital religion both shapes, and is influenced by, religion offline. Questions asked include: How is religion being performed and reimagined through digital media and cultures? In what ways do the practices of religion online merge or correspond with shifts in perspective taking place in offline religious practice? How do the key findings of religion online reflect broader social, cultural and structural practices observed within mobile, networked society? With case studies and further readings, Digital Religion: The Basics is a must-read for students wanting to come to grips with how religion is changing and experienced through digital media.

11. Digitalisation and Development: Issues for India and Beyond/ Maiti, Dibyendu (ed.) ; Castellacci, Fulvio (ed.)- Springer, Singapore, 2020; xv, 436p.

53633

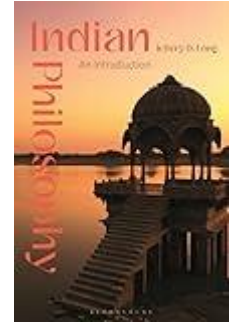

Information and communication technologies (ICTs) provide new opportunities and new challenges for developing economies. ICT adoption, digitalization and automation provide formidable new opportunities in terms of increased efficiency and productivity, the creation of new services and occupations and increased connectivity among agents. However, the extent to which developing economies are able to reap these potential benefits is contingent on a set of other social, economic and institutional dimensions. While economic growth and rising productivity are the major expected outcomes of digitalization, digital divides and related forms of exclusion and inequalities are commonly observed too. India, one of the largest economies in the world, with a remarkable pace of ICT diffusion, represents a relevant case to investigate the impacts of digitalization on economic development. The present book collects a series of novel contributions on this theme, studying the Indian experience in an international cross-country perspective. This introductory chapter presents background information on the Indian case, introduces the main themes on the relationships between ICTs, socio-economic development and digital divides and provides a summary and road map to the chapters included in the book. On the whole, the main message of this book is that the impact of ICTs is contingent upon other assets, capabilities and institutional conditions. National policies should therefore not only promote digitalization as such but also ensure its co-evolution and complementarity with a variety of other country-specific factors.

12. Discovering Indian Philosophy: An Introduction to Hindu, Jain, and Buddhist Thought/ Long, Jeffery D- Bloomsbury, Delhi, 2024; xi, 248p.

53943

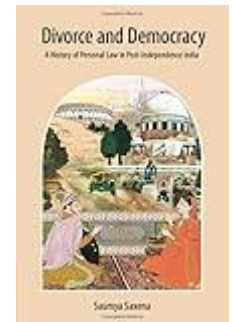

With a history dating back at least 3000 years, the philosophical tradition of India is one of the oldest to continue to thrive today. Encompassing a wide variety of worldviews, Indian philosophy includes perspectives that have ongoing relevance to contemporary issues such as the nature of consciousness, the relationship between philosophy and the good life, the existence of a divine reality, and the meaning of happiness. Contrary to widespread stereotypes, Indian philosophy is not simply an extension of Indian religion. Scepticism is a pervasive feature of this discourse, and there is even a school of thought which affirms materialism. The idea of a divine reality is debated extensively, not only in terms of the existence of such a reality-"Is there a God?"-but also in terms of its nature-"What is God?" This book, drawing upon some of the latest research in the field, traces the history of the Indian philosophical tradition from ancient times to the present, outlining the views and major thinkers of such schools of thought as Vedanta, Jainism, Buddhism, and many more. Jeffery D. Long treats each system, however, not simply as an historical artifact, but as a living reality with important insights to offer our world today. It is essential reading for anyone interested in world philosophies and how they address the 'big questions' that have always engaged human beings.

13. Divorce and Democracy: A History of Personal Law in Post-independence India/ Saxena, Saumya- Cambridge University Press, Delhi, 2022; xvi, 350p.

53944

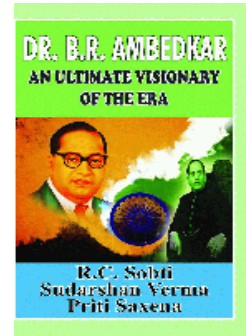

This book demonstrates that family law, arguably the most visible sphere of such contestation, emerged as a particularly hospitable arena for conversations between religious and legal regimes, to institute the normative framework that could govern the domestic lives of citizens. The work illustrates how the codification of religious personal laws permitted the Indian state to enter into an intimate dialogue with citizens, largely mediated through religion. Thus, through this process, the state also secured monopoly over determining what constituted religion, as well as the right to determine the validity and scope of religious practices. This book therefore suggests that religious personal law played a key role in determining the legal place for religion in India's secular democracy. The controversy on the issue of personal law has contributed to a unique evolution of both the rule of law and the doctrine of secularism in twentieth century India. By tracing the response of legislature, the courts, and civil society movements to the question of cultural rights and notions of abstract citizenship, this book exhibits how the translation of marriage and divorce laws of Hindu, Muslim, and Christian communities into statutes introduced new questions on the tenuous links between the law and the sacred, as well as on the problematic rhetoric of the reformative potential of law

14. Dr. B.r. Ambedkar: An Ultimate Visionary of the Era/ Sobti, R.C.- Narendra publishing house, Delhi, 2016; xii, 279 p.

53945

This book explores Dr. Ambedkar's multifaceted contributions as a social reformer, political leader, and advocate for marginalized communities. The book highlights his visionary approach to social democracy, justice, and constitutional theory while emphasizing his commitment to education, scientific temper, and industrialization as tools for societal progress. It also discusses his perspectives on Dalit empowerment, employment, and environmental issues, showcasing his lasting influence on India's socio-political landscape. Through a scholarly lens, the book presents Ambedkar's ideas as timeless solutions for contemporary challenges.

15. Environmental Change, Livelihood Issues and Migration: Sundarban Biosphere Reserve, India/ Mistri, Avijit- Springer, Singapore, 2020; 192p.

53634

This book deals with the out-migration from the UNESCO designated Sundarban Biosphere Reserve in India. It focuses on the question whether out-migration is a consequence of environmental change or livelihood issues and development deficit. It investigates the processes of migration from a broad spectrum, exploring a wide range of economic, social, and demographic factors along with environmental stressors. The processes of migration studied and empirically illustrated include migration stream, migration pattern, reasons for migration, the nexus between migration and social network, aspiration and different human, economic and physical capital. The book adopts a modelistic approach called the Sustainable Livelihood Approach (SLA) to investigate whether migration from Sundarban is an environmental migration or not. In addition it uses the risk perception approach of people's cognition or 'affective imagery' to examine the degree of perceived environmental risk in the means of living, especially farming and fishing, of the islanders of Sundarban.

16. Evolving Security Dynamics in West Asia and India's Challenges/ Trigunayat, Anil (ed.)- Pentagon Press, New Delhi, 2022; xx, 280p.

53913

West Asia continues to churn festered by several hot spots including Libya, Syria, Yemen, and Iraq as Arab Spring 2.0 straddles the region forcing socio-economic reforms. The Middle East Process remains defunct as the Israel-Palestine conflict remains at the brink. The region also continues to suffer from the geopolitical, geo-economic, and geo-religious contestations among major powers like Saudi Arabia, the UAE, Turkey, Egypt, and Iran. Qatar has emerged as new `Go To` country. Due to perceived nonchalance and withdrawal of the USA, which was its sole security guarantor, the regional majors have begun to look for some modus vivendi among themselves as they enhance their engagements with China and Russia, and to a great extent, even India. Rapprochement between Israel and some Arab countries like the UAE and Bahrain and Sudan and Morocco have paved the way for new power equations as India, Israel, the UAE, and the USA become engaged in a new Economic Quartet. The winds of change are visible as the Russia-Ukraine crisis casts a new shadow on the regional dynamic. The quest for strategic autonomy is distinctly on the horizon. Over a dozen distinguished authors and regional experts have delved deep into the evolving security scenario in this compendium. This is a book that clinically examines critical security issues in West Asia, offers insights and affords solutions and some policy choices for India in a dispassionate manner. A must-read for policy makers, students researchers and even experts.

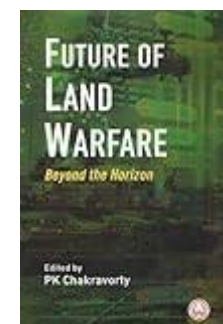

17. Foundation of Education School & Society/ Khamari, Jubraj- Narendra Publishing House, Delhi, 2021; xi, 440p. 53946

It explores the historical, philosophical, and sociological aspects of education and its impact on society. It examines how key figures like John Dewey and Horace Mann shaped modern schooling and how different educational philosophies—Perennialism, Essentialism, Progressivism, and Social Reconstructionism—influence teaching and learning. The book also highlights the role of schools in socialization, cultural integration, and addressing inequality, emphasizing education as a powerful force for both individual growth and societal change.

18. Future of Land Warfare: Beyond the Horizon/ Chakravorty, P. K (ed.)- Pentagon Press, New Delhi, 2020; xix, 272p. 53914

The book deals with the future of land warfare on the Indian subcontinent. To predict the future is extremely difficult particularly in the field of Warfare. This is due to the fact that wars are impacted by doctrine, technology and people. Also, the introduction of nuclear weapons has made war less frequent and reduced the duration. There are trends which keep changing with the passage of time. Conflicts in the 21st century are short and swift with a combination of effects. Further aspirations of leaders often point towards different military objectives. In such a scenario we could plan at best for a decade and maybe visualise for about 15 years. By and large wars of the future will be conventional, hybrid and would be interstate or with non-state actors. The causes could be territorial or related to historical differences, ideological biases, economic disparity, security and water distribution. Further issues could exacerbate due to impact of climate change, higher rate of population growth of minorities and sectarian or ethnic extremism. The future wars are likely to follow three types. It could be overt, covert and finally outsourced. The future battle space as visualised in the next 15 years would have characteristics which would make it non linear in time and space. Unlike wars of the past they would be swift and would be based on speed. Targets would need to be precisely engaged to avoid collateral damage. Operations would demand jointness between the three services. Further they would be continuous with no pauses. They could be termed as 24x7 operations. In these operations connectivity would play an important part and communications would be available to soldiers, commanders and autonomous weapon systems and vehicles. There would be a need for synergy between air, sea, and outer space while undertaking land warfare. Perception management becomes extremely important as this alone would lead to an effective reorganization of people. Finally technology would play an important role particularly, the application of artificial intelligence.

19. G20@2023: The Roadmap to Indian Presidency/ Srinivas, V.- Pentagon Press LLP, New Delhi, 2023; xix, 290p. 53906

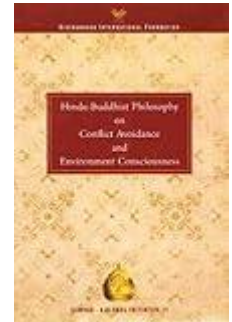

The Roadmap to Indian Presidency, traces the rise of the G20, in battling financial crisis— the Global Financial Crisis of 2008-09, the Eurozone Crisis of 2010, and the COVID-19 pandemic of 2019 and in formulating an agenda for strong, sustainable and balanced growth. V.Srinivas documents the complex functioning of the G20 and its collaboration with important multilateral institutions- International Monetary Fund, World Bank, World Trade Organization, World Health Organization, Financial Stability Board, OECD, UNFCC and non-governmental/ civil society Engagement Groups

53915

20. Hindu-buddhist Philosophy on Conflict Avoidance and Environment Consciousness: Samvad-a Global Initiative (I)/ Vivekananda International Foundation (New Delhi, India) - Wisdom Tree, New Delhi, 2017; vii, 192p.

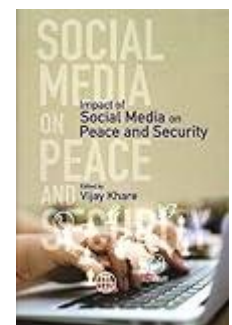

Driven by the myopia of profits and an ego that craves superiority over fellow brethren, man is leading a life of wanton devastation, and going through what is perhaps the most violent time in history. At stake is not just our own lives and values, but the environment that sustains us, and by extension therefore, the very future of our planet. Is this a one-way street? Or is there still scope for salvation? Can we redefine ethics to suit the broader common vision of all mankind? Can we rise above religious differences to create a common, working philosophy that works for both us, and our planet? If the tenets and essence of Hinduism and Buddhism are anything to go by, the answer is a resounding yes. Adaptation of a non-conflicting paradigm led by the Hindu-Buddhist values-whose adherents account for more than one-fifth of the world's population and cognates cultures such as in India and Japan-can be used effectively to shift the focus from 'conflict resolution' to 'conflict avoidance' and the path of 'ideology' to 'philosophy'. It is with this aspiration and conviction that the VIF, New Delhi, Sitagu International Buddhist Academy, Yangon and Myanmar Institute of Strategic Studies in association with Japan Foundation organised Samvad II a Global initiative on Conflict Avoidance and Environment Consciousness: a Dialogue for Peace, Harmony and Security, at Yangon, Myanmar in 2017. This book, based on the conference attempts to answer one simple question: Can we offer a new model and vision for a world order based on democratic tradition that espouses the spirit of human cooperation, ethical behaviour, universal responsibility and prosperity of all nations? If we put our best foot forward, the answer could be yes. The alternative is not an alternative.

21. Impact of Social Media on Peace and Security/ Khare, Vijay S (Ed.)- Pentagon Press, New Delhi, 2022; xix, 188p.

53916

The book is a result of an International Conference on Impact of Social Media on Peace and Security organised by the Department of Defence and Strategic Studies (DDSS), Yashwantrao Chavan National Centre of International Security and Defence Analysis (YC-NISDA), And Department of Ambedkar Studies, Savitribai Phule Pune University in collaboration with Indo-European Education Foundation (Poland), University of Applied Science, Nysa, (Poland), University of Galati (Romania) and Strategic Culture and Security Foundation, (Pune) on 7-8 March, 2019.

22. Improving Accessible Digital Practices in Higher Education: Challenges and New Practices for Inclusion/ Seale, Jane (ed.)- Palgrave Pivot, Switzerland, 2021; 180p.

53637

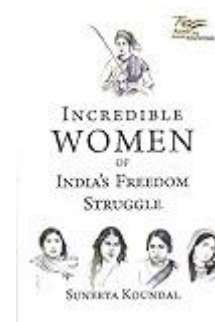

This book examines the role played by technologies in removing the disadvantage experienced by students with disabilities in higher education. Addressing five key themes, the editor and contributors explore the practices required of stakeholders within higher education institutions to mediate successful and supportive relationships between disabled learners and their technologies. Ultimately, the book argues that practice in the fields of disability, ICT and higher education is still not providing consistent and widespread positive learning experiences to students with disabilities. In order to address this situation, the field needs to creatively integrate knowledge gained through both research and practice, and to re-imagine what is needed for ICT to meaningfully contribute to a reduction in disadvantage for disabled students. This book will be of interest and value to scholars of disability studies, education and accessibility, and educational technologies

23. Incredible Women of India's Freedom Struggle/ Koundal, Suneeta- Pentagon Press, New Delhi, 2023; xvi, 216p.

53917

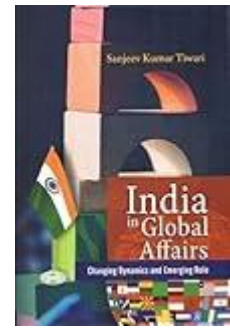

Azadi Ka Amrit Mahotsav initiative is taken by the Government of India to celebrate 75 glorious years of India's independence. This initiative continues the vision of making today's generation aware of freedom fighters' life, struggles, and sacrifices, the price they had to pay for India's independence. Incredible Women of India's Freedom Struggle rediscovered the little-known contributions of female freedom fighters who fought fiercely against British imperialism, whose bravery, sacrifice, and resolve continue to inspire and instil pride in Indians. It narrates the history of ardent revolutionaries who did not fear imprisonment or death on the battlefield. Despite this, female freedom fighters received less recognition and are less celebrated in the pages of history, therefore, this work is a tribute to the women freedom fighters who kindled the flame of patriotism and marched shoulder to shoulder with men as part of the freedom struggle movement. Incredible Women of India's Freedom Struggle captures captivating and touching stories of remarkable women who deserve equal respect and recognition. The objective of this book is to empower our younger generations to change their world for the better. They are inspirations for everyone to overcome hardships. Each title of the story and the learning at the end will definitely build self-confidence and motivation to live a life of values, instincts, and out-of-the-box thinking and to remember that we have been born for a cause. It is a must-read book for every Indian.

24. India in Global Affairs: Changing Dynamics and Emerging Role/ Tiwari, Sanjeev Kumar (Ed.)- Pentagon Press, New Delhi, 2020; xx, 251p.

53918

The dawn of the current regime in 2014 has witnessed the ushering of a new era of Indian stronghold in global affairs. The fundamental changes in the global affairs are affecting India's domestic and international politics. The attitude of Indian dispensation therefore has been geared towards meeting these challenges; the conventional approach to understanding India's foreign policy has strategically been replaced by reasoning and sine qua non. In the current scenario, India is shifting gears by not only emerging as a global power in terms of economy, defence and clout but also by influencing and shaping the different dimensions of global agendas as per its prerequisites and national interests. In this light, *India in Global Affairs: Changing Dynamics and Emerging Role* discusses the evolution, continuation and the paradigm shifts that have taken shape in the global affairs with relation to India and establishes the fact that increasing influence of India in the global affairs is now bringing India to the forefront where India's diverse, plural democracy stands out and sets an example for rest of the world to emulate.

25. *India's Foreign Policy Modi 2.0: Challenges and Opportunities/ Singh, Sudhir (Ed.)- Pentagon Press, New Delhi, 2020; xxviii, 392p.*

53919

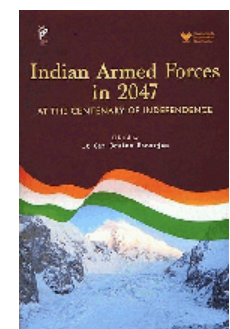

Indo-Pacific has become the pivot of the global politics and the salience of the region is bound to increase in the foreseeable future. India's profile has rapidly grown since the end of Cold War and now India is being considered an important country in shaping the power equilibrium within the Indo-Pacific in particular and at the global level in general. The security architecture has remained turbulent in the region and in this prevailing scenario India has the golden opportunity to maximize its national interests. The phenomenal rise of China in the region and its diverging interests with India and many other important countries within the region have further complicated the security situation. India had a coalition government from 1989 till 2014. The 2014 General elections gave a thumping majority to Modi-led BJP. This government has performed excellently on the foreign policy front in its first tenure and has contributed as a motivating factor in the return of Modi government with a bigger majority in May 2019. At this juncture, India needs to reformulate its policies to cope up with the emerging situation. PM Modi is considered a strong leader and has adopted a pro-active foreign policy. But now, India has to reformulate its foreign policy in a structural manner to cope up with changing global power structure. It offers both challenges and opportunities to the Narendra Modi-led NDA-3 government.

26. *Indian Armed Forces in 2047: Centenary of Independence/ Banerjee, Gautam (ed.)- Pentagon Press, New Delhi, 2023; xvii, 324p.*

53920

The 75th Year of Independence is a milestone in India's march towards a sovereign dispensation characterised by freedom, peace, and prosperity. In that endeavour, the preservation of territorial sanctity, economic sovereignty and political relevance in a competitive intra- and inter-regional dispensation are major challenges. India's geographic situation between two compulsively revisionist, aggressive and militarist neighbours adds to the rigours of such challenges. Wisdom states that as a rising India proceeds to secure her aspirations of peace and prosperity, it would be mandatory to sustain the journey with the possession of robust and military prowess. The purpose of this Vivekananda International Foundation publication is to visualise, candidly, for

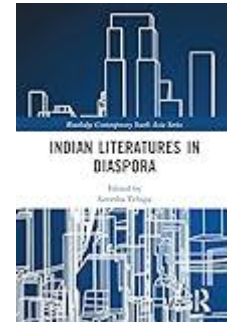

readers, a futuristic construct of India's military prowess that is sustainable within the nation's affordable defence economics.

27. Indian Literatures in Diaspora/ Sireesha, Telugu (ed.)- Routledge, New York, 2022; xi, 166p.

53934

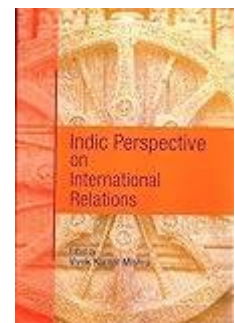

This book analyses diasporic literatures written in Indian languages written by authors living outside their homeland and contextualizes the understanding of migration and migrant identities. Examining diasporic literature produced in Bengali, Hindi, Malayalam, Indian Nepali, Odia, Punjabi, Marathi, and Tamil, the book argues that writers in the diaspora who choose to write in their vernacular languages attempt to retain their native language, for they believe that the loss of the language would lead to the loss of their culture. The author answers seminal questions including: How are these writers different from mainstream Indian writers who write in English? Themes and issues that could be compared to or contrasted with the diasporic literatures written in English are also explored. The book offers a significant examination of the nature and dynamics of the multilingual Indian society and culture, and its global readership. It is the first book on Indian diasporic literature in Indian and transnational languages, and a pioneering contribution to the field. The book will be of interest to academics in the field of South Asian Studies, South Asian literature, Asian literature, diaspora and literary studies.

28. Indic Perspective on International Relations/ Mishra, Vivek Kumar (ed.)- Pentagon Press, New Delhi, 2023; xxvi, 277p.

53921

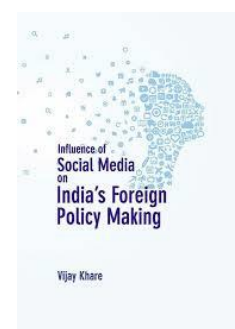

Indic perspective on International Relations addresses this gap by analysing the disciplinary crisis and advancing the Indic narrative as a viable non-western alternative. Besides, this edited volume also covers different aspects of India's foreign policy, Indian strategic culture, and key bilateral and multilateral relations. Written by well-known scholars from an interdisciplinary perspective, this forward-looking work opens up the possibilities of rethinking International Relations from the Indic perspective.

29. Influence of Social Media on India's Foreign Policy Making/ Khare, Vijay S.- Pentagon Press, New Delhi, 2022; xxii, 305p.

53922

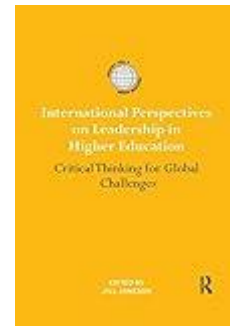

This book focuses on the influence of social media on India's foreign policy-making, demonstrating that the role of social media is not only as an information provider, but also as a platform of interaction between the government and public. The title presents the pros and cons of social media which directly and indirectly effects on the foreign policy of the country, and explores the idea that social media could be more persuasive than the any other media in influencing the people. It comparatively analyses social media usage in 5 countries: the US, China, France, Russia, the United Kingdom and India. A must-read book for scholars, political analysts, governmental officials, strategic think tank and especially foreign policymakers across the globe.

30. International Perspectives on Leadership in Higher Education: Critical Thinking for Global Challenges/ Jameson, Jill (ed.)- Routledge, Newyork, 2020; 195p.

53638

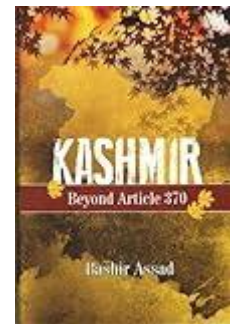

The extent to which critical thinking on global challenges is employed by higher education leaders, The potential for an increase in the role of critical thinking in leadership, The creative potential for critical leadership thinking to transform institutions and communities, The essential attributes of critical thinking, namely cognitive, affective and social dimensions, and The possibility for critical thinking to contribute to the global public common good by encouraging enhanced research, teaching and public service excellence. Responding to the ever-increasing demands of the higher education climate, International Perspectives on Leadership in Higher Education is a vital resource for anyone occupying leadership positions in higher education institutions and any researchers or students looking to explore the landscape of critical thinking.

31. Kashmir: Beyond Article 370/ Assad, Bashir- Pentagon Press, New Delhi, 2020; xvi, 194p.

53923

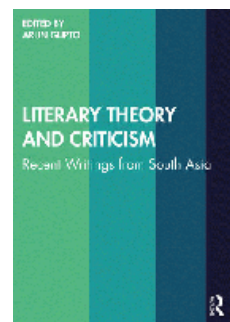

Provocative, insightful and passionately argued, Kashmir: Beyond Article 370 brings a unique perspective to an increasingly polarized debate on the dilution of Article 370 and 35A of the Indian Constitution and subsequent bifurcation of the erstwhile state of Jammu and Kashmir into two Union Territories. On one hand, the book raises some interesting but out of sight issues that moulded public opinion in favour of the scrapping of the special status of Jammu and Kashmir. On the other hand, it accurately highlights the anti-India provocations leading to the unprecedented August 5 decision by the Indian Parliament. The book reveals how the government of India was prompted to do away with the special status of Jammu and Kashmir and how the people in Kashmir responded to the situation that emerged in the wake of the Indian Parliament's August 5 decision. The book provides a fascinating account of the events that actually added to the ideological commitment of the BJP government in revoking the special status of Jammu and Kashmir.

32. Literary Theory and Criticism: Recent Writings From South Asia/ Gupto, Arun (ed.)- Taylor & Francis Ltd, UK, 2021; xix, 256p.

53935

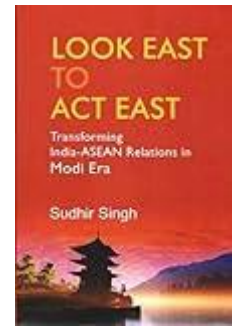

Thinking of the usefulness and the great popularity of the first eight editions of the book, Twentieth Century Literary Criticism and considering the valuable suggestions received from several quarters, the current ninth edition has been revised and enlarged by adding six new chapters on recent development in literary criticism across the globe. The book now contains 70 chapters in all, organized into four parts. Six new chapters in Part IV are on post-humanities, Cyborgs, Resistance to Theory, Imitation and Gender Insubordination, Texts and Lumps, and Intercriticality (a term coined by the author). The theories and the texts have been explained with clarity and precision in a simple language and lucid style. This is an invaluable reference book for anyone interested in the field of literary criticism in the twentieth century and beyond.

33. Look East to Act East Transforming India-asean Relations in Modi Era: Transforming India-asean Relations in Modi Era/ Singh, Sudhir Kumar (ed.)- Pentagon Press, New Delhi, 2020; xviii, 326p.

53924

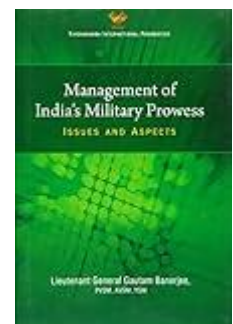

Act East Policy launched in 2014 has been one of the signature foreign policy approaches of Modi-1 government and is a proactive foreign policy initiative. The movement from Look East to Act East was necessitated by the changing contours of security architecture in the larger context of the Indo-Pacific region. Act East Policy has further expanded the geography within its imprint; Myanmar to Australia comes under its domain. ASEAN and East Asian countries expect India to play a counter-balancing role within the region. Under Modi government, India has taken a principled stand on disputes like South and East China Seas stating that all disputing parties must adhere to international laws. This policy provides a broad canvass for issues ranging from economy, culture to strategy. The re-election of Modi with a larger majority in May 2019 is bound to consolidate the Act East Policy. India has developed convergences with many important countries of the region under the ambit of this policy and it is bound to pay more dividends in the foreseeable future for India's national interests.

34. Management of India's Military Prowess: Issues and Aspects/ Banerjee, Gautam- Pentagon press, New Delhi, 2020; xi, 253p.

53925

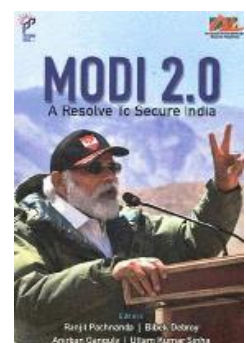

Conceptualizing the foundations of national defence and organizing a conformingly robust military structure is a humungous task of extremely complexities. Even nations who possess pristine strategic vision and deep rooted military culture find it practically impossible to home on to the right equation between their political goals, military power and optimal resource allocation. The reason lies in the fact that no matter what mock drills one puts up, outcome of military campaigns often remain uncertain and unpredictable, and independent of the forces fielded to secure victory. There can be no right formulae, no right examples and no practice round to hone one's concepts and practices before the final, bloody and destructive showdown. Irreversibility of war further makes it a nightmare for military planners to guarantee success. At the best they can apply their professional insight to anticipate adverse situations, notionally replicate these and then harness tactical acumen to find possibly the most effective courses of actions to deal with the circumstances. It is here that the salience of various issues discussed in this book come into contention. The book does not offer formulae for the achievement of military success. Rather it offers an insight into the ingredients and processes that enable military planners to conceive the best possible force composition to win wars.

35. Modi 2.0: A Resolve to Secure India/ Pachnanda, Ranjit (ed.) ; Debroy, Bibek (ed.)- Pentagon Press, New Delhi, 2022; xvi, 196p.

53926

Safety and security lie at the heart of the prosperity of a nation. Real security is not only based on growth, reform and change or, what can be described as all-round development of the nation, but also enhanced focus on the borders given the escalation of tension. While trust and collaboration are central to a systematic approach to security, it is cohesively strung on three core objectives: effective diplomacy and military capabilities; bolstering economic prosperity; and providing governance and promoting democratic values. They present formidable challenges and are not easy to achieve, but under Modi's 'thinking thoroughly' leadership, there has been an earnest movement with long-term strategic planning and review. Alert to the changing threat landscape, the NDA government reasoned that any compartmentalised or silo-driven approach to national security required a fresh integrated approach. New institutional mechanisms and structures were put in place. Never before has decision-making

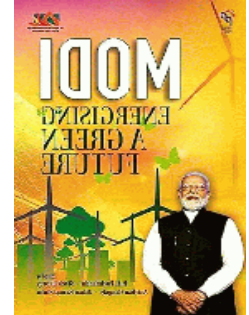

and policy responses undergone such fundamental changes that draw in the value of pre-emptive, proactive and graded responses. This evocative volume brings out a comprehensive treatment of the important aspects of national security under Modi 2.0 government.

36. Modi Energising a Green Future/ Pachnanda, Ranjit (ed.) ; Debroy, Bibek (ed.)- Pentagon Press, New Delhi, 2023; xxii, 278p.

53927

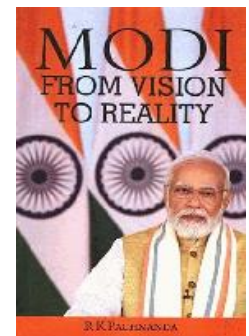

Climate change and energy security are interconnected and are two sides of the same coin. The increasing share of non-hydrocarbon or non-fossil energy, as evidence suggests, will help in significant reduction in carbon emissions. There is now broadly a global drive to expand energy sources and increase energy efficiency, both in distribution and consumption in order to mitigate climate change, reduce energy dependency, and minimize energy price volatility. India has shown the world what it takes to be a climate leader. The UN Environment Programme in 2018 recognized Prime Minister Modi for his bold environmental leadership on the global stage. Energy transition will be the most important pillar for climate action for the country and for this India is rapidly crafting a sturdy ecosystem to enable the transformation through technology readiness, capacity upgrade, climate finance, regulatory reforms and new and innovative business models, which will together help in achieving India's climate and sustainable development goals. This volume presents a well-integrated collection of chapters from distinguished decision-makers, influential opinion makers, and eminent experts creating in the process a synergy of views supporting India's transition to affordable and sustainable energy that not only reduces emissions, but spurs economic growth and promotes sustainable climate investments.

37. Modi: From Vision to Reality/ Pachnanda, R.K (Ed.)- Pentagon Press, New Delhi, 2023; xviii, 162p.

53928

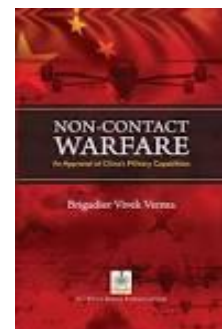

Modi: From Vision to Reality presents a fascinating and incredible narrative of Prime Minister Narendra Modi's inspirational vision, untiring resolve and achievement of a stable and prosperous India and how he has converted his inspirational vision into reality. From economic reforms to healthcare, poverty eradication, women empowerment, environmental sustainability, security, foreign relations and an overall growth in all sectors, this book covers every aspect of PM Modi's "India First" policies that have brought a great leap forward in the country's development to unimaginable heights. With contributions from erudite authors in their respective fields, each chapter brings to light the unprecedented accomplishments of a government led by a determined Prime Minister who has rejuvenated and resurged India's unity, development and pride.

38. Non-contact Warfare: An Appraisal of China's Military Capabilities/ Verma, Vivek- Pentagon Press, New Delhi, 2022; xxii, 330p.

53929

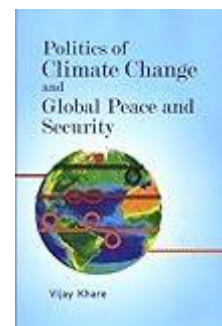

The future of war will be dictated by the civil-military integration. The core instrumentality of threat and use of force to achieve political outcomes have changed since the end of the Cold War, and the difference between war and conflict is changing the way the confrontations and crisis are being engineered and handled. Emerging threats are exploiting new technologies and finding new uses for the old one. Similarly, the practitioners of defence are finding new methods to engage in sub-threshold warfare using non-contact warfare. Thus, a much wider array of agencies are now involved in the development and implementation of national security policy; a whole-of-government effort might better define the instruments of power.

39. Politics of Climate Change & Global Peace and Security/ Khare, Vijay- Pentagon Press, New Delhi, 2021; xi, 256p.

53930

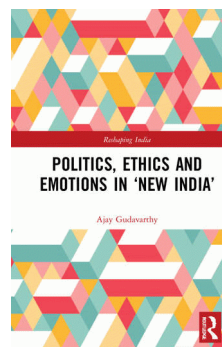

This book focuses on a very significant current issue, which is highly relevant in the present context, which is completely unexplored in an in-depth manner. The concept of Climate Change has been discussed minutely by the author. It states how climate change affects on global politics peace and security. Especially, the author has emphasised, climate change is not only a topic of discussion but also one of the serious issues which need a special action to be taken. This book gives detail information about how climate change is becoming the greatest threats across the globe. The author has genuinely attempted to ponder over the importance of climate change and global peace and security. The book explicates how India-US working constructively to control climate change for the betterment of the world. It has included much useful information as this issue is worldwide important. Through this book, the author has portrayed the intricate and multidimensional importance of Climate change. The most remarkable thing about this book is, the author has successfully remounted and tried to trace the productive journey of India-US towards climate change through numerous pacts and agreements. It gives the glimpses of how India-US strategically tackled the climate change issues and role of India in under the leadership of newly elected US President, Joe Biden. Finally, this book has clearly stated how the climate change issue is a crucial factor and it affects on global peace and security. Ultimately, this book is an essential work to study in deep the Climate change and global peace and security. A must-read book for scholars, political analyst, environmental expertise, academicians across the globe.

40. Politics, Ethics and Emotions in 'new India'/ Gudavarthy, Ajay- Routledge, London, 2023; x, 209p.

53936

How do emotions mobilise in politics? How do they frame ideologies? Broadly focusing on these questions, this book explains the role emotions play in Indian politics and the part they played in the aftermath of the 2019 general elections. It traces the consolidation of the Right in India and highlights the reasons for its electoral successes with a focus on the interplay between ethics and emotions such as fear, anxiety, guilt, shame, anger, hatred, betrayal, and violence. At the same time, it traces the changing dynamic in the way we think about politics and analyses the failure of liberal democratic institutions to make space for emotions in politics and political motivations. An accessible and essential guide to understanding contemporary India, this book will be of great interest to scholars

and researchers of politics, especially governance and political theory, as well as South Asian studies.

41. Population and Sustainable Development in India/ Chaurasia, Aalok Ranjan- Springer, Singapore, 2020; ix, 255p. 53635

This book addresses central issues related to population and sustainable development in India, the second most populous country in the world. Using the latest available source of data in the context of the United Nations 2030 Sustainable Development Agenda, it analyzes the current state of development in India in terms of economic growth, social inclusion, and environmental protection, especially focusing on the role of population. The respective chapters explore various aspects, but mainly focus on promoting greater sustainability in terms of population growth, child survival, and economic growth. As such, the book will be of interest to students, researchers, and policymakers in the fields of population studies, economics, and international development.

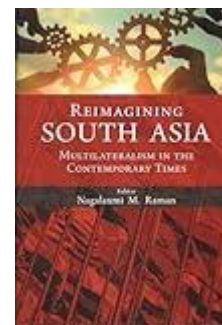

42. Recent Developments in Space Law: Opportunities & Challenges/ Rao, R. Venkata (ed.) ; Gopalakrishnan, V (ed.)- Springer, Singapore, 2017; xiv, 154p. 53640

This book offers a compendium of diverse essays on emerging legal issues in outer space, written by experts in the field of Space Law from different parts of the globe. The book comprehensively addresses opportunities in space and the inevitable legal challenges that these space activities pose for mankind. It explores the increasing role of private sector in outer space, which calls for a review of policy and legislation; invites opinion juries from law scholars for ensuring the applicability of the Outer Space Treaty on all states without ratification and universal abidance with Space Law without demur; reflects upon the challenges for the global space community involved in implementing a more effective approach to international space governance; and considers the use of domestic laws, and the consequent need for legal reform, to encourage broader engagement with commercial space innovation. Further, the book delves into the adequacy of existing international liability regime to protect space tourists in the event of a space vehicle accidents; examines the increasing use of space for military activities and canvasses how International Law may apply to condition behaviour; highlights the challenges of scavenging space debris; calls for protections of space assets; touches upon the legal regime pertaining to ASAT and discusses other ways of creating normative instruments, which also come from other areas and use other methods. Given its comprehensive coverage of opportunities in space and the inevitable legal challenges that they pose, the book offers a valuable resource for students, researchers, academics and professionals including government officials, industry executives, specialists, and lawyers, helping them understand essential contemporary issues and developments in Space Law.

43. Reimagining South Asia: Multilateralism in the Contemporary Times/ Raman, Nagalaxmi M (Ed.)- Pentagon Press LLP, New Delhi, 2022; xv, 271p. 53903

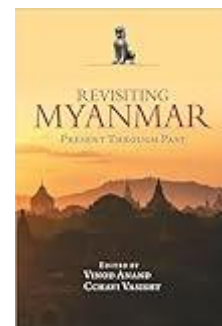

Throughout the COVID-19 pandemic, challenges in the South Asian region have become apparent. Reimagining South Asia argues that multilateralism in the region is the greatest hope for actionable policy, and that remaining an introverted economy hinders developmental progress. Topics studied throughout the book include the ASEAN outlook on the Indo-Pacific narrative, India's relations with Africa, China's strategic movements within in the region, India's energy diplomacy towards South Asian countries, and multilateralism in Nepal's foreign policy.

44. Revisiting Myanmar Present Through Past/ Anand, Vinod (Ed.) ; Vasisht, Cchavi (Ed.)- Pentagon Press LLP, New Delhi, 2023; xxi, 337p.

53904

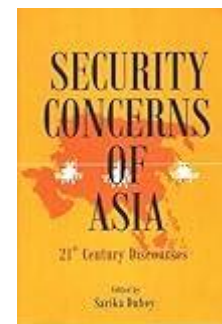

The February 2021 military takeover in Myanmar has had adverse impact on the country's political, economic and social landscape, which was undergoing a democratic transition. It was a step back in the democratic journey the country had embarked upon since adopting the 2008 military-drafted Constitution. The military extended the emergency rule on 01 February 2023, and the elections to be conducted per the 2008 Constitution mandate were further deferred. Unlike the earlier two military coups, the opposition forces (National Unity Government, People's Defence Forces and Ethnic Armed Organisations) reacted sharply to the military takeover. To understand the military takeover in Myanmar, it is important to revisit the country's political, economic and socio-cultural realities. And this volume attempts to delve into the history behind the rise of the military, the opposition forces, the EAOs and the economic, social and political conditions of the country. Finally, Myanmar's relations with the major international players, China, Russia, India, Japan and ASEAN, are also explored

45. Security Concerns of Asia: 21st Century Discourses/ Debey, Sarika (ed.)- Pentagon Press, New Delhi, 2022; xxvii, 424p.

53931

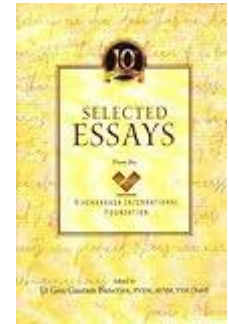

Security is a wide concept, pertaining not only to national security but also to the essential factors of human wellbeing and progress. In the current global climate, many new dimensions to security have become evident through interconnected issues such as climate change, food insecurity, pandemics, and terrorism, making the study of security more relevant than ever. The Asia-Pacific region is confronted with many complex and daunting challenges, including the denuclearisation of North Korea, tensions in the Taiwan Strait, and assertions of sovereignty in the South China Sea. Besides these, recent developments in Afghanistan, emerging trends in transnational terror networks, sectarian violence, drug trafficking and illegal migration are deeper issues that have sustained security concerns in the region. This book studies security issues in the Asian context, recognising the region as a locus of international affairs and power-politics in which security is mostly influenced by geopolitical factors.

46. Selected Essays From the Vivekananda International Foundation/ Banerjee, Gautam (Ed.)- Pentagon Press LLP, New Delhi, 2020; xi, 296p.

53905

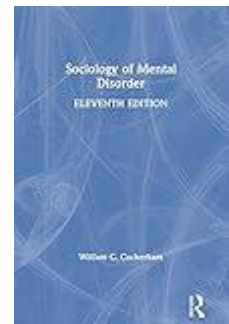

Over the past decade, the VIF has charted an academically independent path of research and analyses. The Foundation has thus been disseminating a vast stream of analyses of key developments and decision dilemmas concerning the nation to its wide circle of associates and readers. Non-partisan and balanced strategic objectivity, and conformity with India's exalted native civilizational values being its fundamental competencies, it has earned a reputation for the highest level of credibility among national and international opinion as well as decision makers which include governments, strategists and academia.

47. Sociology of Mental Disorder/ Cockerham, William C.- Routledge, London, 2020; xiii, 370p.

53947

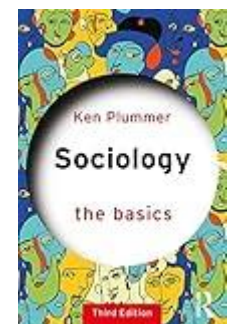

This new edition provides vital updates and significantly expanded coverage. Importantly, this edition that has been updated to the Revised DSM-5 (Diagnostic and Statistical Manual of Mental Disorders). Included is a new chapter on patient hood and sections on epigenetics, social class, race, gender, community care, and more topics.

48. Sociology: The Basics/ Plummer, Ken- Routledge, London, 2022; 302p.

53937

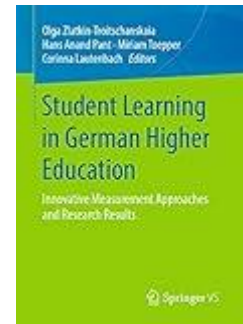

A lively, accessible and comprehensive introduction to the diverse ways of thinking about social life, Sociology: The Basics has been translated into six languages. The volume is packed with thought-provoking summaries, questions, quotations and activities. It offers an absorbing narrative about what we mean by the social, and how we can think about it, weaving in discussions of the personal, the political and social change, along with concepts and vivid contemporary examples, and answering questions such as: What is the scope, history and purpose of sociology? How do we cultivate ways of understanding society and 'the social'? What is the state of the world we live in today? How do we analyse suffering and inequalities? What are key methods and tools for researching and thinking about society? How has digitalism reshaped sociology and its method? How might sociology help us understand the changes brought about by Covid-19? Does sociology have values? What is the role of sociology in making a better world? In this thoroughly revised and updated Third edition the reader is encouraged to think critically about the structures, meanings, histories and cultures found in the rapidly changing world we live in. With tasks to stimulate the sociological mind and suggestions for further reading both within the text and on an accompanying website, this book is essential reading for all those studying sociology and those with an interest in how the modern world works.

49. Student Learning in German Higher Education: Innovative Measurement Approaches and Research Results/ Zlatkin-Troitschanskaia, Olga (ed.) ; Pant, Hans Anand (ed.)- Springer, Germany, 2021; viii, 429p.

53639

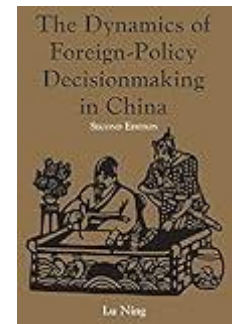

This book offers a comprehensive overview of current, innovative approaches to assessing domain-specific and generic student learning and learning outcomes in higher education. The presented work from all projects of the KoKoHs program, the most significant research initiative in German higher education since 2011, describes established tools and empirical results.

50. The Dynamics of Foreign-policy Decision Making in China/ Ning, Lu- Oxford, UK, 2000; xi, 228p.

53631

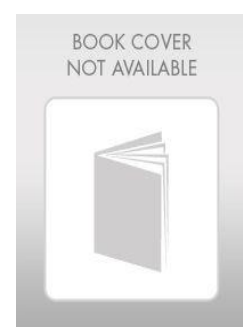

Lu Ning, former assistant to a vice-foreign minister of China, draws on archival materials, interviews, and personal experiences, to provide unique insights into the formal and informal structures, processes, mechanisms, and dynamics of--and key players in--foreign-policy decision-making in Beijing. Lu Ning sheds light on controversial decisions that were made, such as China's entering the Korean War, selling DF-3 missiles to Saudi Arabia in 1986, and cooperating with the Israeli defence establishment. Lu Ning divulges the inner workings of Beijing's foreign ministry, introduces new Chinese language sources, and presents a series of case studies that challenge existing Western theoretical analysis of Chinese policymaking. Based on his examination of the past forty years, Lu Ning makes predictions about likely changes in Beijing's leadership and in its foreign-policy decision-making process. This accessibly written, incisive book will be invaluable to anyone interested in Sinology, Chinese foreign policy, comparative foreign policy, and contemporary international relations of East Asia. This second edition contains a fully revised Introduction, and it has been updated through President Clinton's recent visit to China. The new edition also contains new material on the Clinton Administration's varying policy positions toward China.

51. The Future of Post-human Sociology: Towards a New Theory of Structure and Agency/ Baofu, Peter- Overseas, New Delhi, 2017; xxxiii, 316p. | xxxiii, 795p.

53642

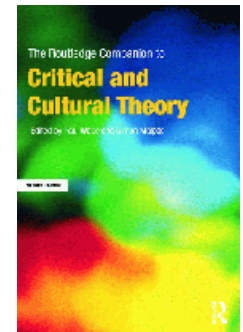

What exactly makes the nature of organizations so miraculous that their very purpose is “to achieve performance” and that it is now regarded, in this capitalist age of ours, as the central aim to be both possible and desirable for any organization? After all, there is simply no lack of organizations which “achieve performance” with questionable means and goals—be they about “greed” and “excess” in the corporate world, or “evil” and “injustice” in the public sphere, just to cite two main examples (although there are others too, of course). Contrary to the conventional wisdom preciously accepted by many contemporaries, this obsessive craze for organizational performance is fast becoming a seductive trend, such that the dark sides of organizational performance have yet to be systematically understood and that its very purpose is neither possible nor desirable to the extent that its proponents would like us to believe. Needless to say, this is not to suggest that the purpose of organizations is to reject performance, or that the literature in organizational studies (and other related fields like political science, media studies, and business management, for example) hitherto existing in history are full of scholarly worthlessness. The aim of this book, however, is to provide an alternative (better) way to understand the nature of organization, in special relation to communication, decision-making,

and leadership—while learning from different views in the literature, without favouring any one of them (nor integrating them), and, in the end, transcending them in a new direction not thought before. This seminal project, if successful, will radically change the way that we think about the nature of organization, from the combined perspectives of the mind, nature, society, and culture, with enormous implications for the human future and what I originally called its “post-human” fate.

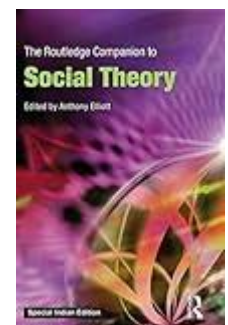

52. The Routledge Companion to Critical and Cultural Theory/ Malpas, Simon (ed.) ; Wake, Paul (ed.)- Routledge, London, 2013; xv, 342p. 53938

This book examines some of the most complex and fundamental theories in modern scholarship including Marxism Trauma Theory Eco criticism Psychoanalysis Feminism Post humanism Gender and Queer Theory Structuralism Narrative Post colonialism Deconstruction Postmodernism .With three new essays, an updated introduction, further reading and a wealth of new dictionary entries, this text is an indispensable guide for all students of the theoretically informed arts, humanities and social sciences.

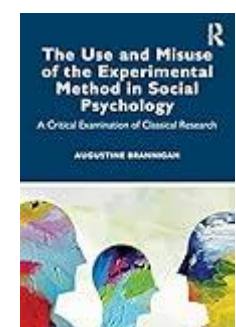

53. The Routledge Companion to Social Theory/ Elliott, Anthony (ed.)- Routledge, London, 2010; xiv, 338p. 53939

It provides an authoritative, comprehensive and provocative introduction to the key traditions of thought in social theory today. This ground-breaking reference work brings together major contributors, both established and emergent new voices, to reflect on the ways in which social theory sheds light on the contemporary social world. Represented are the traditions of classical social thought symbolic interactionism psychoanalysis structuralism, post-structuralism and postmodernism identity theories globalization theories. The Routledge Companion to Social Theory is designed to give a sense of the complexities of both classical and contemporary social theory. Including a helpful glossary of key terms and theorists, this accessible guide is essential reading for students and professionals in social theory, sociology, philosophy, cultural studies, women’s studies and politics.

54. The Use and Misuse of the Experimental Method in Social Psychology: A Critical Examination of Classical Research/ Brannigan, Augustine- Routledge, UK, 2021; xi, 215p. 53641

This book critically examines the work of a number of pioneers of social psychology, including legendary figures such as Kurt Lewin, Leon Festinger, Muzafer Sherif, Solomon Asch, Stanley Milgram, and Philip Zimbardo. Augustine Brannigan argues that the reliance of these psychologists on experimentation has led to questions around validity and replication of their studies. The author explores new research and archival work relating to these studies and outlines a new approach to experimentation that repudiates the use of deception in human experiments and provides clues to how social psychology can re-articulate its premises and future lines of research. Based on the author’s 2004 work *The Rise and Fall of Social Psychology*, in which he critiques the experimental methods used, the book advocates for a return to qualitative methods to redeem the essential social dimensions of social psychology.

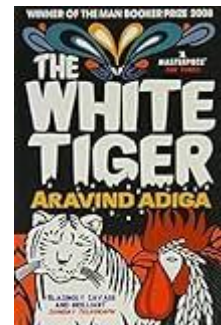

Covering famous studies such as the Stanford Prison Experiment, Milgram's studies of obedience, Sherif's Robbers Cave, and Rosenhan's exposé of psychiatric institutions, this is essential and fascinating reading for students of social psychology, and the social sciences. It's also of interest to academics and researchers interested in engaging with a critical approach to classical social psychology, with a view to changing the future of this important discipline.

55. The White Tiger/ Adiga, Aravind- Harpercollins, Haryana, 2009; 321p.

53901

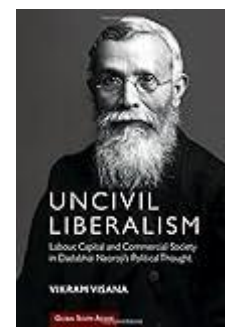

Winner of the Man Booker Prize 2008 Meet Balram Halwai, the 'white tiger': servant, philosopher, entrepreneur, murderer... Born in a village in the dark heart of India, the son of a rickshaw puller, Balram is taken out of school and put to work in a teashop. As he crushes coal and wipes tables, he nurses a dream of escape. His big chance comes when a rich landlord hires him as a chauffeur for his son, daughter-in-law, and their two Pomeranian dogs. From behind the wheels of a Honda, Balram sees Delhi and begins to see how the Tiger might escape his cage. For surely any successful man must spill a little blood on his way to the top? The White Tiger is a tale of two India's. Balram's journey from the darkness of village life to the light of entrepreneurial success is utterly amoral, brilliantly irreverent, deeply endearing and altogether unforgettable.

56. Uncivil Liberalism: Labour, Capital and Commercial Society in Dadabhai Naoroji's Political Thought/ Visana, Vikram- Cambridge University Press India, Delhi, 2022; xv, 275p.

53932

Uncivil Liberalism studies how ideas of liberty from the colonized South claimed universality in the North. Recovering the political theory of Dadabhai Naoroji, India's pre-eminent liberal, this book offers an original global history of this process by focusing on Naoroji's preoccupation with social interdependence and civil peace in an age of growing cultural diversity and economic inequality. The story of Naoroji's political theory emerges from an in-depth contextualization of the Parsi minority in western India and Naoroji's engagement with the religious, social, political and economic debate that preoccupied the Parsi public sphere in nineteenth-century Bombay. Then, using Naoroji's detailed reflections on his career as a social reformer, entrepreneur and politician in India and Britain, the book reconstructs how his formative experiences in India's smallest minority produced some of South Asia's most globally significant political thought. As a contribution to theory, the book shows how Naoroji used political economy to critique British liberalism's incapacity for civil peace by linking periods of cultural and ethnic fragmentation and communal rioting in colonial Bombay with the Parsis' economic decline, which had rendered the minority less capable of funding the philanthropy that had maintained Bombay's cosmopolitan civil society. Naoroji responded by innovating his own liberal theory predicated on an economic republicanism that could guarantee the social contract between autonomous labourers liberated from the arbitrary mediation of financial capital and parasitic bureaucracy. Significantly, the author draws attention to how Naoroji seeded 'Western' thinkers with these ideas and influenced numerous ideologies in colonial and postcolonial India. In so doing, the book offers a compelling argument which reframes Indian 'nationalists' as global thinkers.

57. Virtual Reality, Augmented Reality and Artificial Intelligence in Special Education: A Practical Guide to Supporting Students With Learning Differences/ Anderson, Ange- Routledge, New York, 2019; 124p.

53621

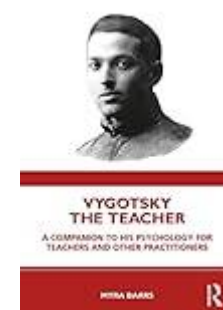

New technologies and ongoing developments in the fields of Virtual reality, augmented reality and artificial intelligence are changing the ways in which we facilitate learning. Recognising the positive role these technologies can play in the learning and progress of students assessed as having special educational needs, this practical guide explains the characteristics, benefits, risks and potential applications of new technologies in the classroom. An innovative and timely resource, Virtual Reality, Augmented Reality and Artificial Intelligence in Special Education offers a background in the evidence-based theory and practice of using new technologies in an educational context. Accessible and free of complex jargon, chapters provide information on the development, intended uses and most current terminology used in relation to technologies, and explains how modern equipment, approaches and possibilities can be used to promote improved communication skills, independent learning and heightened self-esteem amongst students diagnosed with SEND. Offering a wealth of practical tips, downloadable resources and ideas for engaging with technology in the classroom, the text will support teachers to ensure that students can benefit from exciting technological advances and learn to use them appropriately. Demystifying a complex and varied field, this practical resource will inspire and inform teachers, SENCOs and practitioners working with children and students with SEND as they harness the use of technology in the classroom.

58. Vygotsky the Teacher: A Companion to His Psychology for Teachers and Other Practitioners/ Barrs, Myra- Routledge, New York, 2021; 256p.

53622

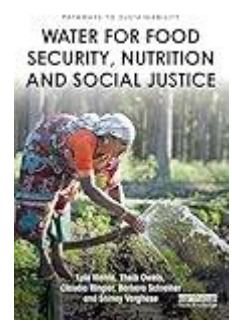

This highly accessible guide to the varied aspects of Vygotsky's psychology emphasises his abiding interest in education. Vygotsky was a teacher, a researcher and educational psychologist who worked in special needs education, and his interest in pedagogy was fundamental to all his work. Vygotsky the Teacher analyses and discusses the full range of his ideas and their far-reaching educational implications. Drawing on new work, research and fresh translations, this unique text foregrounds key Vygotskian perspectives on play, imagination and creativity, poetry, literature and drama, the emotions, and the role of language in the development of thought. It explains the textual issues surrounding Vygotsky's publications that have, until recently, obscured some of the theoretical links between his ideas. It underlines Vygotsky's determination to create a psychology that is capable of explaining all aspects of the development of mind. Vygotsky the Teacher is essential reading for students on education and psychology courses at all levels, and for all practitioners wanting to know more about Vygotsky's theories and their roots in research and practice. It offers a unique road map of his work, connecting its different aspects, and placing them in the context of his life and the times in which he lived"-

59. Water for Food Security, Nutrition and Social Justice/ Mehta, Lyla- Routledge, Newyork, 2019; 232p.

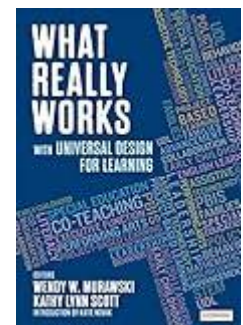

53623

This book is the first comprehensive effort to bring together Water, Food Security and Nutrition (FSN) in a way that goes beyond the traditional focus on irrigated agriculture. Apart from looking at the role of water and sanitation for human wellbeing, it proposes alternative and more locally appropriate ways to address complex water management and governance challenges from the local to global levels against a backdrop of growing uncertainties. The authors challenge mainstream supply-oriented and neo-Malthusian visions that argue for the need to increase the amount of land under irrigation in order to feed the world's growing population. Instead, they argue for a reframing of the debate concerning production processes, waste, food consumption and dietary patterns whilst proposing alternative strategies to improve water and land productivity, putting the interests of marginalised and disenfranchised groups upfront. The book highlights how accessing water for FSN can be challenging for small holders, vulnerable and marginalized women and men, and how water allocation systems and reform processes can negatively affect local people's informal rights. The book argues for the need to improve policy coherence across water, land and food and is original in making a case for strengthening the relationship between the human rights to water and food, especially for marginalised women and men. It will be of great interest to practitioners, students and researchers working on water and food issues.

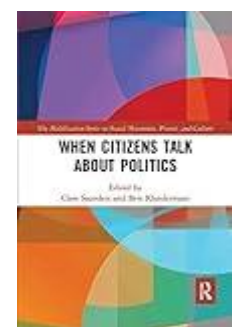

60. What Really Works With Universal Design for Learning/ Murawski, Wendy W. (ed.) ; Scott, Kathy Lynn (ed.)- Corwin, California, 2019; xv, 309p. 53624

An unprecedented breadth of UDL topics, including multiple content areas, pedagogical issues, and other critical topics like executive function, PBIS, and EBD Reproducible research-based, field-tested tools Practical strategies that are low cost, time efficient, and easy to implement Practices for developing shared leadership and for working with families Educators want to see each and every student succeed. This teacher-friendly, hands-on resource shows how UDL can be used to build the flexibility required to meet students' strengths and needs without overwhelming English.

61. When Citizens Talk About Politics/ Saunders, Clare (ed.) ; Klandermans, Bert (ed.)- Routledge, Newyork, 2021; 250p. 53625

This book offers novel insights into the way in which people talk about politics across various countries. Drawing on focus groups research in nine countries, including 'mature' democracies, post-communist 'new' democracies and post-authoritarian 'new' democracies, it offers comparative reflection on how talk about political activity is shaped by peoples' perceptions of specific opportunities to participate, the issues that concern them and the broader political environment. It thus examines citizens' views of major issues and political grievances in their own words and helps to shed new light on reasons for engagement in political acts, whether through electoral or protest channels, or political disengagement.

62. Why International Organizations Hate Politics: Depoliticizing the World/ Louis, Marieke- Routledge, New York, 2021; 202p. 53626

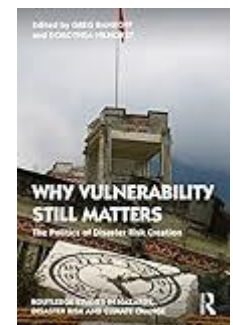

Building on the concept of depoliticization, this book provides a first systematic analysis of International Organizations (IO) apolitical claims. It shows that depoliticization sustains IO everyday activities while allowing them to remain engaged in politics, even when they pretend not to. Delving into the inner dynamics of global governance, this book develops an analytical framework on why IO "hate" politics by bringing together practices and logics of depoliticization in a wide variety of historical, geographic and organizational contexts. With multiple case studies in the fields of labor rights and economic regulation, environmental protection, development and humanitarian aid, peacekeeping, this book shows that depoliticization is enacted in a series of overlapping, sometimes mundane, practices resulting from the complex interaction between professional habits, organizational cultures and individual tactics. By approaching the consequences of these practices in terms of logics, the book addresses the instrumental dimension of depoliticization without assuming that IO actors necessarily intend to depoliticize their action or global problems

63. Why Vulnerability Still Matters: The Politics of Disaster Risk Creation/ Hihorst, Dorothea (ed.) ; Bankoff, Greg (ed.)- Routledge, UK, 2022; xiv, 240p.

53627

We think vulnerability still matters when considering how people are put at risk from hazards and this book shows why in a series of thematic chapters and case studies written by eminent disaster studies scholars that deal with the politics of disaster risk creation: precarity, conflict, and climate change. The chapters in this book highlight different aspects of vulnerability and disaster risk creation, placing the stress rightly on what causes disasters and explaining the politics of how they are created through a combination of human interference with natural processes, the social production of vulnerability, and the neglect of response capacities. Importantly, too, the book provides a platform for many of those most prominently involved in launching disaster studies as a social discipline to reflect on developments over the past 50 years and to comment on current trends. The interdisciplinary and historical perspective that this book provides will appeal to scholars and practitioners at both the national and international level seeking to study, develop, and support effective social protection strategies to prevent or mitigate the effects of hazards on vulnerable populations.

64. Women and Reproductive Technologies: The Socio-economic Development of Technologies Changing the World/ Burfoot, Annette- Routledge, UK, 2022; 153p.

53628

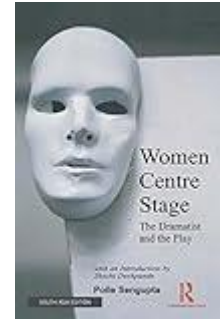

A sociological and historical study of the development of reproductive technologies, this book focuses on key technological developments through a bio medicalization lens with special attention to gender. Using in vitro fertilization (IVF) as a hub, it critically examines the main areas of related socio-technical developments: reproductive science, birth control, animal husbandry, genetics, and reproductive medicine. Employing a critical framework to illuminate dominant discourses, the book also highlights examples of social resistance, as well as contradictory responses to new reproductive technologies. Over eight chapters, the author examines the social history of reproduction and sexuality, reproductive technologies from old to new, and debates surrounding new reproductive technologies and genetic engineering. Women and Reproductive Technologies pays close attention to the interconnections between the business of reproduction (and replication industries), the sociality of

reproduction (including reproductive justice), and what are considered the technologies themselves. As such, it constitutes essential reading for students and researchers in the fields of sociology, health studies and gender studies interested in the current state of human reproduction.

65. Women Centre Stage/the Dramatist and the Play/ Sengupta, Poile- Routledge, London, 2010; 364p. 53940

This selection of six contemporary plays explores a wide range of issues — familial, social, mythological, political — with women centre stage. The plays are distinct from each other in structure, theme and style, but are bound together by a common thread — the position and role of women in family, social and political systems. Issues such as sexual abuse, in-law relationships, the trauma of ageing, the struggle for women’s empowerment, love and passion, desire and revenge, and dynastic politics are discussed through the varying perspectives of a number of characters, bringing an immediacy and urgency to the subjects under consideration. What is significant about the plays is that they highlight the manipulation of the English language resulting with the introduction of an ‘Indian’ syntax. Multilingualism is used to offset the so-called ‘westernisation’ that has been the by-product of the systematic globalisation of ‘third world’ countries. While the plays are meant to be staged, they are also very reader-friendly and will be entertaining as well as educative for the general reader.

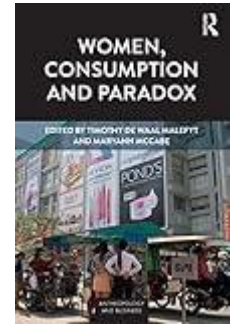

66. Women-owned Smes in Emerging Markets: The Missing Link in Global Supply Chains/ Shalizi, Shabnam- Routledge, UK, 2022; xxv, 188p. 53630

This book investigates women as business owners in emerging markets, documenting the structural difficulties they face as a result of their seeking access to global supply chains, and demonstrating the ways in which they are rewriting norms and challenging market assumptions. Although women own an estimated one-third of all small and medium-sized enterprises (SMEs) in emerging markets, they are deeply underrepresented in global supply chains. In what the author refers to as the Women in Trade Deficit, women-owned enterprises earn less than 1% of all money spent on vendors by large corporations and governments worldwide. Drawing on an in-depth empirical investigation of a range of SMEs in Bangladesh, Nigeria, and Sri Lanka, this book investigates how women enter the supply chains of major global firms and multinational corporations and the challenges they face in doing so. Overall, the book argues that these business owners are rewriting norms and rearranging markets through networked enterprises to advance what the author calls prosocial industrialism. Whilst many studies focus on women at the micro-enterprise or laborer level, this book makes an important contribution to our understanding of their role at the helm of SMEs that trade internationally. As such, it will be of interest to researchers across business studies, economics, sociology, and development studies, and to donor agencies, policymakers, and the global private sector.

67. Women, Consumption and Paradox/ Malefyt, Timothy de Waal (ed.) ; McCabe, Maryann (ed.)- Routledge, New York, 2020; 258p. 53629

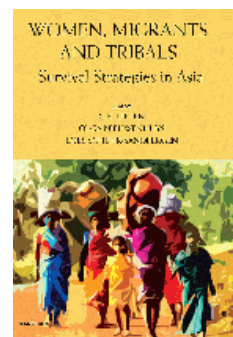

Women are the world's most powerful consumers, yet they are largely marketed to erroneously through misconceptions and patriarchal views that distort the reality of women's lives, bodies and work. This book examines the contradictions and mismatches between women's everyday experiences and market representations. It considers how women themselves exhibit paradoxical behaviour in both resisting and supporting conflicting messages. The volume emphasizes paradox as a form of agency and negotiation through which women develop dialogical meanings. The contributions highlight the ways in which women transform inconsistencies and contradictions in advertising and marketing, global consumption practices and material consumption into positive practices for living. The rich range of ethnographic accounts drawn from countries including the US, Brazil, Mexico, Denmark, Japan and China provide readers with a valuable perspective on consumer behaviour

68. Women, migrants and tribals: survival strategies in Asia / Lieten, Georges Kristoffel (ed.) ; Nieunwenhuys, Olga (ed.)- Manohar Publications, New Delhi, 1989; x, 183p.

53941

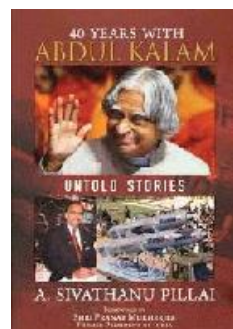

The notion of survival strategies has promised to be highly stimulating since its introduction in the early seventies and occupies a regular place in the current sociological literature dealing with poverty and development. However, in the wake of economic crises and continuing lopsided development, the idea of general progress made way for a new set of priorities, the basic needs strategy, which sought to assure survival of the poorest most affected by the economic crises and ecological disaster. The contributors to this volume, all of whom have a longstanding field research experience in anthropology and sociology, take a look at some of these groups (poor peasants, tribes, industrial workers and women) in a number of Asian countries, viz., India, Sri Lanka, Bangladesh, West Guinea and Indonesia. The papers inter-alia explore the inter-linkages between survival and emancipation at the micro-level and intra-household power relations. The case studies generally reflect an innovative approach in the sense that survival is analysed in the context of emancipation, which is an essential prerequisite for the ultimate survival of the individual, the family and the social Group or Class. The articles directly reflect the views and attitudes of the poorer sections of society and thus present a lively and realistic picture of the balancing act between survival and emancipation in the Third World countries which are the focus of study currently.

69. 40 Years With Abdul Kalam: Untold Story/ Pillai, A. Sivathanu- Pentagon Press LLP, New Delhi, 2020; xix, 230p.

53907

Dr. Abdul Kalam, a great human being, established a unique place in the hearts of Indians with his admirable virtues and combined a simple lifestyle with strong willpower to envision an empowered nation. Without any ego, he could adapt himself to the situation to win over the person in front of him or would instantly become a captivating communicator to the audience. Every one, irrespective of age, position or religion, who met him at different occasions, celebrates him as a friend. As the eleventh President of India, he had totally changed the perception of India in the global arena. The author had the opportunity of working with this great soul closely for more than four decades and shared difficulties, failures and successes. This book discusses many of the interesting events, mostly the untold ones, during this journey, including those at ISRO, DRDO and BrahMos, and interactions with the corridors of power.

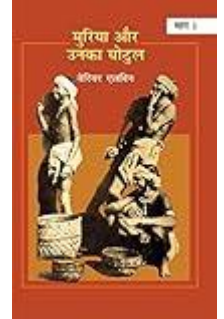

Manufacturing is the key to economic prosperity and the chapter on Strategic Industries gives a complete insight on how India has steadily progressed in modern India. It was a long and unique journey for the author with the most appreciated true Indian, KALAM—the Brahmarishi.

70. मुरिया और उनका घोटुल/ एलविन, वेरियर- राजकमल प्रकाशन, दिल्ली, 2022; 347p. (Part-1) | 539p. (part -2)

53643

मुरिया और उनका घोटुल-1 के इस भाग में बस्तर के मुरिया आदिवासियों के जीवन से जुड़े उन सभी आयामों को रेखांकित किया गया है। जिनसे अभी तक हम अनभिज्ञ थे। यहाँ घोटुल है जिसका उद्गम स्रोत है लिंगो पेन देवता। यह गाँव के बच्चों और युवाओं का निवास स्थान है। कबीले के हर अविवाहित लड़के और लड़की को इसका सदस्य बनना पड़ता है। घोटुल की सदस्यता मात्र मन बहलाव का साधन नहीं है बल्कि धार्मिक आस्थाओं से जुड़ी एक सामाजिक परम्परा है। इस परम्परा को कड़े नियमों द्वारा नियंत्रित किया जाता है। यहाँ लड़कों को चेलिक और लड़कियों को मुटियारी कहा जाता है। लड़कों का नेता सरदार है तो लड़कियों की नेता बैलोसा है। मुरिया जीवन के आर्थिक, सामाजिक, धार्मिक पहलुओं का वर्णन करता हुआ घोटुल सिर्फ एक रात्रि क्लब है; दिन में इसके सदस्यों को खाने की व्यवस्था, खेती, शिकार, मछली पकड़ना, शहद एकत्रित करना व सागो ताड़ का रस तथा ईंधन जुटाने में व्यस्त कर दिया जाता है। मुरिया जीवन को खोलती इस पुस्तक में मुरिया समुदाय के जीवन के हर पहलू, उनकी आजीविका, कबीले का संगठन, बचपन, युवावस्था, धर्म और उनके देवताओं का वर्णन विस्तार से प्रामाणिक ढंग से किया गया है। मुरिया और उनका घोटुल-2 में मुरिया तथा घोटुल की सभी परम्पराओं को क्रमवार रूप से सँजोया गया है। घोटुल में एक सरल, कामुकता से पूर्ण और गहरी भावना से ओत-प्रोत यौन जीवन है जिसका संचालन चेलिक और मुटियारी मिलकर करते हैं। पुस्तक हमें घोटुल का प्रारम्भ कैसे हुआ, इसके भवन किस तरह के थे, इसकी सदस्यता और नियम, श्रृंगार और वस्तुएँ, अनुशासन, सेक्स, नृत्य और गीत, मनोरंजन, विवाह, नैतिक मानदंड आदि सभी पहलुओं के विषय में तथ्यात्मक जानकारी देती है। पुस्तक में घोटुल संस्कृति के अतिरिक्त मुरिया संस्कृति के अन्य पहलुओं पर भी प्रकाश डाला गया है। सेक्स के प्रति मुरिया दृष्टिकोण तथा विवाह से पूर्व बहुत-से साथियों के साथ यौन-सम्बन्ध बनाने की समस्या का हल ढूँढने की भी कोशिश की गई है। मुरिया जीवन के अनेक उतार-चढ़ावों के साथ-साथ यहाँ हास-परिहास और लोककथाओं के जरिए घोटुल के प्रति वफादार मुरिया की उत्सुकता की भी झलक दिखाई देती है। वेरियर एलविन की अंग्रेजी पुस्तक से अनूदित यह पुस्तक मुरिया समुदाय के जीवन को जीवन्त, तर्कसंगत, माननीय और आकर्षक रूप में देखने का सुन्दर प्रयास है।
