New Arrivals: List of New Additions with Summaries/  
Compiled & edited by Dr. S. N. Chari. New Delhi,  
National Social Science Documentation Centre, 2019.  
III, 69p.  
(NASSDOC Research Information Series: 1)  
April – June 2019

\*\*\*\*\*

## FOREWORD

The current issue of "New Arrivals: List of New Additions with Summaries" contains a list of New Books acquired during the period April – June 2019 and available for use in the National Social Science Documentation Centre of ICSSR.

In the main text, entries are arranged by Author/Editor, followed by bibliographical details and summary of the document. Subject index is given at the end in which subject refers to the serial number of the entry in the main text.

Interested readers can consult the listed titles by visiting the library.

Suggestions are welcome.

Ramesh Yernagula  
Director (Documentation)  
NASSDOC

## NEW ARRIVALS

S.No.	Description	Acc. No.
1	<p>Amzat, Ismail Hussein And Valdez, Nena P. (Ed.)</p> <p>Teacher professional knowledge and development for reflective and inclusive practices —London: Routledge, 2017</p> <p>This book brings together the practice of reflective teaching and the knowledge of inclusive practices in the context of teacher education and continuing professional development. It is a call to leverage reflective teaching for inclusive practices. The first part of the book provides an overview of what constitutes reflective practice in the 21st century and how teachers can become reflective practitioners. It also discusses how teacher professional development can be enhanced for reflective teaching practice. The second part of the book deals with teachers' knowledge development in order to create inclusive teaching and learning environments. It highlights the need for a responsive teaching climate, intercultural competency, pedagogical change and professional literacy.</p>	50377
2	<p>Basu, Ipshita; Devine, Joe and Wood, Geoffrey D. (Ed.)</p> <p>Politics and governance in Bangladesh: uncertain landscapes -- London: Routledge, 2018</p> <p>This book explores the central issue of Bangladeshi politics: the weakness of governance. The coexistence of a poor governance track record and a relatively strong socioeconomic performance makes Bangladesh an intriguing case which throws up exciting and relevant conceptual and policy challenges. Structured in four sections - Political Settlement, Elites and Deep Structures; Democracy, Citizenship and Values; Civil Society, Local Context and Political Change; Informality and Accountability – the book identifies and engages with these challenges. Chapters by experts in the field share a number of conceptual and epistemological principles and offer a combination of theoretical and empirical insights, and cover a good range of contemporary issues and debate. Employing a structurally determinist perspective, this book explains politics and society in Bangladesh from a novel perspective.</p>	50309
3	<p>Bhan , Gautam; Srinivas, Smita and Watson, Vanessa (Ed.)</p> <p>Routledge companion to planning in the global south--London: Routledge, 2018</p>	50342

This book offers an edited collection on planning in parts of the world which, more often than not, are unrecognised or unmarked in mainstream planning texts. In doing so, its intention is not to fill a 'gap' that leaves this 'mainstream' unquestioned but to re-theorise planning from a deep understanding of 'place' as well as a commitment to recognise the diverse modes of practice that come within it. The chapters thus take the form not of generalised, 'universal' analyses and prescriptions, but instead are critical and located reflections in thinking about how to plan, act and intervene in highly complex city, regional and national contexts. The book is divided into a framing Introduction followed by five sections: planning and the state; economy and economic actors; new drivers of urban change; landscapes of citizenship; and planning pedagogy.

- 4 Chakraborty, Ayon; Gouda, Sirish Kumar and Gajanand, M. S. (Ed.) 50408  
Sustainable operations in India--Singapore: Springer, 2018

This book focuses on understanding the status quo of sustainable practices in industry operations from an emerging economy perspective, presenting various practices in India. In order to offer a balance between theory and practice, it provides guidelines for applying models to achieve the goal of sustainability in this competitive environment. The chapters include theoretical perspectives, models and empirical evidence on sustainable practices from Indian industries. The book also presents a scholarly perspective on sustainable operations from various researchers and practitioners in India for a global audience in academia and industry.

- 5 Chinara, Mitali and Rout, Himanshu Sekhar (Ed.) 50253  
Micro, small and medium enterprises (MSMEs) in emerging India --  
New Delhi: New Century Publications, 2017

Micro, small, and medium enterprises (MSMEs) are the backbone of India's industrial economy. MSMEs not only play a crucial role in providing large employment opportunities at comparatively lower capital cost than large industries, but also help in industrialization of rural and backward areas, thereby reducing regional imbalances and assuring more equitable distribution of national income and wealth. MSMEs are complementary to large industries as ancillary units and contribute enormously to the socio-economic development of the country. The sector contributes significantly to manufacturing output, employment, and exports. But MSMEs also face a number of problems which have resulted in hampered growth. Inadequate working capital, lack of information to access domestic and international markets, shortage of trained personnel, and obsolete technology are the major barriers to the growth of MSMEs in India. The book analyzes how the growth of the MSMEs sector must be a central focus of India's manufacturing strategy. The present volume contains 13 scholarly papers, authored by experts in the field, which provide an analytical account of the functioning of MSMEs in India.

6 D'Costa, Anthony P. and Chakraborty, Achin (Ed.) 50247

Land question in India: state, dispossession, and capitalist transition  
-New Delhi: Oxford University Press, 2017

This volume takes a fresh look at the land question in India. Instead of re-engaging in the rich transition debate in which the transformation of agriculture is seen as a necessary historical step to usher in dynamic capitalist (or socialist) development, this collection critically examines the centrality of land in contemporary development discourse in India. Consequently, the focus is on the role of the state in pushing a process of dispossession of peasants through direct expropriation for developmental purposes such as acquisition of land by (local) states for infrastructure development and to support accumulation strategies of private business through industrialisation.

7 Das, Deb Kusum (Ed.) 50258

Productivity dynamics in emerging and industrialized countries--  
London: Routledge, 2018

The world, of late, has seen a productivity slowdown. Many countries continue to recover from various shocks in the macro business environment, along with structural changes and inward looking policies. In contemporary times of growth slumps, various exits and protectionist regimes, this book engages with the study of productivity dynamics in the emerging and industrialized economies. The essays address the crucial aspects, such as the roles of human capital, investment accounting and datasets, that help understanding of productivity performance of global economy and its several regions.

8 Esfahani, Marzieh Kouhi and Mohammadi, Ariabarzan (Ed.) 50305

Nuclear politics in Asia --New York: Routledge, 2018

Asia has the world's highest concentration of nuclear weapons and the most significant recent developments related to nuclear proliferation, as well as the world's most critical conflicts and considerable political instability. The containment and prevention of nuclear proliferation, especially in Asia, continues to be a grave concern for the international community. This book provides a comprehensive overview of the state of nuclear arsenals, nuclear ambitions and nuclear threats across different parts of Asia. It covers the Middle East (including Israel), China, India-Pakistan and their confrontation, as well as North Korea. It discusses the conventional warfare risks, risks from non-state armed groups, and examines the attempts to limit and control nuclear weapons, both international initiatives and American diplomacy and interventions.

- 9 Frosh, Stephen (Ed.) 50280  
 Psychosocial imaginaries: perspectives on temporality, subjectivities and activism--Hampshire: Palgrave Macmillan, 2015  
 Psychosocial studies challenges the traditions of psychology and sociology from a genuinely transdisciplinary perspective. The book reflects this agenda in its varied theoretical and empirical strands, producing a newly contextualised and restless body of understanding of how 'psychic' and 'social' processes intertwine.
- 10 Ganguly, Sumit; Blarel, Nicolas and Pardesi, Manjeet Singh (Ed.) 50184  
 Oxford handbook of India's national security --New Delhi: Oxford University Press, 2018  
 India faces an array of national security challenges. Externally, they range from geopolitical tensions and territorial disputes with China and Pakistan, nuclear deterrence, and state-sponsored/backed cross-border terrorism to the internal security issues related to secessionism, counter-insurgency, Naxalism, and ethnic conflict. In recent decades, the national security agenda has been expanded to include issues related to economics, environment, development, and transnational criminal activities. More than two decades of rapid economic growth has also added energy security to the national security matrix. Concomitant with its economic rise, India's national security agenda also includes a more proactive vision for the wider Asian region, including the Indian Ocean, with implications for power projection, and for India's contributions to global peacekeeping missions through the United Nations. This handbook is the first comprehensive analysis of all these national security challenges, traditional and non-traditional, facing India.
- 11 Genus, Audley (Ed.) 50345  
 Sustainable consumption: Design, innovation and practice -- Singapore: Springer, 2016  
 This book originates from the work of contributors to initiatives and global networks promoting and pursuing lines of enquiry that recognise and probe relationships between sustainable consumption, design and production, and the implications of those relationships for new economic activity and the way we live and govern ourselves. It features contributions from social scientists (e.g. from the fields of innovation studies, geography, environmental policy and sociology) and practitioners, serving to generate a short-list of research perspectives and topics around which future research and actions in practice will be orientated.

- 12 Goodall, Jane and Lee, Christopher (Ed.) 50283  
 Trauma and public memory--Hampshire: Palgrave Macmillan, 2015  
 This collection explores the ways in which traumatic experience becomes a part of public memory. It explores the premise that traumatic events are realities; they happen in the world, not in the fantasy life of individuals or in the narrative frames of our televisions and cinemas.
- 13 Harper, Tim and Amrith, Sunil S (Ed.) 50146  
 Sites of Asian interaction: ideas, networks and mobility--New Delhi: Cambridge University Press, 2014  
 Develops the rich historical literature on port cities across Asia, the quintessential sites of Asian cosmopolitanism, as well as more recent work on the 'moving metropolises' and 'mobile cities' of contemporary Asia"
- 14 Heidkamp, C. Patrick and Morrissey, John (Ed.) 50346  
 Towards coastal resiliences and sustainability--London: Routledge , 2019  
 This book aims to interrogate the multi- scalar complexities in creating a more sustainable coastal zone. Sustainability transitions are geographical processes, which happen in situated, particular places. However, much contemporary discussion of transition is either aspatial or based on implicit assumptions about spatial homogeneity. This book addresses these limitations through an examination of socio- technological transitions with an explicitly spatial focus in the context of the coastal zone. The book begins by focusing on theoretical understandings of transition processes specific to the coastal zone and includes detailed empirical case studies. The second half of the book appraises governance initiatives in coastal zones and their efficacy.
- 15 Hensel, Howard M. and Gupgta, Amit (Ed.) 50304  
 Naval powers in the Indian ocean and the western pacific--New York: Routledge, 2018

This book complements the material presented in its companion volume, *Maritime Security in the Indian Ocean and the Western Pacific*, by analysing the perceptions, interests, objectives, maritime capabilities, and policies of the major maritime powers operating in the Indian Ocean and the Western Pacific. In addition, the book also assesses the contemporary maritime challenges and opportunities that confront the global community within what is rapidly becoming recognised as an integrated zone of global interaction.

16 Jackson, Jennifer and Molokotos-Liederman, Lina (Ed.)

Nationalism, ethnicity and boundaries: Conceptualising and understanding identity through boundary approaches --New York: Routledge, 2015 50303

This book analyses geographical and physical borders and symbolic, political and socio-economic boundaries, and how they impact upon nationalism and ethnic identity. Geographic and other tangible borders are critical components in the making and unmaking of boundaries. However, symbolic or intangible boundaries along national, ethnic, political or socio-economic criteria are equally significant. Organised into three sections on theory, national and transnational case studies, this book both introduces existing approaches to the study of boundaries and illustrates how it is possible to apply renewed boundary approaches to better understand nationalism and ethnicity in contemporary contexts. Expert contributors in the field present detailed case studies on the UK, Israel, Estonia, Latvia, Ukraine and Kazakhstan, and draw upon further examples from more than a dozen countries to provide a critical evaluation of the use of borders, boundaries and boundary-making in the study of nationalism and ethnicity.

17 Jaiswal, Pramod (Ed.)

Migration and human security in south Asia --New Delhi: Adroit Publishers, 2018 50136

Migration and security have been widely studied in international relations and political science. Migration is often presented as a threat to national sovereignty, state security as well as to the economic, social and cultural well-being. On security, all of the attention has been on national security, terrorism, extremism and crime. Hence, there is an alternative concept, human security, which emphasizes that the government's responsibility is not only to protect the territorial security and sovereign integrity of the state, but also the freedom and rights of its citizens. Thus, the notion of human security provides an opportunity to broaden our understanding of the economic, social and political challenges associated with migration, from the place of origin to transit, arrival and (re)settlement in a new location. South Asia homes about one-fourth of the world's population, making it both the most populous and the most densely populated geographical region in the world. This region has witnessed mass migration as many of the countries have emerged through the partition. Millions migrated between India and Pakistan and thousands during the formation of Bangladesh, ethnic conflict of Sri Lanka, Maoist Movement in Nepal and ethnic conflict of Bhutan.

18 Joseph, Reji K. 50257

Pharmaceutical industry and public policy in post-reform India--New Delhi: Routledge, 2016

This book examines the impact of economic reforms in India on the pharmaceutical industry and access to medicines. It traces the changing production and trade pattern of the industry, research and development (R&D) preferences and strategies of Indian pharmaceutical firms, patent system alongside pricing policy measures and their shortcomings. It also analyses the public health financing system in India driven largely by out-of-pocket expenditure - about 60 per cent - and characterised by very high share of medicines in total health expenditure.

19 Joy, K.J. (Ed.) 50270

Water conflicts in northeast India --London: Routledge, 2018

This volume documents the multifaceted conflicts and contestations around water in Northeast India, analyses their causes and consequences, and includes expert recommendations. It fills a major gap in the subject by examining wide-ranging issues such as cultural and anthropological dimensions of damming rivers in the Northeast and Eastern Himalayas; seismic surveys, oil extractions, and water conflicts; discontent over water quality and drinking water; floods, river bank erosion, embankments; water policy; transboundary water conflicts; and hydropower development. It also discusses the alleged Chinese efforts to divert the Brahmaputra River.

20 Kalaramadam, Sreevidya 50364

Gender, governance and empowerment in India--London:  
Routledge, 2016

This book is an ethnography of the Indian state and its policy of legislated entry of women into political life. It argues that political participation of women is necessary to change the political practices in society, to make institutions more gender, class and caste representative, and to empower individual women to negotiate both formal and informal institutions. Its locus is the everyday life contexts of EWRs in the southern Indian state of Karnataka who negotiate their own meanings of politics, state, society, empowerment and political subjectivity. Analysing three factors - structural boundaries, sociocultural divisions and conjunctural limitations imposed on the participation of EWRs by political parties - the book demonstrates that the social embeddedness of PRIs within everyday practices and social relations of identity and power severely constrain and shape the political participation and empowerment of EWRs.

21 Kamarck, Elaine C. 50085

End of government...as we know it: making public policy work--  
Boulder : Lynne Rienner Publishers, 2007

"The End of Government" explores the emerging contours of this new, postbureaucratic state - the sequel to government as we know it - considering: What forms will it take? Will it work in all policy arenas? Will it serve democratic ideals more effectively than did the bureaucratic state of the previous century? Perhaps most significantly, how will leadership be redefined in these new circumstances? Kamarck's provocative work makes it clear that, in addition to figuring out what to do, today's government leaders face an unprecedented number of options when it comes to how to do things. The challenge of government increasingly will be to choose an implementation mode, match it to a policy problem, and manage it well in the postbureaucratic world.

गोंड जनजीवन और संस्कृति -- नई दिल्ली: सिनर्जी बुक्स इंडिया

देश के सभी राज्यों में गोंड जनजाति निवास कर रही है। प्रस्तुत पुस्तक म प्र के पूर्वांचल डिण्डोरी एवं मंडला जिले की गोंड जनजाति की संस्कृति के सन्दर्भ में लिखी गई है। जनजाति या आदिवासी शब्द अपने में असीम अनुपम और अद्बुध इतिहास संजोये हुए है। इस शब्द का उच्चारण करते ही पुरातन जातियों की एक जलक सामने आ जाती है। आदिवासी अतीत के प्रतिनिधि एवं देश के लिए छिपे हुए दारोहर है। आधुनिक युग की चकाचौंध से दूर आधुनिकता की कृतिम एवं जटिल व्यवहार शैली से अलग तथा आज के भौतिक वैभव एवं भोगवादी जीवन से अपरिचित आकंठ एवं शांत वातावरण में प्रकृति की गोद में रहने वाली गोंड जनजाति के लोग आज भी अपनी प्रथाओं और परम्पराओं से युक्त अपनी मर्यादा और संस्कारों से पुष्ट सामाजिकता का परिचय देते हैं। इन आदिवासियों के जीवन मूल्य और परम्पराओं पर सिहांवलोकन करने के लिए भले ही उनमें आधुनिक विकाश परिलक्षित नहीं होता किन्तु ऐसा प्रतीत होता है कि तथाकथित विकाश की विकृतियों से यह सर्वथा मुक्त है। साक्षरता की आहात कमजोर भले ही हो लेकिन अनुभव की विराट सम्पदा उनके पास है। इसलिए वे पिछड़ेपन के नहीं नैसर्गिक पवित्रता के प्रतिक हैं। सहज मानवीयता सरल जीवन उनकी सम्पदा है।

Philanthropy in India: promise to practice--New Delhi: Sage Publications, 2016

Philanthropy has a very long tradition in India. All practicing religions embody the idea of philanthropy and the concept of daan works across religions and cultures. This book provides unique sociological and empirical perspectives, contrasting what is happening in India vis-A-vis other countries. It documents various government policies that have influenced philanthropy and identifies successful strategies practiced by the general population as well as organizations. Through case studies, narratives and interviews of philanthropists, the book examines various modes of giving--formal and informal, religious and secular, charitable trusts and foundations, NGOs and corporates, diaspora as well as social media platforms--that shape the practice and promise of philanthropy in India today.

24 Kimberly, Etingoff (Ed.) 50349

Urban development for the 21st century: managing resources and creating infrastructure --Oakville : Apple Academic Press, 2016

Urban planners around the world are increasingly concerned with creating and maintaining cities that are healthy for both the environment and for individuals. Cities are at the forefront of the trend toward sustainable living, since they are the site of concentrated population, resource use, and greenhouse gas emissions, yet also have the tools and the resources to address climate change and environmental degradation. Part of the modern urban planner's challenge is to impact individual behavior on a systemic, urban scale, since sustainable cities are made up of systems that encourage sustainable behavior.

- 25 किरपाल, अविनाश 50132  
 महिला उद्यमी: सफलता की प्रेरणादायक कथाएं-- नई दिल्ली : सेज भाषा, 2017  
 'महिला उद्यमी' भारत में महिला उद्यमियों की प्रेरणादायक कथाएं प्रस्तुत करती है। निजी साक्षात्कारों पर आधारित ये कथाएं प्रदर्शित करती हैं कि उद्यमितापूर्ण उपक्रम प्रारंभ करने के लिए प्रेरणा अब आय की पूर्ति की आवश्यकता से नहीं मिलती बल्कि यह प्रेरणा सर्जनात्मक अभिव्यक्ति और निजी प्रगति की पूर्ति से अधिक मिल रही है। 'विभिन्न क्षेत्रों में सफलता अर्जित करने वाली महिलाओं की कहानी को दर्ज करके अविनाश किरपाल ने एक महान सेवा की है और निश्चित रूप से यह पुस्तक अनेक अन्य लोगों को उनके पदचिह्नों का अनुसरण करने हेतु प्रेरित करेगी।' -इशर जज अहलूवालिया, चेयरपर्सन, बोर्ड ऑफ गवर्नर्स, इंडियन काउंसिल फॉर रिसर्च ऑन इंटरनेशनल इकोनॉमिक रिलेशंस (आईसीआरआईईआर)
- 26 Koehn, Peter H. 50371  
 Transnational mobility and global health: traversing borders and boundaries--London: Routledge, 2019  
 The book explores the interacting political, economic, social, cultural, and climatic drivers of health and migration, proposing innovative ways to enhance global health and care provision in an era of transnational mobility. Within the framework of key drivers of unequal mobilities, this book treats interconnected health and migration themes not covered elsewhere under one cover: health tourism, conflict-induced and other vulnerable-population movements, humanitarian crises, human rights, the health-development linkage, migrant health-care, and health-competency education. The book also considers global health vulnerabilities in the wake of climate change, and the biomedical, ethical, and governance challenges of emerging and reemerging infectious diseases. Finally, the book suggests ways of evaluating mobility-influenced health outcomes and equity impacts, and explores how the global circulation of health expertise could help to rectify care-provider shortages.
- 27 Kondoh, Kenji 50389  
 Economics of international immigration: Environment, unemployment, the wage gap and economic welfare--Singapore: Springer, 2017

This is the first book that takes a theoretical approach to the effects of international immigration by considering the current economic topics confronted by more highly developed countries such as Japan. Developed here is the classic trade model by Heckscher–Ohlin–Samuelson, McDougall’s basic model of the international movement factor, the urban–rural migration model by Harris–Todaro, and Copeland–Taylor’s well-known model in the field of environmental economics by introducing new trends such as economic integration including free trade and factor mobility between countries at different stages of development. Coexistence of two types of immigrants – legal, skilled workers and illegal, unskilled workers – without any explicit signs of discrimination, transboundary pollution caused by neighboring lower-developed countries with poor pollution abatement technology, difficult international treatment of transboundary renewable resources, the rapid process of aging and population decrease, the higher unemployment rate of younger generations, and the serious gap between permanent and temporary employed workers—are also considered in this book as new and significant topics under the context of international immigration.

28 Koss, Maren

50311

Resistance, power, and conceptions of political order in Islamist organisations: comparing Hezbollah and Hamas--London: Routledge, 2018

This book provides a comprehensive analysis of Islamist organizations' conceptions of political order based on a comparative case study of the Shiite Lebanese Hezbollah and the Sunni Palestinian Hamas. Based on primary Arabic data the book illustrates that the core norm of resistance, deeply intertwined with both organizations' interactions towards power preservation and the specific political context they are engaged in, characterizes Hezbollah's and Hamas' respective conceptions of political order and explains the differences between them. Bringing new insights from cases that lie beyond the Western liberal world order into Critical Constructivist norm research and resistance studies, the book establishes a theoretical framework that enables scholars to comprehensively analyze Islamist organizations' political orientation in different cases without being caught in limited analytical categories.

29 कॉटलर, फ़िलिप

50176

लोकतंत्र का पतन: भविष्य का पुनर्निर्माण--नई दिल्ली : सेज भाषा, 2017

इस पुस्तक में लेखक तर्क देते हैं कि लोकतंत्र गंभीर खतरे में है। राजनीति में आवश्यकता से अधिक पैसा प्रवेश कर चुका है और इसके दानदाता, जो ज़्यादातर अरबपति और कॉर्पोरेशन्स हैं, अब सिर्फ 1% के पक्ष में लोकतंत्र को प्रभावित कर रहे हैं। मतदान प्रणाली दोषपूर्ण हो चुकी है, कुछ ही नागरिकों में राजनीतिक सजगता है और कई मतदान नहीं करते। बड़ी राजनीतिक पार्टियां नीतियों पर सहमत नहीं हैं और जिस बदलाव की आवश्यकता है, वह नहीं हो रहा। कॉटलर इस निराशाजनक स्थिति का संभावित समाधानों के जरिये सकारात्मकता से सामना करते हैं और लोकतांत्रिक मुद्दों से जुड़ने के लिए आपको आमंत्रित करते हैं।

30 Krishnamurthy, Mathangi 50103

1-800-Worlds: the making of the Indian call centre economy--New Delhi : Oxford University Press, 2018

Indian call centre employees work through the night, sleep during the day and listen to foreign voices in accented tongues over transnational telephone connections. Through a description of the nightly and daily lives of call centre workers in the university town of Pune, India, 1-800-Worlds engages with the complex negotiations that underlie the ostensible success of new service economies. As the author shows, the call centre industry is neither insular nor singular but offers a set of symptoms that can help read changing forms of urban Indian middle-classness.

31 कुमार, कौस्तुभ (Ed.) 50153

विश्व मीडिया विमर्श -- दिल्ली : कल्पना प्रकाशन, 2017

- यह पुस्तक विश्व के लगभग सभी देशों के मीडिया से सम्बंधित तथ्यों और विश्लेषण पर केन्द्रित है। यूं तो तमाम देशों के मीडिया परिदृश्य के बारे में सायबर दुनिया में तथ्यों की भरमार है। लेकिन, इस पुस्तक में करीब 200 देशों के मीडिया के बारे में तथ्यात्मक जानकारी को एक साथ एक ही जिल्द में प्रस्तुत किया गया है। विश्व के सभी देशों के मीडिया का ही विमर्श काफी बृहद और विस्तृत है।

32 कुशवाहा, जिमी सिंह; सिंह, उमेश कुमार एवं जैन, अरिहन्त 50129

जनजातियों में शिक्षा की स्थिति -- नई दिल्ली : एस एस दी एन पब्लिशर्स एवं डिस्ट्रीब्यूटरस, 2016

शिक्षा किसी भी सभ्य समाज की मूलभूत आवश्यकता है। शिक्षा समाज के विकास, आर्थिक उन्नति और सविभौमिक सम्मान के लिए एक आवश्यक घटक है। हर नागरिक का यह मौलिक अधिकार होना चाहिए कि उसे जीने के अधिकार के रूप में शिक्षा का अधिकार भी हासिल हो। यूनस्को की शिक्षा के लिए वैश्विक मॉनिटरिंग रिपोर्ट २०१० के अनुसार, लगभग १३५ देशों ने अपने संविधान में शिक्षा को अनिवार्य कर दिया है। तथा मुफ्त एवं बहू भेदभाव/ रहित शिक्षा सबको देने का प्रावधान किया है। भारत में सन १९५० में १४ वर्ष तक के बच्चों को मुफ्त तथा अनिवार्य शिक्षा देने के लिए संविधान प्रतिबद्धता का प्रावधान किया था। इसे अनुच्छेद ४५ के तहत राज्य के नीति-निर्देशक सिद्धांतों में शामिल किया गया है। कि इससे विद्यालय छोड़ने तथा विद्यालय जाने वाले बच्चों को अच्छी गुणवन्ता की शिक्षा प्रशिक्षित शिक्षकों के माध्यम से दी जा सकेगी।

33 Lacina, Bethany

50312

Rival claims: ethnic violence and territorial autonomy federalism--  
Ann Arbor: University of Michigan Press, 2017

Using new data on ethnicity and sub-national discrimination in India, national and state archives, parliamentary records, cross-national analysis and her original fieldwork, Lacina explains ethnoterritorial politics as a three-sided interaction of the center and rival interests in the periphery. Ethnic entrepreneurs use militancy to create national political pressure in favor of their goals when the prime minister lacks clear electoral reasons to court one regional group over another. Second, ethnic groups rarely win autonomy or mobilize for violence in regions home to electorally influential anti-autonomy interests. Third, when a regional ethnic majority is politically important to the prime minister, its leaders can deter autonomy demands within their borders, while actively discriminating against minorities.

34 Lautze, Jonathan (Ed.)

Key concepts in water resource management: a review and critical  
evaluation --London: Routledge, 2014

50336

This book applies critical scrutiny to a prominent set of new but widely used terms, in order to clarify their meanings and improve the basis on which we identify and tackle the world's water challenges. More specifically, the book takes stock of what several of the more prominent new terms mean, reviews variation in interpretation, explores how they are measured, and discusses their respective added value. It makes many implicit differences between terms explicit and aids understanding and use of these terms by both students and professionals. At the same time, it does not ignore the legitimately contested nature of some concepts. Further, the book enables greater precision on the interpretational options for the various terms, and for the value that they add to water policy and its implementation.

35 Lee, Jong-Wha 50365

Is this the asian century--New Jersey: World Scientific Publishing, 2018

Comprises 25 articles which the author has published on the Project Syndicate website since 2012. These articles are grouped into four broad topics: (1) Growth and Structural Adjustment, (2) Economic Integration and Cooperation, (3) Business, Money, and Finance, and (4) Education and Society. Through these selected works, the author explores whether the Asian Century is coming to pass or not and how Asian economies prepare for such century. The author also presents his analyses of Asia's economic transformation as well as social and cultural changes, and suggests the ways that Asian economies can overcome major economic and social challenges to continue their path towards a more balanced and sustainable growth in the 21st century. This book serves as a useful reference text for those who seek to understand the Asian economies, and contributes to ongoing policy debate on Asia's economic future"-- Provided by publisher.

36 Leher, Stephan P. 50294

Dignity and human rights: language philosophy and social realizations --New York: Routledge, 2018

Drawing on European philosophical enlightenment to rethink dominant theories of contemporary Western Human Rights, Stephan P. Leher explores the philosophical foundation of the concept of "dignity" and Human Rights. Using specific examples from Africa and Latin America to explain these concepts as social realizations in the world, Leher demonstrates the link between justice and peace and contends that dignity, freedom and Human Rights law rule are social realizations and claims by all people. With the help of language philosophy, he argues that sentences and propositions about social choices and realizations of real life expressed in ordinary language constitute the basic elements of the foundation and protection of human dignity and Human Rights. The social choice to claim one's freedom and rights can be considered the dignity agency of the individual.

37      Liu-Farrer, Gracia and Yeoh, Brenda S.A. (Ed.)      50343

Routledge handbook of Asian migration --London: Routledge, 2018

Housing more than half of the global population, Asia is a region characterised by increasingly diverse forms of migration and mobility. Offering a wide-ranging overview of the field of Asian migrations, this new handbook therefore seeks to examine and evaluate the flows of movement within Asia, as well as into and out of the continent. Through in-depth analysis of both empirical and theoretical developments in the field, it includes key examples and trends such as British colonialism, Chinese diaspora, labour migration, the movement of women, and recent student migration.

38      Lokhande, Sanjeevini Badigar      50115

Communal violence, forced migration and the state: Gujarat since 2002 --Delhi: Cambridge University Press , 2015

When violence occurs in democracies it is often characterized as an aberration. The state that saw human rights violations and failure of law and order in Gujarat in 2002 emerged, even if by its own admission, as a model for good governance. Communal Violence, Forced Migration and the State, through an account of displaced Muslims, challenges this notion. Through the unlikely yet probing lens of displacement, it offers fresh insight into communal violence and is an important resource for the emerging domain of forced migration and the changing nature of the state in a globalized world.

39      Lynn, Laurence E.      50084

Public management: old and new--New York: Routledge, 2006

Offering much more than a purely theoretical or retrospective view of public management, this exciting text is an invaluable new addition to the field of public management. Putting the American model in perspective, it establishes the historical, theoretical, analytical, practical and future foundations for the comparative study of public management.

ASEAN Miracle: a catalyst for peace --New Delhi: Oxford University Press, 2018

In an era of growing cultural pessimism, many thoughtful individuals believe that different civilisations – especially Islam and the West – cannot live together in peace. The ten countries of ASEAN provide a thriving counter-example of civilizational co-existence. Here 625m people live together in peace. This miracle was delivered by ASEAN. In an era of growing economic pessimism, where many young people believe that their lives will get worse in coming decades, Southeast Asia bubbles with optimism. In an era where many thinkers predict rising geopolitical competition and tension, ASEAN regularly brings together all the world's great powers.

41 Major, Rene and Talagrand, Chantal 50321

Freud: The unconscious and worlds affairs--London: Routledge, 2018

This book sheds a new light on Freud who, from the beginning, was aware that the edifice he was constructing - psychoanalysis - which revealed in each individual an "ego not master in its own house" -, had clear implications for understanding collective human behaviour. This man was profoundly concerned with matters of peace and war, religion, morality and civilisation.

Transnational commercial surrogacy and the(Un) making of Kin in India --New Delhi: Oxford University Press, 2017

Drawing from conversations with foreign couples coming to India to hire Indian surrogates through Indian fertility clinics, Indian surrogates, lawmakers, and clinicians, this book engages with multiple facets of the transnational commercial surrogacy process: the politics of foreign gay couples seeking families through surrogacy in India, identity giving processes to the babies born to foreign couples, the clinicians understanding of kinship, the networks of commerce and surrogacy agents, and the ways in which the surrogate and her husband position themselves within the arrangement.

- 43 Mallet, Victor 50144  
 River of life, river of death: the Ganges and India's future--New Delhi : Oxford University Press, 2017
- India is killing the Ganges, and the Ganges in turn is killing India. The waterway that has nourished more people than any on earth for three millennia is now so polluted with sewage and toxic waste that it has become a menace to human and animal health. 0Victor Mallet traces the holy river from source to mouth, and from ancient times to the present day, to find that the battle to rescue what is arguably the world's most important river is far from lost. As one Hindu sage told the author in Rishikesh on the banks of the upper Ganges (known to Hindus as the goddess Ganga): "If Ganga dies, India dies. If Ganga thrives, India thrives. The lives of 500 million people is no small thing." 0Drawing on four years of first-hand reporting and detailed historical and scientific research, Mallet delves into the religious, historical, and biological mysteries of the Ganges, and explains how Hindus can simultaneously revere and abuse their national river.

 Organizations-- Massachusetts: Blackwell Publishers, 1993
- March and Simon's Organizations has become a classic in the field of organizational management for its broad scope and depth of information. Written by two of the most prominent experts in the field, this book offers invaluable insight on all aspects of organizational culture through deep discussion of organization theory. The definitive reference for topics including bounded rationality, satisficing, inducement/contribution balances, attention focus, uncertainty absorption and more, this seminal text offers authoritative insight with a practical grounding in the field.
- 46 Marks, Steven G. 50401  
 The information nexus: global capitalism from the renaissance to the present--Cambridge: Cambridge University Press, 2016

Steven G. Marks' provocative new book calls into question everything we thought we knew about capitalism, from the word's very origins and development to the drivers of Western economic growth. Ranging from the Middle Ages to the present, *The Information Nexus* reveals that the truly distinctive feature of capitalism is business's drive to acquire and analyze information, supported by governments that allow unfettered access to public data. This new interpretation of capitalism helps to explain the rise of the West, puts our current information age into historical perspective, and provides a benchmark for the comparative assessment of economic systems in today's globalized environment.

47 Mathur, Birendra Prasad 50206

Alternative philosophy of development: from economism to human well being--London: Routledge, 2017

While development has been the foremost agenda before successive governments in India, it has been viewed narrowly - from the perspective of economic development and particularly in terms of gross domestic product (GDP). This book questions such an approach. It breaks from the conventional wisdom of GDP growth as being a definitive measure of the success of a country's policies and offers an alternative development philosophy. The author contends that people's economic and social welfare, life satisfaction, self-fulfilment and happiness should be treated as indicators of real development. The book underlines that in a successful model of development, the country's economic policies will have to synergize with its cultural ethos and that the objective of development should be gross national happiness and well-being of the people.

Sweatshop regime: labouring bodies, exploitation and garments made in India--Delhi: Cambridge University Press, 2017

Drawing from Marxian and feminist insights, the book theorises the garment sweatshop in India as a complex 'regime' of exploitation and oppression, jointly crafted by global, regional and local actors, composed of factory and non-factory settings, and working across productive and reproductive realms. The analysis shows the tight correspondence between the physical and social materiality of garment production in India; illustrates the great social differentiation and complex patterns of labour unfreedom at work in the industry; and depicts the sweatshop as a composite 'joint enterprise' against the labouring body, which is inexorably depleted and consumed by garment work, even in the absence of major industrial disasters. By placing labour at the centre of the analysis of processes of development and globalisation, the book critically engages with key debates on industrial modernity, modern slavery, and ethical consumerism.

- 50 Micel, Thomas J. 50383  
Contemporary issues in law and economics--New York: Routledge, 2018
- This book explores the "law and economics" approach to some of the most interesting questions, issues, and topics in law, order, and justice. Contemporary Issues in Law and Economics considers what economists call the "positive" analysis of the law - that is, using economic theory to explain the nature of the law as it actually exists. As part of this approach the author examines questions such as, what is the economic basis for the predominance of negligence rules in tort law? And, what is the explanation for the illegality of blackmail? Furthermore, another set of questions arises where the law seems to depart from the prescriptions of economic theory, and these issues are also examined in this volume. For example, the deeply rooted norm of proportionality between punishments and crimes, and the use of escalating penalties for repeat offenders, are both explored.
- 51 Miletzki, Janna and Broten, Nick 50326  
Analysis of Amartya Sen's - development as freedom--London: Routledge, 2017
- Having come to the conclusion that development is best summed up as the expansion of freedom, Sen examines traditional definitions and understandings of the term. He says people tend to think of freedoms as economic (the freedom to enter into market exchanges) or political (the freedom to vote and be an active citizen), and tries to understand why the definition has been so narrow hitherto. He concludes that an evaluation of true freedom must necessarily include the freedom to access social services such as healthcare, sanitation and nutrition, just as much as it must acknowledge economic and political freedoms. Evaluating the relevance of the current thinking behind development, Sen concludes that the term 'freedom' cannot simply be about income. In many ways, measuring income does not account for various "unfreedoms" (manmade or natural bars to wellbeing) that hinder development
- 52 Mishra, Ajit and Ray, Tridip (Ed.) 50251  
Markets, governance and institutions in the process of economic development--New Delhi: Oxford University Press, 2018

Written by Professor Basu's past and present collaborators and research students it offers original insights and perspectives on issues relating to well-being, freedom, and institutions in the developmental context. The contributions in this volume, theoretical as well as empirical, reflect this range of issues in the broader context of interactions between markets, governance, and institutions in the process of economic development. Divided into three distinct sections covering foundational and measurement issues associated with economic development and well-being; functioning (and non-functioning) of the market in the context of development; and structure and design issues relating to governance and institutions, this book provides a clear focus for academics and economists considering development policy questions.

Corruption and development in Indian economy--Delhi: Cambridge University Press, 2016

The book examines how corruption is viewed in theoretical and empirical literature and how various macro- and micro-level approaches have been followed to study the issue. It offers an inter-country comparison of corruption, indicating the role of governance in the context of growth. The volume attempts to work out the extent of understatement of personal income, resulting in the loss of government revenue from personal income tax. It also examines the impact of corruption on performance, and studies determinants of bribery in an attempt to understand why some firms pay bribes while others do not, despite being subject to the same macroeconomic environment, policy and regulations.

- Millennial city: trends, implications and prospects for urban planning and policy--London : Routledge, 2018

This book assesses the impact of Millennials on cities. It asks how the Millennial generation differs from previous generations in terms of their labour market experiences, housing outcomes, transportation decisions, the opportunities available to them, and the constraints they face. It also explores the urban planning and public policy implications that arise from these generational shifts.

58 Mukherji, Gangeya (Ed.)

Learning non-violence--New Delhi: Oxford University Press, 2016 50131

The essays in this volume engage on one plane with the totality of the concept, while at another they acknowledge the porosity of the idea of non-violence, particularly with respect to praxis or what can be thought of as learnt non violence. Conceived and osmotically structured around four themes - religion, protest, the modern condition, and the world today - the book is an invitation to consider the practical possibilities of non violence.

Auto-industrialism: DIY capitalism and rise of the auto-industrial society--London: Sage Publications, 2017

DIY check-outs, drones, self-driving cars, and e-government all are signs of the coming auto-industrial age. Will this end in mass unemployment or will new kinds of work emerge? Will 3D print production, desktop workshops and mass customization make up for lost blue-collar jobs? What will happen to health and education in the auto-industrial age? Will machines replace teachers and doctors? What might the economic and social future dominated by self-employment and a large DIY industry look like? Peter Murphy's lively, provocative book addresses these questions head-on.

Stepping into the Elite: trajectories of social achievement in India, France, and the United States --New Delhi: Oxford University Press, 2018

The experience of shifting from one social class to another—from a dominated group to a dominant group—raises the question of how the upwardly mobile person relates to his/her group of origin. Stepping into the Elite traces the particular ways in which upwardly mobile people in India, France, and the United States—countries embodying three distinct stratification systems—make sense of this change. Given that people draw upon specific cultural tools or repertoires to analyse their world and situate themselves in it, Naudet identifies the extent to which narratives of ‘success’ vary from one country to another. A sociological journey in three different cultural contexts, this book deftly ties the exploration of questions regarding transformation of social identity and views on being successful.

Employment, growth and development: essays on a changing world economy --London: Routledge, 2017

This book examines the critical themes of employment, growth and development to focus on challenges and opportunities, both old and new, in the contemporary world economy. The essential theme that runs through the book is that there is a strong relationship not only between employment and growth, but also between employment and development, where the causation runs in both directions. The author shows how employment transforms economic growth into meaningful development by providing livelihoods and incomes to people. While the book is primarily concerned with developing countries, it considers industrialized countries as points of reference or comparison, since the latter are a large part of an interdependent world, in which problems faced by the two sets of countries are frequently connected and sometimes common.

50235

Globalization lived locally: a labour geography perspective--New Delhi: Oxford University Press, 2016

The various metanarratives of globalization project hyper-mobile capital as the leading factor for global economic integration, ignoring the role of labour. Questioning this paradigm, this book reasons that labour becomes actively involved in the very process of globalization and capital expansion. Based on the broad theme of globalization and labour, particularly female labour, the author applies the 'labour geography' approach to examine contemporary forms of labour control, conflict, and response under a globalization regime in Kerala through four diverse and in-depth empirical case studies set in this state. In view of dramatic changes in the labour scenario in Kerala over the second half of the twentieth century, this book constructs a collage of trends in Kerala's labour scene, in an analysis that departs from economic orthodoxy and borrows from sociological, anthropological, and partly ethnographic approaches to highlight the role played by seemingly unlikely actors in the process of globalization.

63 Nootboom, Bart (Ed.) 50398

How markets work and fail, and what to make of them--Cheltenham: Edward Elgar Publishing, 2014

In this thought-provoking book, Bart Nootboom offers a radical critique of the principal intellectual and moral assumptions underlying economic science, unravelling the notion of markets: how they work and fail, and how they may be redirected to better serve us. Initially, the inadequacy of economic science in the wake of recent financial and economic crises is outlined. Few economists predicted the crises and subsequent economic thought has been nebulous, failing to apprise guidance, understanding and prevention for the future. Bart Nootboom employs an Aristotelian virtue ethic, with a view to multiple dimensions of 'the good life', upturning the utilitarian ethic that dominates economic science and modern politics. Nootboom's interdisciplinary approach makes this book an appealing read to economists, sociologists and political scientists with an interest in market processes. People concerned about how markets are developing and policy makers will welcome this topical work to gain fresh insights into collaborative and ethical market policy.

Marine and coastal ecosystem valuation, institution and policy in South East Asia --Singapore: Springer, 2016

This book is a compendium of case studies illustrating how economic tools and techniques can be used to address a wide range of problems in the management and conservation of marine and coastal ecosystems in a developing country context. The studies, which were conducted with support from the Economy and Environment Program for Southeast Asia (EEPSEA), cover topics such as mobilizing conservation finance from beneficiaries of marine and coastal ecosystem services; quantifying ecosystem damage and its impact on dependents of ecosystem resources and services; determining the best package of policy reforms that put a price on pollution and regulate economic activities generating pollution with the goal of restoring coastal and marine resources; and analyzing community-based institutions that support sustainable management of fisheries and coastal resources.

Urban biodiversity: from research to practice --London: Routledge, 2018

Urban biodiversity is an increasingly popular topic among researchers. Worldwide, thousands of research projects are unravelling how urbanisation impacts the biodiversity of cities and towns, as well as its benefits for people and the environment through ecosystem services. Exciting scientific discoveries are made on a daily basis. However, researchers often lack time and opportunity to communicate these findings to the community and those in charge of managing, planning and designing for urban biodiversity. On the other hand, urban practitioners frequently ask researchers for more comprehensible information and actionable tools to guide their actions. This book is designed to fill this cultural and communicative gap by discussing a selection of topics related to urban biodiversity, as well as its benefits for people and the urban environment. It provides an interdisciplinary overview of scientifically grounded knowledge vital for current and future practitioners in charge of urban biodiversity management, its conservation and integration into urban planning.

Women in the Indian diaspora: historical narratives and contemporary challenges --Singapore: Springer, 2018

This volume brings into focus a range of emergent issues related to women in the Indian diaspora. The conditions propelling women's migration and their experiences during the process of migration and settlement have always been different and very specific to them. Standing 'in-between' the two worlds of origin and adoption, women tend to experience dialectic tensions between freedom and subjugation, but they often use this space to assert independence, and to redefine their roles and perceptions of self. The central idea in this volume is to understand women's agency in addressing and redressing the complex issues faced by them; in restructuring the cultural formats of patriarchy and gender relations; managing the emerging conflicts over what is to be transmitted to the following generations; renegotiating their domestic roles and embracing new professional and educational successes; and adjusting to the institutional structures of the host state.

Economics of knowledge generation and distribution: the role of interactions in the system dynamics of innovation and growth --New York: Routledge, 2015

Contemporary capitalistic systems have been undergoing profound transformations determined by the transition towards the so-called knowledge based economy, i.e. a competitive system based on the capabilities firms have to create, use and circulate knowledge. These transformations concern both the characteristics of productive and innovative processes, and the resources used in these activities. This book captures these changes, where traditional R&D investments undertaken internally by firms are increasingly and strategically complemented by external sources of innovation and new knowledge. The circulation and distribution of knowledge is now a key input in the production of knowledge. Knowledge and innovation are understood as the result of collective and interactive processes at the system level, and less at the micro level. In other words, new knowledge production is less and less the result of individualistic behaviours of the firms and much more the effect of explicit and pro-active interactions and transactions put in place by local networks of innovators.

Revisiting gendered states: feminist imaginings of the state in international relations--New York : Oxford University Press, 2018

This book aims to connect the earlier debates of Peterson's book with the gendered state today, one that exists within a globalized and increasingly securitized world. Bringing together an international group of contributors from the Global South, United States, Europe, and Australia, this volume will answer three overarching questions. First, it will answer whether the concept of a "gendered state" is generic or if some states are particularly gendered in their identities and interests, and with what implications for the type of citizenship, society, and international security. Second, it will look at the continued theoretical significance of the gendered state for current IR scholarship. And, finally, it will explain to what extent postcolonial states are distinctive from metropolitan states with regard to gender. Including scholars from International Relations, Postcolonial Studies, and Development Studies, this volume collectively theorizes the modern state and its intricate relationship to security, identity politics, and gender.

Debating India: essays on Indian political discourse--New Delhi: Oxford University Press, 2015

India has had a long tradition of public debate going back to around 1000 BCE. But surprisingly, the knowledge of its existence has largely remained confined to a small field of critics or specialists. Debating India traces the origins and development of the Indian tradition of public debate and the various forms it took at different times in Indian history. It examines some of the major debates that occurred during the independence struggle and the ways in which they structured the conceptual and moral parameters of the Indian political imagination. The debates involved Gandhi, Tagore, Nehru, Ambedkar, and Hindu militants, and centred on the kind of country India was and should aspire to be. Gandhi's non-violent struggle claims to provide an answer to deep differences of views and conflicts of interest. Presenting riveting accounts, such as of Einstein's views on Gandhi's philosophy of Ahimsā or of Gandhi-Tagore debates, and through an imaginary dialogue between Gandhi and Osama bin Laden, Parekh critically examines the strengths and weaknesses of Gandhian philosophy.

Pax Gandhiana: the political philosophy of mahatma gandhi--New Delhi: Oxford University Press, 2016

Notwithstanding his contributions to religion, nonviolence, civil rights, and civil disobedience, among other areas, Gandhi's most significant contribution is that as a political philosopher. While he is not often treated as such, Gandhi was, as Anthony J. Parel argues, a political philosopher sui generis, both in his philosophical method of constant self-criticism and his framework of philosophical analysis. The main contention of Pax Gandhiana is that peace cannot be achieved by politics alone. Peace requires the confluence of the canonical ends of life: politics and economics (artha), ethics (dharma), forms of pleasure (kama), and the pursuit of spiritual transcendence (moksha). Modern political philosophy isolates politics from the other three ends, but Gandhi's originality, according to Parel, lies in the way that he brings all four together. In fact Gandhi's political philosophy is relevant not only to India but also to the rest of the world: it is a new type of sovereignty that harmonizes the interest of individual states with the community of states.

Reflective shadows: political economy of the world bank lending to India--New Delhi: Oxford University Press, 2017
- India, one of the founding members of the World Bank, is also the Bank's single largest borrower since its inception. There are natural curiosities to know how the relationship between the two has evolved through fluctuations in India's political and economic scenario. Based on years of grassroots-level experience in political processes, Nagesh Prabhu charts out a comprehensive assessment of various facets of this relationship. This book examines the relevance of the World Bank's lending to India across sectors and states, highlighting its influence on structural adjustments during the nation's pre- and post-liberalization phases. Bringing out the role of bureaucracy and industry in the country's negotiations with the Bank, the book also focuses on the effectiveness and impact of World Bank aid to India.

Kerala's economic development: emerging issues and challenges-- New Delhi: Sage Publications, 2018
- Kerala's development experience has attracted worldwide attention due to its paradoxical development: attaining higher quality of life of people on the one hand and continuation of the backward productive sectors on the other. The state's economy remained backward in many respects and relied heavily on the remittance of Keralite emigrants. The implementation of liberalisation and globalisation policies since 1991 radically altered the growth process and Kerala achieved higher rates of investment and growth and greater technological change. These policies, however, have not only provided enormous opportunities, but also new challenges. This book examines the state's economic growth as well as the issues that have accompanied the policy changes.

Gaining currency: the rise of the renminbi--New Delhi: Oxford University Press, 2017

China's currency, the renminbi (RMB), has taken the world by storm. The RMB is well on its way to becoming a significant international currency, one that is used widely in international trade and finance. This book documents the RMB's impressive rise, with China successfully adopting a unique playbook for promoting its currency. China's growing economic might, expanding international influence, and the rise of its currency are all intricately connected. The book documents how China's government has tied these goals together, enabling faster progress towards each of them. But there are many pitfalls ahead, both for China's economy and its currency. The International Monetary Fund has elevated the RMB to the status of an official reserve currency, a currency that foreign central banks use to keep their rainy day funds. If China plays its cards right, with reforms that put its economy and financial markets on the right track, the RMB is going to become an important reserve currency that could rival some of the traditional reserve currencies such as the euro and the Japanese yen. But this book argues that there are limits to the RMB's ascendance-the hype about its inevitable rise to global dominance is overblown.

Librarianship in 21st century--New Delhi: Ess Ess Publications, 2016

Librarianship, which involves a number of interrelated functions and activities, aims at serving the user population with knowledge and information. The multiple facets of librarianship are greatly influenced by the application of information and communications technology (ICT). Acquisition, organization, storage and retrieval techniques have been modified and improved in the light of new technologies. LIS professionals are expected to be well-versed with the ICT tools. ICT can help libraries to develop a collaborative and participative environment that is necessary to develop user-centric library services. Advancement in technology has made online connectivity easier and faster, helping the libraries to share the knowledge resources in real time. Web technology gives libraries the opportunity to offer improved customer driven service to the users. With so many technological changes occurring so quickly, virtual libraries will soon become a reality

Societal burden of child abuse: long-term mental health and behavioral consequences --Oakville: Apple Academic Press, 2016

Research into the effects of child abuse has experienced an explosion over the last few decades, resulting in a far more wide-ranging understanding of this grave societal problem. This compendium volume collects some of the most recent research and organizes it within three categories: societal effects, effects on health (including mental health) behaviors, and epigenetic effects. Edited by a Harvard developmental behavioral pediatrician, this important compendium offers state-of-the-art knowledge to professionals and graduate students in the helping fields. The articles collected here provide researchers with foundations for further investigations, while they give active professionals greater power in the fight against child abuse.

80 Puga, Ismael 50351

Analysis of c. wright mills's: the sociological imagination--London: Routledge, 2017

At its heart, the work is a closely reasoned argument about the nature and aims of sociology, one that sets out a manifesto and roadmap for the field. Its wide acceptance and popular reception is a clear demonstration of the rhetorical power of Wright's strong reasoning skills. In critical thinking, reasoning involves the creation of an argument that is strong, balanced, and, of course, persuasive. In Mills's case, this core argument makes a case for what he terms the "sociological imagination", a particular quality of mind capable of analyzing how individual lives fit into, and interact with, social structures. Only by adopting such an approach, Mills argues, can sociologists see the private troubles of individuals as the social issues they really are. Allied to this central argument are supporting arguments for the need for sociology to maintain its independence from corporations and governments, and for social scientists to steer away from 'high theory' and focus on the real difficulties of everyday life. Carefully organized, watertight and persuasive, *The Sociological Imagination* exemplifies reasoned argument at its best.

81 Quay, John (Ed.) 50378

Theory and philosophy in education research: methodological dialogues--London: Routledge, 2018

The issue of methodology is a fundamental concern for all who engage in educational research. Presenting a series of methodological dialogues between eminent education researchers including Michael Apple, Gert Biesta, Penny Enslin, John Hattie, Nel Noddings, Michael Peters, Richard Pring and Paul Smeyers, this book explores the ways in which they have chosen and developed research methods to style their investigations and frame their arguments. These dialogues address the specialized and technical aspects of conducting educational research, conceptualize the relationship between methodology and theory, and provide in-depth discussion of concerns including falsifiability, openness, interpretation and researcher judgement. Foregrounding the researchers' first-hand experience and knowledge, this book will provide future and current researchers with a deeper comprehension of the place of theory in education research. An illuminating resource for undergraduate and postgraduate researchers alike, *Theory and Philosophy in Education Research* confronts the intricate complexities of conducting education research in a highly engaging and accessible way.

*Out of the shadows?: the informal sector in post-reform India--New Delhi: Oxford University Press, 2016*

In recent years, developing economies, including India, have undergone considerable structural change. The informal sector continues to be a significant component of manufacturing activity in these economies. Yet, despite its large presence, the sector does not seem to contribute much to India's economy, which has grown rapidly since the 1991 reforms. This volume examines the presence of 'manufacturing dualism'—a large but less productive informal sector alongside a modern and more productive formal sector—and assesses how informal manufacturing firms have responded to economic liberalization in India. The chapters analyse the various aspects of informality in India's manufacturing sector using rich firm-level data from large, nationally representative surveys spanning two decades of reforms. They argue that concerted government action is needed to allow the informal sector to come out of the shadows and contribute more to India's economic growth.

83 Raju, Saraswati and Jatana, Santosh (Ed.) 50154

*Women workers in urban India --Delhi : Cambridge University Press, 2016*

This volume examines the role of women workers who are joining the workforce in urban India. Employment opportunities have opened up and are constantly expanding for women, but this book interrogates whether their working status is breaking gender stereotypes or reaffirming them. It argues that whether women are working in offices or from home, contributing to the IT sector or labouring as petty producers, they are unable to break out of the gendered codes that place them at the lower rungs of the occupational ladder. More importantly, the hierarchical social order, comprising caste, class and ethnic identities, seems to echo in the gendered structure of the labour market as well

84 Ramakumar, R. (Ed.) 50255

Note-Bandi: demonetisation and India's elusive chase for black money --New Delhi: Oxford University Press , 2018

The demonetisation of November 2016 will go down in history as one of the most intensely debated economic policy interventions of the Indian state. With the abolition of the legal tender status of Rs 500 and Rs 1,000 notes, about 86 per cent of the currency in circulation stood withdrawn from circulation in the economy. This work analyses in detail the conception and implementation of demonetisation, its impact on different spheres of the economy and sections of the people, and various claims of the government vis-à-vis demonetisation. It tries to locate the two demonetisations of 1978 and 2016 within the broader questions of tax evasion and the generation and storage of black money in India over the last six decades. It has a comprehensive introduction, supported by writings from the archives of the Economic & Political Weekly.

Economics of poverty: history, measurement, and policy--New Delhi: Oxford University Press, 2016

The Economics of Poverty strives to support well-informed efforts to put in place effective policies to assure continuing success in reducing poverty in all its dimensions. The book reviews critically the past and present debates on the central policy issues of economic development everywhere.

Martin Ravallion holds the inaugural Edmond D. Villani Chair of Economics at Georgetown University, USA, prior to which he was the Director of the World Bank's research department.

86 Ray, Saon 50234

Global value chains and the missing links: cases from indian industry --London: Routledge, 2018

Global value chains (GVCs) are fraught with the phenomenon of fragmentation and dispersion of production across the world. India presents a unique example with its high potential in manufacturing capability but low integration in GVCs. The chapters bring together case studies from across the manufacturing industry – labour-intensive (garment, paper and diamond), capital-intensive (automobile and petrochemical), and knowledge-intensive (semiconductor microchip, chemical and pharmaceutical) sectors. Together, they present stories of successful integration of some firms in GVCs as well as the difficulties faced by them. The volume also highlights the importance of GVCs in the context of developing countries in terms of benefits such as income and value generation, knowledge and technology collaborations, and advances in systems and processes.

87 Rode, Philipp 50334

Governing compact cities: How to connect planning, design and transport--Cheltenham: Edward Elgar Publishing, 2018

Governing Compact Cities investigates how governments and other critical actors organise to enable compact urban growth, combining higher urban densities, mixed use and urban design quality with more walkable and public transport-oriented urban development. Philipp Rode draws on empirical evidence from London and Berlin to examine how urban policymakers, professionals and stakeholders have worked across disciplinary silos, geographic scales and different time horizons since the early 1990s. With an interdisciplinary approach connecting urban studies and planning with political science, public administration and organisational studies, this book will be of interest to academics and students in those disciplines, as well as urban practitioners and the applied/policy research community.

88 Rodrik, Dani 50220

Economics rules: why economics works, when it fails, and how to tell the difference--New York: Oxford University Press, 2017

Dani Rodrik argues that the multiplicity of theoretical frameworks - what economists call 'models' that exist side by side is economics' great strength. Economists are trained to hold diverse, possibly contradictory models of the world in their minds. This is what allows them, when they do their job right, to comprehend the world, make useful suggestions for improving it, and to advance their stock of knowledge over time. In short, it is what makes economics a 'science' a different kind of science from physics or some other natural sciences, but a science nonetheless. Economists are prone to fads and fashions, and behave too often as if their discipline is about the search for the model that works always and everywhere, rather than a portfolio of models. Their training lets them down when it comes to navigating among diverse models and figuring out which one applies where. Ideology and political preferences frequently substitute for analysis in choosing among models. So the book offers both a defence and critique of economics. Economists' way of thinking about social phenomena has great advantages.

Ujjivan: transforming with technology --New Delhi: Oxford University Press, 2018

Since 2005, when it opened its doors for business, Ujjivan has seen rapid growth. Starting off as a microfinance organization that gave small, unsecured loans to poor businesswomen, Ujjivan gradually expanded to offer agricultural, education, home-improvement, home-purchase, and livestock loans. Today, Ujjivan is a small finance bank. Its burgeoning customer base and robust balance sheet are resounding proof that lending to the poor can be a good business, making it a shining example of conscious capitalism done right. Read Ujjivan: Transforming with Technology for a behind-the-scenes look at how Ujjivan is chasing its credo—building a better life for those left behind.

 Reconceptualizing study in educational discourse and practice. --  
 New York: Routledge, 2017
- Addressing studying as a distinct educational concept and phenomenon in its own right, the essays in this volume consider study and studying from a range of perspectives. Countering dominant educational discourses, which place a heavy emphasis on learning and instruction, the contributors explore questions such as: What does it mean to study something? How is studying something different from being taught about it, or learning something about it? What does the difficulty demanded by study mean for the one who studies and for the teacher? What mode of existence does study induce? The book highlights the significance of study not only, or even primarily, for its educational outcome, but as a human activity.
- 92 Ruparelia, Sanjay 50163  
 Divided We Govern: coalition Politics in Modern India--Delhi: Oxford University Press, 2016
- Sanjay Ruparelia provides a fine-grained analytic narrative to challenge this prevailing wisdom. Employing a variety of methods and resources, including the rare confidential testimonies of key political actors, Ruparelia demonstrates how the politics of each governing coalition, despite their self-evident flaws and short-lived tenures, revealed the outlines of a distinctive national vision. His fresh analysis of the politics of coalition in India also yields wider theoretical insights. Most studies fail to question or explain how these multiparty governments actually functioned. Hence they overstate the stability of and polarity between multiple political motivations, Ruparelia contends, discounting internal party debates over whether to share power, with whom and to what extent, and how. In such circumstances, the strategies, tactics and choices of actors become especially significant.
- 93 Saetnan, Ann Rudinow; Schneider, Ingrid and Green, Nicola (Ed.) 50368  
 Politics of big data: big data, big brother? --London: Routledge, 2018

Big Data, gathered together and re-analysed, can be used to form endless variations of our persons - so-called 'data doubles'. Whilst never a precise portrayal of who we are, they unarguably contain glimpses of details about us that, when deployed into various routines (such as management, policing and advertising) can affect us in many ways. How are we to deal with Big Data? When is it beneficial to us? When is it harmful? How might we regulate it? Offering careful and critical analyses, this timely volume aims to broaden well-informed, unprejudiced discourse, focusing on: the tenets of Big Data, the politics of governance and regulation; and Big Data practices, performance and resistance. An interdisciplinary volume, *The Politics of Big Data* will appeal to undergraduate and postgraduate students, as well as postdoctoral and senior researchers interested in fields such as Technology, Politics and Surveillance.

*Measuring India: the nation's statistical system*--New Delhi: Oxford University Press, 2017

Reliable and up-to-date statistics are crucial for planning the economic advancement of a nation. This book presents a comprehensive assessment of statistics relating to the present structure of India's economy providing a sound factual basis for formulating development programmes. It discusses the various concepts, definitions, and procedures involved in collecting, compiling, and publishing these data, understanding their reliability as well as limitations to arrive at meaningful conclusions. Covering statistics on agricultural, industrial, labour, financial, as well as key socio-economic indicators of education, health, environment, this book also compares statistical systems followed in India with those followed internationally. It further elaborates on the comparability of different datasets over time and across organizations pointing out gaps in the available statistics.

95 Samers, Michael 50338

*Migration*--London: Routledge, 2017

Now in its second edition, Migration remains the only text in more than a decade that emphasizes how geographical or spatial concepts can be used critically to understand migration. The multi-disciplinary text draws on insights from human geography, political science, social anthropology, sociology, and to a lesser extent economics. All of the chapters focus on key terms, theories, concepts, and issues concerning migration and immigration. The book argues that in the context of migration, two opposing 'spatial positions' have emerged in the wake of the critique of 'methodological nationalism'. On one hand is the significance of 'transnationalism', and on the other, the importance of 'sub-national' or local processes.

Child labour in India: globalization, power, and the politics of international children's rights --New Delhi: Oxford University Press, 2016

India has the largest number of child labourers in the world, and has been the subject of intense media and political campaigns in the North aimed at addressing the abuse of children's rights. This book explores children's rights as a site of power and reveals how the rights discourse has been used by international actors, national elites, and local NGOs in the child labour debate in India. While discussing the children's rights in the contemporary world, the author analyses human rights and power along with insights from postcolonial theorists. He provides empirical accounts of how three Indian NGOs—Bonded Labour Liberation Front, Butterflies, and South Asian Coalition on Child Servitude—are using the discourse of children's rights to challenge child labour practices. Combining global and local perspectives to arrive at a comprehensive picture, the book locates the struggle for child rights on two fronts: critiquing neo-liberal globalization and challenging rights violations in India.

Tsunamies and earthquakes in coastal environments: Significance and restoration --Singapore: Springer, 2016

This monograph is a compilation of a number of research studies presented in fourteen chapters dealing with the impact and restoration of coastal environments that have been affected by earthquakes and tsunamis. The focus is mainly on rivers, estuaries, coastal lagoons, beaches, and related ecosystems. In addition to direct impact and response due to flooding and subsequent abrasion, this publication covers physical, chemical and biological responses in coastal morphology, water quality and ecosystems and includes also topics dealing with risk reduction and vulnerability. This compilation mainly covers examples from large magnitude earthquake and tsunami events in the Indian and Pacific Ocean that are complemented with other events in Latin America and the Iberian Peninsula. Comprehensive descriptions of multi-scale impacts of tsunami and earthquake events, both spatially and temporally, will help the reader to understand the complicated interactions which occur in coastal zones in order to create a sustainable, resilient environment and achieve a society with smart post-event recovery planning. This book is aimed at researchers and students in coastal science and engineering as well as at policy makers, environmental planners and coastal managers.

Art-of-living: a concept to enhance happiness--Cham: Springer, 2016

This volume examines the questions of what constitutes a good life and how one can achieve happiness and well-being, and analyses different ways in which people can strive for a good life. First, it presents an overview on important concepts in psychology that are related to living a good life. Then, a new approach is introduced: the concept of art-of-living as a holistic way to reach happiness. Empirical studies are reported involving a questionnaire for measuring art-of-living, and the validity of the questionnaire is demonstrated with respect to a wide range of concepts. In addition, the volume provides results from empirical studies, showing that, and how, art-of-living and happiness can be enhanced. Several intervention studies are described in detail, which have been performed with different groups of subjects, including pupils, university students and employees. Also, results of interviews are summarized, which were held with people who had been nominated as exemplary artists-of-living. The volume concludes with a description of art-of-living in autobiographies, and presents suggestions for further research with respect to art-of-living.

How to combat recession: stimulus without debt--New York: Oxford University Press, 2018

Recessions are a recurring phenomenon and there are repeated debates about how to combat them when the crisis hits and after the economy begins to grow again. Laurence Seidman argues that currently we are not ready to combat the next recession. A recession involves a plunge in aggregate demand for goods and services which compels producers to cut production and employment. Fortunately, a large boost in demand can be achieved by a large fiscal stimulus—primarily a temporary large increase in tax rebates for households plus several fiscal supplements. But fiscal stimulus has always involved a large increase in government debt, something Congress understandably resists. Seidman explains all aspects of this new way to combat recession, "stimulus-without-debt." He presents evidence that fiscal stimulus works in a recession—it increases aggregate demand which stimulates production and employment. He explains why the fiscal stimulus should consist primarily of tax rebates for households plus several fiscal supplements. His analysis covers basic foundations as well as implications for inflation, central banks, and how to address secular stagnation. When the next recession hits, we will be ready to combat it if we know how to use fiscal stimulus without increasing

Political parties in Sri Lanka: change and continuity--New Delhi : Oxford University Press, 2018

Having survived a tumultuous period in its political history, the island state of Sri Lanka has one of the longest and most active traditions of political parties in South Asia. The survival of democratic politics here despite repeated youth insurgencies, a protracted ethnic conflict, and a long and bloody civil war makes it pertinent for us to explore the patterns of change and continuity that characterize party politics in Sri Lanka. While the first and second phases of the history of its parties and party system—the last period of colonial rule, followed by the postcolonial years of 1947–70—unfolded in a context of relative social peace, the third phase, from 1970 to the present, has seen continuing social unrest, rebellion, political violence, and a deepening crisis in the experience of democracy.

Inequality, boom, and bust: from billionaire capitalism to equality and full employment--London : Routledge, 2018

There is enormous inequality between the income and wealth of the richest 1 percent and all other Americans. While the top 1 percent own 42 percent of all wealth in America, the lower half on the income ladder has only 2 percent of all of the wealth. This book develops a viewpoint contrary to the prevailing conservative paradigm, setting out both reasons for this inequality and the impact of this. To explain inequality, conservative economists focus on individual characteristics such as intelligence and hard work. This book puts forward new evidence to show that changes in economic inequality are primarily due to characteristics inherent in the standard operation of capitalist institutions. Furthermore, the authors seek to explain the cycle of boom and bust by considering political and social factors often overlooked by conservative economists. This book also explores how wealth influences political policies in a way that increases economic inequality even more than its present level.

State, society and foreign capital in India--New Delhi: Cambridge University Press, 2018  
Why are some states in India able to facilitate foreign capital inflows better while others are not? This book addresses the socio-political factors such as ideas and interests of political actors, which produce the different levels of foreign direct investment (FDI) in states of India. It studies the causal role of disparate state-society relations in the evolution of institutions facilitating and regulating FDI inflows in the states through a comparative case study on the manufacturing industries of Tamil Nadu and Odisha.

 Intellectual property rights: National policy of India on patents, trademarks, copyrights etc. --New Delhi: Synergy Books India, 2017
- India unveiled its first a comprehensive, National Intellectual Property Rights (NIPRs) Policy-2016, on 13 May 2016, aimed at fostering innovation, cutting delays in clearing patent, trademark and copyright applications; protecting traditional knowledge and encouraging entrepreneurship. It is likely to bring India's IP regime in line with global standards and help improve its ranking in the World Banks Ease of Doing Business Index. The new NIPRs Policy-2016 will speed up the entire registration of patents and trade-marks, etc. The NIPRs Policy-2016 has generated unprecedented responses within and outside India. A critical review of the said NIPRs Policy-2016 has been made by various scholars, published elsewhere and these are compiled and included in this book for the benefit of researchers, policy planners, academicians, legal professionals, etc.

National policy of India on Women empowerment: public policy and governance in India --New Delhi: Synergy Books India, 2017

The policies/ programmes of the Government of India are all directed towards achieving inclusive growth with a special focus on women, in line with the National Policy for essence of Empowerment of Women. This book incorporates the original texts, in verbatim, of a select national government policies and programmes of India. It contains legislative measures and national programmes towards creating a better India.

111 Sinclair, Guy Fiti 50194

To reform the world: international organization and the making of modern states--Oxford: Oxford University Press, 2017

This book explores how international organizations (IOs) have expanded their powers over time without formally amending their founding treaties. IOs intervene in military, financial, economic, political, social, and cultural affairs, and increasingly take on roles not explicitly assigned to them by law. Sinclair contends that this 'mission creep' has allowed IOs to intervene internationally in a way that has allowed them to recast institutions within and interactions among states, societies, and peoples on a broadly Western, liberal model. The book draws on a wide range of original institutional and archival materials, bringing to light little-known aspects of each organization's activities, identifying continuities in the ideas and practices of international governance across the twentieth century, and speaking to a range of pressing theoretical questions in present-day international law and international relations.

50192

Sedition in liberal democracies--New Delhi: Oxford University Press, 2018

Examining the relationship between sedition and liberal democracies, particularly in India, this book looks at the biography of sedition laws, its contradictory position against free speech, and democratic ethics. Recent sedition cases registered in India show that the law in its wide and diverse deployment was used against agitators in a community-based pro-reservation movement, group of university students for their alleged 'anti-national' statements, anti-liquor activists, and anti-nuclear movement, to name a few. The lived reality of the law of sedition in changing anthropological sites is juxtaposed with its positivist existence. Anushka Singh uses a comparative framework keeping in focus the Indian experience backed by fieldwork in Haryana, Maharashtra, and Delhi, and includes a comparative perspective from England, the USA, and Australia to contribute to debates on sedition within liberal democracies at large, especially in the wake of the proliferation of counter-terror legislations.

Globalizing India: how global rules and markets are shaping India's rise to power--New Delhi: Cambridge University Press, 2016  
India's recent economic transformation has fascinated scholars, global leaders, and interested observers alike. In 1990, India was a closed economy and a hesitant and isolated economic power. By 2016, India has rapidly risen on the global economic stage; foreign trade now drives more than half of the economy and Indian multinationals pursue global alliances. Focusing on second-generation reforms of the late 1990s, Aseema Sinha explores what facilitated global integration in a self-reliant country pre-disposed to nationalist ideas. The author argues that the impact of globalization on India has affected trade policy as well as India's trade capacities and private sector reform. India should no longer be viewed solely through a national lens; globalization is closely linked to the ambitions of a rising India

International intervention identity and conflict transformation: bridges and wal between groups--New York: Routledge, 2016
- This book examines the different types of external processes and their respective contributions to softening or hardening divisions between conflicting groups. It also analyses the types of conflict resolution strategies, including integration, accommodation and partitioning, and investigates the conditions under which the international community decides to pursue a particular strategy, and how the different strategies contribute to solidification or transformation of group identities. The author uses three case studies, Bosnia and Herzegovina (BiH), Northern Ireland and Israel-Palestine, to reveal how different types of external interventions impact on the identities of conflicting groups. The volume seeks to address how states and international organizations ought to intervene in order to stimulate the building of bridges rather than walls between conflicting groups.
- 118 Springer, Nikki 50327  
Analysis of Rachel Carson's - silent spring--London: Routledge, 2017
- Rachel Carson's 1962 Silent Spring is one of the few books that can claim to be epoch-making. Its closely reasoned attack on the use of pesticides in American agriculture helped thrust environmental consciousness to the fore of modern politics and policy, creating the regulatory landscape we know today. The book is also a monument to the power of closely reasoned argument – built from well organised and carefully evidenced points that are not merely persuasive, but designed to be irrefutable. Indeed, it had to be: upon its publication, the chemical industry utilised all its resources to attempt to discredit both Silent Spring and Carson herself – to no avail. The central argument of the book is that the indiscriminate use of pesticides encouraged by post-war advances in agriculture and chemistry was deeply harmful to plants, animals and the whole environment, with devastating effects that went far beyond protecting crops.

State of rural finance in India: an assessment--New Delhi: Oxford University Press, 2016

This report examines the policy framework, institutional structure, trends and patterns in the flow of financial services, product suitability, and efficacy of financial services both in terms of penetration and customer satisfaction. It has been organized into savings, credit, insurance policy issues, repayment performance, and products. The performances of NABARD, non-farm sector, microfinance, and cooperative banking reform—considering the specific and topical nature of these institutions/segments—are also discussed. The chapters are designed in terms of different strands of finance—savings, credit, insurance, banking and financial institutions in lending, important apex institutions in rural finance—and the findings of some major studies.

Oxford handbook of study of religion--Oxford: Oxford University Press, 2016

The Oxford Handbook of the Study of Religion provides a comprehensive overview of the academic study of religion. Written by an international team of leading scholars, its fifty-one chapters are divided thematically into seven sections. The first section addresses five major conceptual aspects of research on religion. Part two surveys eleven main frameworks of analysis, interpretation, and explanation of religion. Reflecting recent turns in the humanities and social sciences, part three considers eight forms of the expression of religion. Part four provides a discussion of the ways societies and religions, or religious organizations, are shaped by different forms of allocation of resources. Other chapters in this section consider law, the media, nature, medicine, politics, science, sports, and tourism. Part five reviews important developments, distinctions, and arguments for each of the selected topics. The study of religion addresses religion as a historical phenomenon and part six looks at seven historical processes. The disciplinary profile of this volume is reflected in part seven, which considers the history of the discipline and its relevance.

121      Subramanian, Arvind      50204

Of Counsel: the Challenges of the Modi-Jaitley Economy: Penguin Viking, 2018

Charged with the task to restructure an insecure and fragile economy, Subramanian's trusteeship has seen the country through one of the most hotly contested and turbulent periods of economic governance and policymaking in recent decades—from the controversial recall of 85 per cent of circulated currency during demonetization to a complete overhaul in taxation with the introduction of the GST. Subramanian also addresses the overleveraging of public-sector banks, the fraught links between the state and private sector ('stigmatized capitalism'), the changing relationship between the state and the individual, and the ever-pervasive, life-threatening issues surrounding climate change.

Development and distribution: structural change in south east asia -  
-Oxford: Oxford University Press, 2018

Since the Second World War, surprisingly few developing countries have experienced a truly sustained episode of economic and social convergence towards the structural characteristics of the advanced nations. East Asia has exceeded most regions in its achievement of convergence, and much has been written on comparative industrialization and development in North East Asia. Development and Distribution focuses on South East Asia and, more specifically, on Malaysia, Indonesia, and Thailand. These three nations have all undergone a major transformation - in a way never anticipated - from being poor, agrarian countries to middle-income countries with developed industrial and manufacturing bases.

123 Sumner, Andy 50233

Global poverty: deprivation, distribution, and development since the cold war--Oxford: Oxford University Press, 2016

Why are some people poor? Why does absolute poverty persist despite substantial economic growth? What types of late economic development or 'catch-up' capitalism are associated with different poverty outcomes? Global Poverty addresses these apparently simple questions and the extent to which the answers may be shifting. One might expect global poverty to be focused in the world's poorest countries, usually defined as low-income countries, or least developed countries, or 'fragile states'. However, most of the world's absolute poor by monetary or multi-dimensional poverty - up to a billion people - live in growing and largely stable middle-income countries.

Giving with a thousand hands: the changing face of Indian philanthropy --New Delhi: Oxford University Press, 2017

India has been a major recipient of international aid since its independence on account of its developmental gaps and wide income disparity; yet it also ranks among the top four nations in the world in terms of the number of billionaires. How and what do these fabulously wealthy Indians contribute to the development of their own society? What is the nature of Indian philanthropy? Has the phenomenal wealth creation in recent decades seen an increase in altruistic spending in social development, and what role does the Indian state play in promoting or restraining the act of giving?. Making an important distinction between charity and philanthropy, Giving with a Thousand Hands argues that while charity is alive and well in India, the country is short on philanthropy defined as altruistic giving on a large enough scale to bring about transformative social change.

50207

Beeronomics: how beer explains the world--Oxford: Oxford University Press, 2017

Beeronomics examines key developments that have moved the brewing industry forward. Its most ubiquitous ingredient, hops, was used by the Hanseatic League to establish the export dominance of Hamburg and Bremen in the sixteenth century. During the late nineteenth century, bottom-fermentation led to the spread of industrial lager beer. Industrial innovations in bottling, refrigeration, and TV advertising paved the way for the consolidation and market dominance of major macrobreweries like Anheuser Busch in America and Artois Brewery in Belgium during the twentieth century. We're now in the era of global integration— one multinational AB InBev, claims 46% of all beer profits— but there's a counterrevolution afoot of small, independent craft breweries in both America, Belgium and around the world. Beeronomics surveys these trends, giving context to why you see which brands and styles on shelves at your local supermarket or on tap at the nearby pub.

50409

Termites of the state: why complexity leads to inequality--New York: Cambridge University Press, 2018

One of the world's leading public economists offers a sweeping account of modern economic development. In plain language it connects the extreme growth in income inequality, increasing complexity of government regulations, and the workings of political influence to explain the biggest issues facing the world economy today.

127 Thiele, Leslie Paul 50344

Sustainability--Cambridge: Policy Press, 2016

Leslie Paul Thiele's accessible yet thorough book provides a broad-ranging introduction to the concept and practice of sustainability today. It addresses the history, scope, and contested meanings of sustainability as an ethical ideal, an ascendant ideology, and a common sense approach to living in an ever more crowded world of increasingly scarce resources. Key topics covered include environmental health and ecological resilience, the promise and unintended consequences of technology, political and legal challenges, economic limits and opportunities, and cultural change.

128 Thies, Cameron G (Ed.) 50306-50307

Oxford encyclopedia of foreign policy: Oxford University Press, 2018. 2 Vols.

Theoretically, The Oxford Encyclopedia of Foreign Policy Analysis examines traditional approaches derived from international relations, such as realism, liberalism, constructivism, and feminism. It also reviews the domestic politics approaches to foreign policy analysis so frequently used in this subfield, including two-level games, veto players, and diversionary theory. Middle-range theories are also surveyed, including role theory, securitization theory, and other conceptual innovations, such as path dependency and emotions. Methodologically, the essays examine the state of the literature and provide guidance for readers on archival research, historiography, the use of counterfactuals, discourse analysis, simulations, and agent-based models, as well as quantitative methods.

Financial economy: evolutions at the edge of crises--London: Routledge , 2018

This book examines how contemporary financial economy evolved as the predominant economic system, and why unabated accumulation of financial capital takes place in such systems. It reviews the mechanics of accumulation of wealth by tracing the historical roots of financial capital. It provides an alternative framework for studying economic systems design, keeping aside the orthodox neoclassical analysis of equilibrium market exchange. Further, it highlights the global financial circuit, the state of the current digitalised economy with electronic money transfers, consumer's decision-making and expected future earnings, and questions the relevance of some fundamental concepts of economics as well as economic policies. Using a notion of sequential economy, it also shows how present economic activities are treading upon the future.

50410

Unelected power: the quest for legitimacy in central banking and the regulatory state--Princeton: Princeton University Press, 2018

Unelected Power lays out the principles needed to ensure that central bankers and other independent regulators act as stewards of the common good. Blending economics, political theory, and public law, this critically important book explores the necessary conditions for delegated but politically insulated power to be legitimate in the eyes of constitutional democracy and the rule of law. It explains why the solution must fit with how real-world government is structured, and why technocrats and their political overseers need incentives to make the system work as intended. Now with a new preface by Paul Tucker, Unelected Power explains how the regulatory state need not be a fourth branch of government free to steer by its own lights, and how central bankers can emulate the best of judicial self-restraint

- 132 Tyabji, Nasir 50122
- Forging capitalism in Nehru's India: neocolonialism and the state, c.1940-1970--New Delhi: Oxford University Press, 2015
- The prospects for industrial development in the early years of independent India were plagued by a number of interrelated issues. Indian industrialists of the post-Independence era had either evolved from the ranks of merchants and moneylenders of the colonial period or from wartime speculators and hoarders. In general, their interests lay in short-term speculative gains rather than in sustained industrial growth. In addition, the impoverished condition of the peasantry resulted in the prospects of attractive returns through the diversion of urban resources to the rural moneylending market.
- 133 Uhlin, Anders 50290
- Civil Society and regional governance: the asian development bank and the association of southeast asian nations--Lanham: Lexington Books, 2016
- Through detailed comparative case studies of civil society engagement with two major regional international organizations in Southeast Asia this book demonstrates the potentials and limitations of civil society actors as democratizing agents in governance beyond the nation-state. Drawing on rich empirical data, including more than 100 qualitative interviews with civil society activists and representatives of the Asian Development Bank (ADB) and the Association of Southeast Asian Nations (ASEAN), the study demonstrates how civil society actors have contributed to pushing ADB--and to a much lesser extent ASEAN--in a political liberal direction, improving transparency, strengthening accountability, and introducing mechanisms protecting people from the abuse of power.
- 134 Unnithan, N. Prabha and Nalla, Mahesh (Ed.) 50324
- Violence against women in India --London: Routledge, 2018
- Women in India constitute nearly half of its population of over a billion people, and this book is a rigorous social scientific examination of the issue of violence against women in India. It draws from the latest criminological research on the nature and extent of such violence; discusses cultural myths and practices that underlie the problem; and examines policies and programs that respond to it. This collection will advance research, justice, and social action to tackle this heartbreaking problem.

- 135 Vaid, Divya 50152  
Uneven odds: social mobility in contemporary India--New Delhi: Oxford University Press, 2018
- This book draws on national level datasets and quantitative methods to understand the multiple strands of social mobility or the lack of it, by focusing on the overlapping identities of social class, caste, and gender in both rural and urban context. It investigates the contemporary processes and drivers of mobility, and appraises the role of education in supporting or preventing increased upward social mobility by concentrating on those groups that are disadvantaged from this very opportunity. It also takes into account the impact of liberalization on social mobility and argues that mobility today is differentially patterned on the basis of local and global identities.
- 136 Vala, Jorge (Ed.) , 50281  
Social developmental construction of violence and intergroup conflict--Switzerland: Springer, 2016
- This book describes how the violent dimension of intergroup relations can be better understood if the interplay between psychological and social-developmental factors is taken into account. Ten unique, innovative and original chapters by international scholars of social and developmental psychology address the way how social reality is constructed as a hierarchical order, and how social norms, beliefs and cognitive-behavioral patterns are learned, shared and repeatedly processed on how to uphold or challenge this social order. The volume covers diverse issues such as the effects (or lack thereof) of power and violent video games on people's thinking and behavior, the acquisition of social norms and attitudes during childhood, minorities' identity management strategies, the role of mothers' educational beliefs and the impact of ideologies.
- 137 Vallier, Kevin and Weber, Michael (Ed.) 50189  
Political utopias: contemporary debates--New York: Oxford University Press, 2017

Political theory, from antiquity to the present, has been divided over the relationship between the requirements of justice and the limitations of persons and institutions to meet those requirements. Some theorists hold that a theory of justice should be utopian or idealistic—that the derivation of the correct principles of justice should not take into account human and institutional limitations. Others insist on a realist or non-utopian view, according to which feasibility—facts about what is possible given human and institutional limitations—is a constraint on principles of justice. In recent years, the relationship between the ideal and the real has become the subject of renewed scholarly interest. This anthology aims to represent the contemporary state of this classic debate. By and large, contributors to the volume deny that the choice between realism and idealism is binary. Rather, there is a continuum between realism and idealism that locates these extremes of each view at opposite poles.

पर्यावरणनामा--नई दिल्ली: कल्पना प्रकाशन , 2018

अपने आप को सुरक्षित रखने के लिए और पृथ्वी पर खुद को स्थापित करने के लिए मनुष्य ने प्रकृति के साथ एक लम्बा संघर्ष किया, जिसके फलस्वरूप उसने प्रकृति पर विजय पायी, उसने जंगल काटे खेती शुरू की, घर बनाये , नगर बसाये और अपनी सुविधा के लिए प्रकृति को नियंत्रित किया । प्रकृति पर अपनी विजय के इस अहसास ने मनुष्य को इतना उदमानी बना दिया की उसने प्रकृति का ही विनाश करना शुरू कर दिया । विभिन्न मानवीय क्रियाकलापों ने पर्यावरण संकट इस प्रकार से उत्पन्न कर दिया है । जिसने सम्पूर्ण मानव समाज को इस दिशा में सोचने के लिए बाध्य किया है आज पर्यावरण और मानव जाती के बिगड़ते सम्बन्धो को सुधरने की आवश्यकता है । समय बीतने के साथ पर्यावरण से जुडी समस्याएं गंभीर रूप धारण कर रही है । समस्या के सापेक्ष हमारी तैयारियां बेहद धीमी और सुस्त है । कायदे कानून से पर्यावरण नहीं सुधरता भारत में दुनिया के किसी भी देश से ज्यादा कानून है । पर यही पर इन कानूनों का खुले आम उलंगन होता है और भारत दुनिया के सबसे प्रदुसित देसो की श्रेणी में आता है। पिछले २०० वर्षों में मनुष्य ने प्रकृति के साथ अपने सम्बन्ध को पूरी तरह बदल दिया है । आज प्रकृति से मनुष्य का सम्बन्ध मुनाफा कमाने से है , न की उनकी सजीवनि के रूप में है ।

ग्लोबल वार्मिंग कचरे की समस्या, कचरा प्रबंधन , जल प्रदुषण , वनो का विनाश , खेती की जमीं पर उगते क्रंकीट के जंगल सहरो में बढ़ता शोर और धूवा, पीने के पानी को तरसते लोग , मरती नदिया , परमाणु बिजली बाढ़ की विनाशलीला , सूखे का कहर , कीटनाशको का दुरुपयोग और सहरो में घर खोजते जंगली जानवर लेखक क चिंता के मुख्या बिंदु है , यह किताब पर्यावरण, उसके विनाश और उससे पैदा हो रही समश्याओ के बहुआयामी और बहुस्तरीय रूपों से हमे रुबरु कराती है ।

Macroeconomic policies for emerging and developing economies--  
New Delhi: Sage Publications, 2018

Provides a contemporary analytical account and discusses the current debates on the theory and practices of macroeconomic policies of developing economies emerging from the crisis. It deals with issues relating to openness, capital flows and exchange rate policies as well as macro-financial policies. It underscores two important points: the need to design a development strategy that takes into account the economic context of the countries concerned, and for well-regulated macro-financial policies that would help promote the objects of sustainable growth with price and financial stability.

Nationalism, development and ethnic conflict in Sri Lanka -- New  
Delhi: Cambridge University Press, 2018

This book examines the relationship between ethnic conflict and economic development in modern Sri Lanka. Drawing on a historically informed political sociology, it explores how the economic and the ethnic have encountered one another, focusing in particular on the phenomenon of Sinhala nationalism. In doing so, the book engages with some of the central issues in contemporary Sri Lanka: why has the ethnic conflict been so protracted, and so resistant to solution? What explains the enduring political significance of Sinhala nationalism? What is the relationship between market reform and conflict? Why did the Norwegian-sponsored peace process collapse? How is the Rajapaksa phenomenon to be understood? The topical spread of the book is broad, covering the evolution of peasant agriculture, land scarcity, state welfarism, nationalist ideology, party systems, political morality, military employment, business elites, market reforms, and development aid.

 Developing sustainable careers across the lifespan: european social fund network on career and AGE (age, generations, experience) -- Cham: Springer, 2016
- This book offers insights into facilitating sustainable careers through the study of a wide interdisciplinary range of policy investigations and assessment of ongoing practices in the field. By assessing and comparing the transferability of policies and good practices between firms in ten countries and regions of the European Union this book considers the development of sustainable careers across the lifespan at the levels of individuals, organizations and systems. This book is the culmination of a research project from the international European Social Fund network on Career and Age, Generation, Experience (AGE).

 ग्रामीण महिला सशक्तिकरण: उपलब्धि अभिप्रेरणा के माध्यम से सूक्ष्म-उद्यम -- नई दिल्ली: सेज भाषा, 2017
- यह किताब उन निर्धन, ग्रामीण, महिला उद्यमियों पर मौलिक शोध के माध्यम से इन पर किए गए अध्ययन की कमी को पूरा करती है, जिनकी उपलब्धि अभिप्रेरणा (अचीवमेंट मोटीवेशन) को बारीकी से मापा गया है। यह अध्ययन उपलब्धि अभिप्रेरणा की उपस्थिति/अनुपस्थिति और इन महिलाओं की उद्यम चलाने में सफलता/असफलता में स्पष्ट संबंध को स्थापित करता है। ग्रामीण महिला सूक्ष्म-उद्यमियों के लिए एशियन सेंटर फॉर ऑर्गनाइजेशन रिसर्च एंड डेवलपमेंट (एकॉर्ड) एनजीओ द्वारा ग्रामीण पिछड़ेपन को दूर करने के लिए सुझाए गए उपायों को भी लेखकों ने विस्तृत रूप में प्रस्तुत किया है।
- 146 Wani, Aarti 50121  
 Fantasy of modernity: romantic love in Bombay cinema of the 1950s--Delhi: Cambridge University Press, 2016

Romantic love overwhelms 1950s Bombay cinema. Love and romance is evident in the themes, lyrics and visual aesthetics of films of the period, as it is in the publicity and gossip surrounding films and film stars. Love in cinema becomes significant when social reality constrains its quotidian experience and expression. By bringing a spectacular imagination of love to centre stage, the 1950s cinema deflected anxieties of 'Indianness' even as the new aesthetic and affect of romance offered an alternative engagement with the contradictions of modernity. *Fantasy of Modernity: Romantic Love in Bombay Cinema of the 1950s* explores the films, the songs, the stars and the extra-cinematic discourse of the period to read love and romance as its most productive trope that mobilized a dynamic and contested public sphere.

147 Waxman, Zoe 50372

*Women in the holocaust: a feminist history*--Oxford: Oxford University Press, 2017

*Women in the Holocaust* is about the ways in which socially- and culturally-constructed gender roles were placed under extreme pressure; yet also about the fact that gender continued to operate as an important arbiter of experience. Indeed, paradoxically enough, the extreme conditions of the Holocaust - even of the death camps - may have reinforced the importance of gender. Whilst Jewish men and women were both sentenced to death, gender nevertheless operated as a crucial signifier for survival. Pregnant women as well as women accompanied by young children or those deemed incapable of hard labor were sent straight to the gas chambers. The very qualities which made them women were manipulated and exploited by the Nazis as a source of dehumanization

148 Wheater, Kitty 50352

*Analysis of claude levi-strauss's: structural anthropology*--London: Routledge, 2017

Linguistic structuralism studies the meaning of language based not just on definitions, but also on the relationships of words and sounds to each other. Lévi-Strauss's insight was to see that this concept of structuralism in linguistics could be applied to anthropology as well. He saw that while some cultures are very different from others, they all seem to have certain internal structural relationships in common. By tracing these structures across cultures, he tried to answer nothing less than the eternal question: "What is Man?"

149 Wojczewski, Thorsten 50299

*India's foreign policy discourse and its conceptions of world order: the quest for power and identity*--New York: Routledge, 2018

This book offers the first systematic investigation of the world order models in India's foreign policy discourse. By examining how the signifier 'world order' is endowed with meaning in the discourse, it moves beyond Western-centric IR and sheds light on how a state located outside the Western 'core' conceptualizes world order. Drawing on poststructuralism and discourse theory, the book proposes a novel analytical framework for studying foreign policy discourses and understanding the changes and continuities in India's post-cold war foreign policy. It shows that foreign policy and world order have been crucial sites for the (re)production of India's identity by drawing a political frontier between the Self and a set of Others and placing India into a system of differences that constitutes 'what India is'.

टूटे दर्पण: भारत में दहेज समस्या--नई दिल्ली : सेज भाषा, 2017

परीकथाओं में बुराई के ऊपर अच्छाई की जीत होती है और दर्पण झूठ नहीं बोलते। हालांकि वास्तविकता एक अलग तस्वीर प्रस्तुत करती है, जहां परीकथा लगने वाली शादियां टूट जाती हैं और एक भयावह दुःस्वप्न बनकर रह जाती हैं। टूट चुकी दुल्हनों, अस्वाभाविक मृत्यु और सर्वव्यापी 'दहेज'। आखिर क्यों 21वीं सदी का एक दशक बीत जाने के बाद भी 'दहेज मृत्यु' का भूत भारतीय समाज को भयभीत कर रहा है? रॉबिन वायट, नाज़िया मसूद के साथ, 'टूटे दर्पण' में इस समस्या की पड़ताल करते हैं और पाठकों से स्वाभाविकता से परे देखने की गुज़ारिश करते हैं। लेखन, घरेलू हिंसा से बचने वाली की कहानी से अपनी नज़र बड़ी सहजता से आरोपी पर लाकर, तथाकथित 'दहेज मृत्यु' की परम्परागत छवि को तोड़ता है। यह दर्पण के हर टुकड़े को करीब से देखता है और जो सामने आता है, वह है एक ऐसे समाज का जटिल चित्रण, जहां विवाह परामर्श अब भी वर्जित माना जाता है और जनसंख्या के बड़े हिस्से तक इसकी पहुंच नहीं है, जहां सशस्त्र और ताकतवर 'नारी-समर्थक' दहेज विरोधी कानूनों के साथ 'न्याय' की खोज, कई आदर्श शादियों के टूटने की सच्चाई सामने नहीं आने देती।
